**MISSIONARIES VISITING PROVINCE**

A husband and wife team of missionaries from India where they have spent the last 28 years are visiting several congregations of the Presbyterian Church in the province. They are Rev. Fred C. Knox, B.A. and Mrs. Knox, who were evangelists among the Bhil people in the jungles of Central India, and will tell of the church's role in the mission field.

**Cigarette Firms  
Asked To Label  
Goods Dangerous**

OTTAWA (CP) — MP Barry Mather, a non-smoker, has written to three major Canadian cigarette manufacturers asking them to label each package "to the effect that excessive use of such products is dangerous to health."

Mr. Mather, NDP member for New Westminster, issued a copy of the letter Tuesday. It says in part:

"It appears that the industry cannot long evade responsibility in relation to the facts which have been established by impartial medical research.

"If the industry attempts to dodge, minimize or deny the facts, it will as a consequence assume responsibility for the harmful consequences to smokers' health.

"There is little doubt but that the industry can be held responsible, and accountable to consumers who suffer a loss of health as a result of smoking or, it may be, to the survivors of such consumers."

## All New . . . All Beautiful RAMBLER

**WHAT WE STAND FOR**

Every company must stand for something. Behind our stand is a firm dedication to —

- Placing consumer benefit first
- Providing obviously better value
- Maximum emphasis on quality
- Strong emphasis on a specific product concept

This is our belief — we call it the Rambler idea.

We believe that maximum consumer benefit in our field is reached through a wise combination of the most important elements of volume passenger car design. These elements are — ● good performance ● good economy ● quality ● competitive price ● roominess ● maneuverability ● beauty ● styling stability ● excitement ● common sense ● fundamen-

mentally superior basic engineering and in Rambler for 1964, we offer you an automobile designed to meet the rigors of Canadian winters and the problems of more intensive car use —

- parking problems
- traffic congestion
- the handling difficulty of huge cars in tight spots
- the rising total cost of car ownership

We have built our success on this foundation and will never waver from the dedication to base our product concept directly and specifically on true Canadian consumer needs.

We are proud to present to you the beautiful 1964 Ramblers. They represent in advanced design and engineering skill, the highest quality and value which can be built into an automobile.
