Round School Bldg. Has Students Dizzy

By ALLEN SACKMANN

EDMONTON (CP)—The architect ignored tradition when he designed Hillcrest Junior High School in suburban Jasper Place and now 850 students are going in circles.

John McIntosh, commissioned by the Jasper school board to plan a compact, windowless school, gave them a round building. It opened last September and even the sceptics were impressed.

From the arched main entrance to the domed gymnasium in the centre, the school is unusual. It has its own generating plant, air-conditioning, classrooms divided by sliding panels and one never-ending corridor to serve the entire structure.

School superintendent Bert Hohol said the design was so radical that school board members considered plans for six months before deciding to go ahead.

Provincial education officials agreed to its construction as an experiment providing no similar buildings are put up for five years, by which time its practicability can be assessed.

To principal W. J. Klufas, a half-term has been enough to convince him of its merits. The lack of windows—which saved $118,912 in building costs—has reduced outside distractions, made it easier for teachers to hold attention of slower students and improved their marks "tremendously."

Air-conditioning makes working conditions more pleasant for teachers and students.

"You know how at the end of the day a conventional school smells like a chicken coop?" says the principal. "Well, here it is as fresh at night as it is in the morning."

The functional heart of the $760,000 school is the equipment room where an engine-driven generator, and a spare for emergencies, use natural gas to provide electricity. Waste heat is recovered in low-pressure steam to heat, ventilate and air-condition the building.

It is estimated the gas total-energy plant will reduce utility costs by $4,000 a year.

Classrooms fan out within the circumference of the wheel-like structure. Lack of windows is offset by pastel color combinations and large tack and blackboards.

Some rooms are divided by sliding partitions which can be moved to allow one instructor, such as a visiting expert, to lecture to 70 or more students. Seats in these rooms are tiered much as in a theatre to enable all to see.

Laboratories, storage facilities, offices and the library make up most of the centre circle in the building.

Mr. Hohol says a conventional school would have cost 13 per cent more. Basic reason for the lower cost is that only one main corridor is needed and the design allows for full use of floor space. A conventional unit for the same number of students would require an extra 16,000 square feet.

Family Bypass Undertakers In Funeral For Drowned Boy

VANCOUVER (CP) — Tom Brown, 19, drowned in a boating accident, was cremated in a plywood coffin built by his relatives—the family felt it was best that way.

The story was told here by Tom's stepfather, Euan Cameron, a 36-year-old school teacher. He said the family felt it was "doing something for Tom—helping him out when he couldn't help himself, more so than with a regular funeral where undertakers seemed to be infringing on the duties of a family."

Then there was the cost. That way it cost about $55, Cameron said—$50 for the cremation and $5 for a death certificate and about $7 for wood and nails to make the coffin.

Six undertakers quoted costs of about $200 for undertaking service and cremation or burial.

Cameron said his wife, Hazel, recalled how funerals were handled in her home in the Kootenays—the community carpenter built a casket, the family dug a grave and a family friend took the coffin and the family to the cemetery in a truck.

"We felt that was the thing to do with Tom," Cameron said.

WORKED IN BASEMENT

So together with his wife's brother-in-law, carpenter sculptor Sam Burich, they bought $5.60 worth of plywood and went back to Sam's base ment."

"We felt good sawing the pieces and hammering together the coffin," Cameron said.

"We felt we were doing something for Tom, helping him out when he couldn't help himself."

The two then went to Naramimo to collect the body. It was taken there after Tom was drowned in the nearby Gulf Islands Feb. 21. They brought it back to Vancouver in the home-made coffin in the back of Sam's van.

Then they registered the death, made arrangements with the crematorium and took the body there in the van. Two crematorium attendants helped them load the box on to a dolly. Cameron and Burich watched as it was wheeled inside.

Then they drove away.

Cameron said that when he was considering family handling of the cremation "I refused to let myself get upset or get into a pitiable frame of mind as I talked to the undertakers."

"I got the impression they tried to offer as many extra services as possible. Somehow I felt they were infringing on the duties of a family."

NO CHURCH SERVICE

Cameron said he and his wife are not church-goers. Neither was Tom. Therefore they felt a funeral service was pointless.

The family plans to go back to the Gulf Islands with Tom's ashes and scatter them on the channel where he was drowned.

Said Cameron:

"I've seen the reaction by my family to what we did for Tom.

"I've told them this is the way I want it when I die."

CONTRACT BRIDGE

♠ 9 6 4 3 2
♥ 8 7 5
♦ 6 4 2
♣ 7 3

EAST
♠ K 10 8
♥ A Q 10 9
♦ K 10
♣ J 9 8 5

SOUTH
♠ A Q J
♥ J 6 4 2
♦ A J 7
♣ 10 4 2

The bidding:

North	East	South	West
1♦	Dble.	Redble.	1♠
Pass	Pass	2 NT	Pass
3 NT			

Opening lead — three of spades.

The declarer obtains all kinds of advantages when he has a long suit to run. The opponents are forced to discard as these tricks are cashed and, since they do not know declarer's exact hand, they are frequently hard put to find the proper discards.

Even aside from this, one or sometimes both defenders may find it difficult to discard effectively under the circumstances with which they are faced. For an example of this, here is a fine hand played by Carol Sanders the year (1961) she won the national mixed pair championship with her husband Tom.

West led a spade and Mrs. Sanders managed to take twelve tricks despite East's hand. She took the king with the ace, entered dummy with a club, and led a diamond and finessed the jack. She then cashed four more diamonds to bring about the following position:

	North	
	♠ 7	
	♥ K 3	
	♣ K Q 6	
West		East
Immaterial		♠ 10
		♥ A Q
		♣ J 9 8
	South	
	♠ Q J	
	♥ J 6	
	♣ 10 4	

Mrs. Sanders next cashed the Q J of spades, dummy discarding the three of hearts as East discarded the queen.

East's effort to win two tricks came to nought, however, when Mrs. Sanders now played a heart. Forced to take the ace and return a club. East could not prevent Mrs. Sanders from taking the last three tricks.

A low club return would allow South to win with the ten, while the jack of clubs return would permit South to win in dummy with the queen and enter her hand with the ten to score the last trick with the jack of hearts.

So Mrs. Sanders made six notrump as a result of the unusual endplay.

Accused Nazi War Criminal Is Arrested in Argentina

BUENOS AIRES (Reuters)—An accused Nazi war criminal charged with complicity in the "mercy killings" of 15,000 persons during the Second World War has been arrested here and now faces extradition to West Germany.

An Argentine police spokesman has reported that Dr Bernhard Bohne, who fled West Germany after he was released from pre - trial detention on health grounds last summer, was arrested Thursday in a Buenos Aires suburb not far from where he had been living with his sister.

Commissioner Jose Pedro Varelara of the Argentine police said the German offered no resistance when arrested.

Valaro said Bohne, one of four Germans originally due to stand trial at a current euthanasia trial at Limburg, West Germany entered Argentina last August.

Originally held at the Buenos Aires Central Courthouse, Bohne was transferred from there to the suburban Villa Devoto jail.

ONE ON TRIAL

Of the four men originally accused of complicity in the mass killings, only one, Dr. Hans Hefelmann, was in court at Limburg when the trial opened two weeks ago.

Between Bohne's escape and the start of the trial, Dr. Werner Heyde hanged himself in his cell and Frederich Tillmann plunged to death from an office window.

Buenos Aires was the scene of another major war criminal hunt in 1960 which resulted in the arrest of Nazi Adolph Eichmann by Israeli agents. Eichmann was spirited to Israel, convicted for the murder of millions of Jews in the Second World War and executed.

Bohne, a 62-year-old Duesseldorf lawyer, is alleged to have helped establish and operate Hitler's euthenasia program under which an alleged 200,000 persons died.
