

Among The Farmers

Federation Of Agriculture News

Agricultural Outlook

Farmers will recall the Federal Agricultural Conference held last November at Ottawa, which discussed the Agricultural Outlook for 1951. A report of that conference published by authority of the Hon. James G. Gardiner has the following to say in reference to potatoes:

"We publish this statement without comment for the information of those who are planning their potato program for the coming year."

"The 1951 United States potato crop is expected to exceed domestic requirements. It is to be an attractive export market in the United States for the 1951 Canadian crop. Therefore, if production is maintained at 1950 levels in Canada low prices may be anticipated."

faithful, intelligent horse from the picture.

General Medical Practitioner

In considering the question of National Health Planning, the C. F. A. felt that the doctor in general practice should receive special training and greater recognition of his importance.

With this in mind, it is suggested that courses of training for the family physician in our medical schools should be promoted with the realization that general medicine shall be the basic subject and in no way inferior to specialization.

Fulfillment of such a plan can do much to promote the mental, physical, and social development of the family unit.

Cheese Conference

The annual meeting of the Dairy Farmers Association held at an effort to make the Dairy Farmers of Canada to have cheese organizations meet to plan for marketing in the coming year.

Action has already been taken on this matter and already Ontario cheese producers have been discussing with those of Quebec.

It is quite probable that in the near future the suggested meeting will be arranged.

Potato Growers Meeting

The annual meeting of the Potato Growers Association this year was a model of decorum and the discussion of controversial issues conducted with every courtesy.

We believe that as a result, better feeling has been developed between growers and dealers together with greater respect for each others problems.

United and harmonious action on the part of all concerned can do much to solve potato problems.

Farm Prices & Market Report

From the weekly report by Mr. W. B. Shaw, Deputy Minister of Agriculture:

The potato market continues to be dull although potatoes are holding generally to the minimum price level. Government support purchases in the United States were 2 1/2 million bushels last week. About 8 1/2 million bushels or about 105,000 carloads have been taken off under support. A small export to outside countries has been made by Maine, but supplies of Spanish and other orders have been filled by countries outside of North America.

Movement has been light for the past week. However, farmers should not be unduly worried and try to press too many on the market in its present condition. Our holdings in Eastern Canada are far less than this time last year. At the same time indications are that harvesting of early crop in the United States will be considerably below last year. Our road conditions will have a limiting effect on movement for the next few weeks, and should help to correct matters.

The following is the detail on prices:

Tignish—One car of Cobble seed shipped at 50c per bus. delivered at car. Tablestock 55c per bus.

O'Leary—Sobogues 50c per bus. at car. Good movement. Tablestock 55c per bus.

Wellington—Cobbler seed 50c per bus. delivered. Tablestock 55c per bus. Slow movement.

Summerside—Very little seed or table potatoes moving. Cobblers 50c per bus. Sobogues 44c per bus. Tablestock 55c per bus.

Kensington—Not much moving in seed or tablestock. Price of latter 60c per 75 lb. bag delivered at car.

Colville and Wiltshire—Cobbler seed 50c per bus. delivered. No tablestock.

Charlottetown—Cobbler seed 50c per bus. Other varieties seed 44c. Tablestock 55c per 75 lb. bag. Turnips 40c per bus. at car.

Vernon River—Tablestock 55c per bus. No seed.

Cardigan—No seed. Light movement of tablestock. Turnips 40c per bus. at car.

Morell—Cobbler seed 50c per bus. at car. Tablestock 55c per bus.

Souris—Katabdin seed 48c per bus.

One of the most significant changes in farming has been the change from horses to tractors and trucks. There is ample evidence to indicate that the horse as a source of farm power, is slowly but surely on the way out.

Evidently, no question exists in the farmers mind as to the superiority of the tractor in efficiency, speedy work, and relief from endless walking over the fields.

It is, however, with considerable regret that we view the change. The combination of a philosophical farmer, a fat horse and the fertile soil was one that kept the farming operation very close to nature.

We feel that farming is, perhaps, going to be a little less satisfying for the passing of the

Sixty Five Million Dollars For Wheat Growers

Mixed reaction have greeted the announcement by the Dominion Government of its intention to pay the western growers approximately eight cents per bushel on wheat delivered under the British Contract.

The western grower is apparently receiving less than he expected and felt entitled to. On the other hand a portion of the press condemns the payment as unjustified, unnecessary, and a raid upon the public treasury by the wicked farmers.

When the Wheat Contract was first negotiated, the western farmer anticipating depression following the war, agreed to accept less than the current world price, in return for stability in the post war period.

In the contract, it was agreed that in determining the price of the 45-49 and 49-50 crops that the fact that wheat had been sold in the two previous years at less than world prices would be taken into consideration.

Britain, apparently felt, however, that as the price had continued at a reasonably strong level the wheat grower should not expect any consideration for losses sustained in the first two years of the Contract.

Opponents of the Contract system of selling have stated that the western farmer lost up to 600 million dollars by not receiving world prices. Should this be so, the 65 million he actually gets does not appear to be unduly generous for his contribution in nourishing the old land and stabilizing wheat prices.

If such a course of action had not been followed the Canadian taxpayer could easily have paid much greater amounts for domestic requirements.

Success Tip—Bake it with MAGIC!

DATE-ORANGE PURDING

Combine in a greased casserole (6-cup size) 1/2 c. corn syrup, 1 lb. grated lemon rind and 3/4 c. orange juice. Mix and sift once, then sift into a bowl, 1 1/2 c. once-sifted pastry flour (or 1 1/4 c. once-sifted hard-wheat flour), 2 1/2 tsp. Magic Baking Powder, 1/2 tsp. salt and 1/2 c. fine granulated sugar. Mix in 1/2 c. corn flakes, slightly crushed, and 1/2 c. cut-up pitted dates. Combine 1 well-beaten egg, 1/2 c. milk, 1/4 tsp. vanilla and 3 tb. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into prepared dish. Bake in moderately hot oven, 375°, about 40 minutes. Serve warm, with pouring cream. Yield—6 servings.

bus. Nothing moving at Elmira or Murray Harbour.

Livestock

Livestock prices on hogs and sows were down in Moncton in line with Montreal, while all other livestock prices remained steady.

Montreal prices at March 5th showed the trend strong with choice steers 34.00; good 32.00-33.00. Good cows 25.00-26.50. Good bulls 26.00-29.00. Veal was also higher and hogs steaded at 33.75 for A's; sows 28.00.

In response to anticipated Easter trade local prices have gone up to rather unusual heights for choice steers. The Fat Stock Show and Sale at Amqui realized sky high rates. The Grand Champion sold at 85c per pound; the Reserve at 75c and the balance at prices down to a low of 35c on the hoof. The average price per pound was 38.41c per pound. The average weight of steers was 788.46 pounds, and the average price received per steer was \$306.76. It is stated that a considerable block of animals is coming to Prince Edward Island.

The following is the market detail:

Hogs at Moncton: Grade A 33.75; B1 33.35; B2 32.00; No. 2 27.00 hot dressed weight delivered.

Hogs at Charlottetown: Grade A 32.75; B1 32.35. No. 1 sows 28.00; No. 2 25.00.

Cattle at Moncton: F.o.b. country points. Steers: Choice 29.00; good 28.00; medium 26.00; common 22.00 to 24.00. Heifers: Choice 28.50; good 27.50; medium 24.50; common 21.50 to 23.50. Cows: Good 23.25; medium 22.00; common 19.00; canners and cutters 15.00 to 18.75. Bulls: Good 23.00; medium 22.50; common 19.50.

Cattle at Charlottetown: Delivered to plant. Steers: Choice 28.50; good 27.00; medium 25.00; common 20.00 to 23.00. Heifers: Choice 27.50; good 26.50; medium 24.50; common 20.00 to 22.50. Cows: Good 23.00; medium 20.00; common 18.00; canners and cutters 16.00 to 18.00. Bulls: Good 23.00; medium 21.00; common 19.00.

Calves at Moncton: F.o.b. country points. Choice 28.00; good veal 26.00; medium 25.00; common 22.00; grassers 19.00 to 20.00.

Calves at Charlottetown: Delivered. Choice veal 27.50; medium 24.00; common 20.00; grassers 18.00.

Sheep at Moncton: F.o.b. Good 18.00; down to 8.00 for common. Rail Grade 36.00 for A grade.

Sheep at Charlottetown: Good and choice 15.00 alive. Rail Grade 36.00 Grade A up to 70 lbs.

Lambs at Moncton: F.o.b. Good and choice, alive, 27.50. Rail Grade 66.00 delivered for Grade A1.

Lambs at Charlottetown: Delivered, good and choice alive, 27.50. Rail Grade 66.00 Grade A.

Fertilizers

Prices from the Island Fertilizer Company, Ltd., are given per ton for this year and the price for the same material last year; also the amount of the change in price.

Ammonium Nitrate \$93.00; last year \$88.00. Up \$5.00 per ton.

Sulphate of Ammonia \$63.00; last year \$62.00. Up \$1.00 per ton.

Superphosphate (Granular) \$55; last year \$52.40. Up \$2.60 per ton.

Muriate of Potash \$64.00; last year \$67.00. Down \$3.00 per ton.

3-15-6—\$44.60; last year \$42.00. Up \$2.60 per ton.

3-15-6 (3% Borax)—\$47.50; last year \$45.00. Up \$2.50 per ton.

5-10-10—\$46.90; last year \$44.60. Up \$2.30 per ton.

5-10-15—\$49.00; last year \$47.20. Up \$1.80 per ton.

These prices are f.o.b. Charlottetown, and are subject to change. Prices all over Canada of fertilizers are higher and it is again urged that the more concentrated mixtures are the cheapest fertilizers. With cattle and hogs at present levels the problem of adequate livestock and feed supplies is of first importance.

Dairying

The price of butter advanced two cents on the Nova Scotia and New Brunswick markets during the past week. This is no doubt due to the shortage that is now appearing, not only in the Maritime, but throughout Canada as well.

Factory price is quoted at 61c f.o.b. Halifax with local jobbing 63c. The price of fresh made No. 1 solids on the Montreal market at present is 65 1/4c. Toronto fresh made 72c-73c. Board butter on both those markets remains unchanged at 57c.

A similar advance took place on New Brunswick markets which are quoting creameries to wholesalers, one and two pound flats, 61 1/2c; wholesale to retail stores, one and two pound flats, 63c. In sympathy with that of the other two provinces, the price of butter advanced on the Charlottetown market. Wholesale price is quoted at 62 1/2c f.o.b. Charlottetown, with local jobbing at 64c.

A shipment of New Zealand butter has arrived in Halifax and is being distributed. Our information is that Canada Packers Ltd., are to be the distributors for the Maritime Provinces but the usual procedure is followed in buying the butter; that is, application must be made to the Dairy Products Board but it is not necessary to forward the usual deposit. That will be sent direct to Canada Packers Ltd.

Production of butter for the week ending February 24th was 34,533 pounds compared with 46,516 pounds a year ago, a decrease of 11,983 pounds or approximately 25%. A similar decrease is registered for the provinces of Nova Scotia and New Brunswick.

Wool

Quite a few inquiries about wool have been received. All that can be said at present is that wool is still strong. Since the first of the year prices have passed the \$1.00 mark for fleeced wools and the market remains firm with only limited supplies of wool available. The Canadian Commercial Corporation, a Government body for the purchase of wools, has recently been set up for purchases for military contracts. This will include domestic wools as well as imported wools and should, if anything, tend to strengthen an already strong market.

Falpwoca

Large quantities of pulpwoca are being exported and it is estimated that 650 carloads or 11,000 cords have already gone out of the Province while other large quantities are being stock-piled for shipment by steamer. The cutting is pretty general throughout the Province and the prevailing price seems to be \$18.00 per cord. Some reports indicate, where competition is keen, that this price may have gone up 50c. There is nothing definite, however, in this respect.

Eggs

The production of eggs continues to increase. Quality is good and the market strong. Prices have risen up a bit since last week. Receipts across Canada are down a bit due, no doubt, to withdrawals for hatching purposes. There is no surplus at present for storage.

are quoting producers for ungraded eggs Grade A Large 45-8; AP & B 38-9. Graded and packed in new cases wholesalers are quoting fob station AL 50; AP & B 43. Wholesalers are quoting retailers for the graded pack AL 53; AP & B 46. Eggs are retailing to consumers AL 57-60; AP & B 49-50. It seems to me that some time ago the wholesale price to retail had only a spread of two cents, I wonder why this has been jumped to three cents. Lack of uniformity in the consumer trade is also being observed.

Feeds

The feed market continues strong. Some few lots of local mixed grain have been advertised but the price will compare with that of the imported product. No. 1 feed barley, bulk, carlot, is \$3.42 3-4 per cw.; No. 1 feed oats is \$3.11 1-2; No. 2 wheat is \$3.09 1-2. Middlings \$38.00; oatmeal is very scarce at \$5.28 per cwt., and apparently there is no Canadian oatmeal available. It is reported that there are approximately 7,000 cars of grain behind the orders at Fort William and it is difficult to get a car shipped out within thirty days. It then takes two weeks to reach destination.

Seed Grain

There is some seed grain still moving from Island points. Car loading at a Western point today at \$1.00 per bushel. Looks as if Commercial No. 1 oats will retail at \$5.00 and Certified at \$5.25 or better; barley approximately the same price and wheat will be around \$6.00. Red Clover will be around 50c or better for No. 1; Alsike approximately 60c; alfalfa 75c, and Ladino \$2.50. Timothy is around 19c or 20c. Good pressed hay is ranging at \$18.00 to \$20.00 per ton.

Warble Fly Campaign

The warble fly campaign is proceeding and 1600 pounds of control material have already been ordered. Several district organizations have been organized for the campaign. The cost in bulk of the powder will be fifty-cents per pound as against \$1.00 in packages and the cost per cow for two treatments will be approximately five cents. All our school districts should be organized for the fray.

Wool

Quite a few inquiries about wool have been received. All that can be said at present is that wool is still strong. Since the first of the year prices have passed the \$1.00 mark for fleeced wools and the market remains firm with only limited supplies of wool available. Lenten Meditations

THE INFLUENCE OF CHRIST (The London Times)

Self-sufficiency is an enemy of good manners. He who recognizes no need of another's help, and no obligation to man or God, loses in time the gift of courtesy. He regards it as an ornamental extra, and finds such extras unnecessary.

The peculiar ruthlessness of a totalitarian regime is, for example, based upon contempt of the littleness of ordinary men and women. Its protagonists may adopt faultless manners when occasion demands it; but these deceive only the few. Courtesy without respect is no courtesy at all.

The opposite of a self-sufficient man is a saint. He may indeed appear to be self-sufficient, un-moved by personal ill and affront, but this is because his sufficiency is of God. He is not conscious of his own saintliness; all he knows is that he is a man in need, whose need can be supplied by God alone, and in God's own way. The prayer is ever in his heart: "Lord, be merciful to me, a sinner."

One consequence of this is a wonderful graciousness; the saintly man appears to have time for everyone. Every man in need is forgiven by personal ill and affront, but this is because his sufficiency is of God. He is not conscious of his own saintliness; all he knows is that he is a man in need, whose need can be supplied by God alone, and in God's own way. The prayer is ever in his heart: "Lord, be merciful to me, a sinner."

One consequence of this is a wonderful graciousness; the saintly man appears to have time for everyone. Every man in need is forgiven by personal ill and affront, but this is because his sufficiency is of God. He is not conscious of his own saintliness; all he knows is that he is a man in need, whose need can be supplied by God alone, and in God's own way. The prayer is ever in his heart: "Lord, be merciful to me, a sinner."

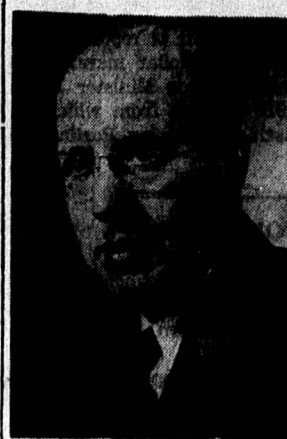

Understood in this way the prayer is but another version of St. Patrick's Breastplate: "Christ be with me, Christ within me, Christ behind me, Christ before me."

His need is great; God's power and will to meet that need is greater than he can ever imagine. For the man who knows himself to be a sinner no greater miracle is conceivable than that he should be forgiven.

The grace of God creates in men the graciousness of Christ. He has made us what we are," wrote Irenaeus, "that he might make us what he is himself." While human life endures, that remains God's unchanging objective and his incessant task. It is achieved through forgiveness. The man who knows himself forgiven is marked by a deep humility, for he also knows he has nothing which he has not received.

The debt he owes to God invites him to continue Christ's service to others. If he be a member of Christ's body he must go where Christ would go and do what he would do.

It is natural that the collect continues: "Make us continually to be given to all good works." That is what happens when God's grace goes before and follows a man; it is its inevitable consequence in action.

MELVIN McQUAID Souris

GORDON MacMILLAN Cornwall

J. A. GALLANT Summerside

Supporters of the Red Cross throughout the Province are again preparing for action in the campaign to raise \$33,000, the Province's quota in this nation-wide drive.

There is no other organization in the world that can compare with the universal work of mercy performed by the Red Cross or

receive the wholehearted support of the general public. The Red Cross gives help to the soldier on the Korean battlefield, and to the crippled child in some Island hamlet. Its work of mercy reaches far

and near, but never ends. At the present time, a great organization of canvassers are covering the urban and smaller centers. Heading the county organization as chairmen are Mr. Gordon Macmillan, Cornwall; for Queens; Mr. J. A. Gallant, Summerside; for Prince; and Mr. Melvin McQuaid of Souris and Mr. A. M. Smith of Montague for King's County.
