

On the management of the Voice.

In public speaking or reading, the primary object is to be heard. Many men, especially among the clergy, who in their public ministrations are indistinct and inaudible, would find they gained considerable advantage by careful attention to the following simple rules.

1. Exercise the voice. To keep the voice in good order, it ought to be exercised daily, either by reading aloud with full power of voice, or by singing exercises. Ten minutes' practice will suffice. The cause of rough, uneven voices, huskiness, indistinct utterance arises in a great measure from the vocal organs being improperly and irregularly exercised. We so often hear the clergy complain of their throats, which complaint has developed into a special kind of disease termed 'clerical sore throat.' They imagine it is from overwork, whereas in nine cases out of ten it is from the vocal organs being irregularly exercised.

2. Cultivate distinct utterance. No matter how powerful a voice a man may have, he cannot be heard if he is not distinct. To be distinct he must open his mouth, pronounce each vowel sound clearly and directly, and read slowly. Avoid gabbling and you prevent that smudgy sound which sentences have when the words run into one another.

How New Towns are Built.

The following good story, which illustrates the rapidity with which towns are built up in new Territories, was told the Northwest Lumberman by a gentleman who was looking around in Dakota recently. He was present when officials of the Chicago, Milwaukee & St. Paul road arrived at a point thirty miles north of Mitchell and planted a town which they called Woonsocket. At the time only one farm house was standing in the vicinity, and a car was used as a depot. This was on Thursday, and on Saturday of the same week there were two stores, a saloon, a hotel, and three lumber yards. There are men who have loaded lumber on cars without knowing where it would be unloaded, and then run it to the first new town they hear of being started. But it is not best to imagine that all of the yards which are established so suddenly in the new Dakota towns have complete assortments or are models of neatness. A few hundred feet of lumber thrown down by the track constitutes a yard, which grows and is put into shape as the town progresses.
