High Grade English Fertilizers

Like all goods of English manufacture ARE THE BEST, IN THE WORLD. They are true to name, always RELIABLE and during the 10 years in use here have NEVER FAILED TO GIVE SATISFACTORY RESULTS. Our most progressive farmers are using larger quantities every year with paying results. They are applicable to all crops, on all soils, with or without stable manure, and are THE CHEAPEST FERTILIZERS ON THE MARKET.

"The World's best by every test."

NOTICE.—Dr. Dickey's office will be open in the evening from 7 till 8 o'clock.

—Lord Roberts' army was just eleven days on the march from Blomfontein to Kroonstadt, and Kroonstadt is half way to Johannesburg.

—The New York Press remarks that the United States owes England one debt of gratitude, inasmuch as yet no Briton has tried to be funny enough to introduce a Filipino sympathy resolution in the House of Commons.

—The Mail and Empire remarks that the wonderful display of martial spirit, loyalty, and devotion to British interests that the world has witnessed during the past few months serve to show that the conscript would be out of place on British territory, and that the Empire may safely be left to the care of its voluntary defenders.

—The Summerside Journal remarks that "the Prince Edward Island government has a majority of one in the Legislative Assembly, apart from the Speaker. The way in which they secured this majority will of course be classed by the Liberals among those "great moral victories" of which they are so fond of boasting, but just wait until they give the people a chance to have a say on the matter. There will be a different story then."

Crops in Europe.

LONDON, May 15.—The Mark Lane Express today, in its weekly review of the crop situation, says: "The effects of the cold in England have been injurious to growing cereals and the French fields are backward; but there is hope for nearly the average yield. In Austria-Hungary the warm, wet weather is expected to put a new face on the winter sown wheat and rye. However, there will scarcely be a full crop. The Russian conditions are excellent."
