Commons Adopts Anti-Price-Fixing Bill

Young British Private Is Awarded The V.C. In Korea

TOKYO, Dec. 28 (CP) — A young British private today was named winner of the Victoria Cross for his almost single-handed fight against hordes of attacking Chinese in Korea last month.

The soldier, Pte. William Speakman, will receive the Commonwealth's highest award for valor Sunday from Maj.-Gen. A. J. H. Cassels, commander of the 1st Commonwealth Division.

It is the second V. C. won by a British soldier in Korea. The first was awarded posthumously last January to Maj. Kenneth Muir of the Argyll and Sutherland Highlanders.

Speakman, whose own unit is also the Argylls, is attached to the 1st Battalion of the King's Own Scottish Borderers.

He left the British base hospital at Kure, Japan, today and is flying to battalion headquarters in Korea where Gen. Cassels will pin the coveted decoration on his breast at a Sunday parade.

Speakman, whose home is in Altringham, Cheshire, won the V. C. for his action last Nov. 4 when 6,000 fanatical Chinese flung themselves on three companies of the Borderers.

The citation told how Speakman, with grenades and a machine gun, fought almost a one-man battle against the attacking Reds. His repeated charges against the Chinese, urging his comrades along with him, were said to have saved many British lives and were the major factor in the Borderers' success.

Maj. Muir's V.C. was awarded for his leadership Sept. 23, 1950, in the battle of Hill 282, when two companies of the Argylls were mistakenly attacked by United States planes.

The citation said Muir, 38, rallied a small force whose ammunition was dwindling and kept thousands of North Koreans at bay while wounded from the accidental bombing were evacuated.

Muir later died of his wounds. He was also awarded the Silver Star by the United States for the Hill 282 action.

CHICAGO, Dec. 28 (AP) — Dr. Dallas B. Pheasant, 69, outstanding in the development of modern concepts of surgical shock and also a noted bone pathologist, died today. He was a professor emeritus of surgery at the University of Chicago Medical School.

Claims Big Advance In Cancer Cure

LONDON, Dec. 28 (Reuters) — A big advance in the treatment of cancer with an extract from the human body called H. 11 was claimed here today by Dr. Gordon Ward of the Medical World, organ of Britain's Medical Practitioners' Union.

He said H. 11 was used "with a degree of success which is really astounding when one remembers that it has been employed solely for the treatment of cancer cases declared to be without any hope at all from any other sort of treatment."

"There are now records of many cases which have survived seven, eight or nine years after all hope from other measures had been abandoned."

James Henry Thompson, director of research at the Home Research Laboratories, Sunbury on Thames, who produced the H. 11 extract after 13 years' research, said today: "H. 11 is extracted from human urine. When a person stops growing he (or she) starts to excrete growth-inhibitory substances. It is these substances which we have extracted and called H. 11."

He said he had reasoned that these substances which checked normal growth might well check abnormal growths such as cancer. Experiments had borne this out.

Fire Destroys Gov't Building At St. Pierre

ST. PIERRE, ST. PIERRE AND MIQUELON, Dec. 28 (CP) — Fire tonight destroyed the French Government's treasury building in the capital of these colonial islands off the Newfoundland coast, causing damage estimated at \$35,000.

A spokesman said an unknown quantity of government records was lost.

The flash fire broke out at 7.15 p.m., EST, and was controlled three-quarters of an hour later. Firemen continued to patrol the ruins for hours after.

There were no injuries. Old-time residents of the capital said the blaze was the worst to strike the island capital since 1938.

Armistice Talks Remain Stalemated

MUNSAN, Korea, Dec. 29 (AP) — (Saturday) — (AP) — Korean armistice talks remained stalemated Friday on the issue of missing Allied prisoners and the Communist insistence on building and repairing airfields.

The only point of agreement — as usual — was for new sessions at Panmunjom at 11 a.m. (9 p.m. EST Friday).

Churchill Has Plans For 4-Day Visit To Ottawa

LONDON, Dec. 28 (Reuters) — Prime Minister Winston Churchill will spend four days in Ottawa during his trip to Canada and the United States next month.

Churchill announced his itinerary today, disclosing that he is taking along his top naval and military chiefs-of-staff.

The military men are Field Marshal Sir William Slim, chief of the Imperial General Staff, and Admiral of the Fleet Sir Rhoderick McGrigor, first sea Lord.

Churchill will fly from New York to Ottawa Jan. 11. On either Jan. 12 or Jan. 13, or both, he will hold talks with Prime Minister St. Laurent and members of the government.

He will speak at a state banquet in Ottawa Jan. 14 and will return by air to Washington Jan. 15 to resume the Washington part of the trip.

He will be accompanied by Foreign Secretary Anthony Eden, Lord Ismay, commonwealth relations secretary and Lord Cherwell, paymaster-general and Churchill's atomic expert. However, only Lord Ismay is expected to go to Ottawa with Churchill.

The Prime Minister will have a final cabinet meeting tomorrow before leaving London by train for Southampton where he will board the Queen Mary.

Conservatives Call Halt To Opposition

OTTAWA, Dec. 28 (CP) — The Commons tonight adopted the Government's contentious anti-price-fixing bill after defeating one last attempt by the Progressive Conservatives to have the legislation shelved.

Shortly before adjournment, George Drew, Progressive Conservative leader, announced that his party was calling a halt to its seven-day battle against the measure. It was evident, he said, that his party would have to bow to the weight of the government majority.

As a final attempt to get the House to reject what he described as an "ill-considered" measure, he moved that the legislation be given third reading six months hence. That technical device is used in efforts to kill government legislation.

His motion was defeated by a vote of 111 to 27, with the Progressive Conservatives winning support only from J. L. Gibson (Ind-Comox-Alberni). The Liberals, C.C.F. and Social Credit members voted against the motion.

A second division was called by the Progressive Conservatives on third reading of the bill. The measure, which now goes to the Senate for three readings and royal assent, was adopted also by a vote of 111 to 27.

The legislation will prohibit manufacturers from fixing the retail selling prices of their products. The Progressive Conservatives argued that the predatory price-cutting which may result from the prohibition will put many small merchants out of business to the advantage of the big firms.

The measure proved to be the most contentious of the special fall session. A number of pieces of legislation still must be dealt with before prorogation, which may come tomorrow or early next week.

As the debate on the price measure moved to a close, Mr. Drew said it was obvious that no advantage could be gained by further discussion.

While the legislation was under study by the House in committee of the whole, said Mr. Drew, Justice Minister Garson had contradicted himself time after time. The Minister had shown that the Government had not considered the measure adequately.

At one point, he continued, Mr. Garson had said the legislation would harm no one; at another he said it was a stern measure that would be used again wrongdoers.

There was no reply from cabinet benches to Mr. Drew's closing remarks.

Earlier, tempers flared as the legislation moved along its rocky passage through Parliament.

Steamer Stuck In St. Lawrence River

QUEBEC, Dec. 28 (CP) — The Canadian National Steamship Canadian Observer today was reported stuck in St. Lawrence River ice floes 250 miles east of Quebec.

A transport Department ice breaker is due to leave here to clear a channel for her.

After opening a way for the ship, the icebreaker will continue to Sept. lies harbor where the barge "Easton" awaits assistance to clear out of the ice-jammed waters.

Field Crops

Table with 6 columns: Crop, Area, Yield, Value, Area, Yield, Value. Rows include Wheat, Oats, Barley, Mixed, Grains, Buckwheat, Potatoes, Field Roots, Hay & Clover, Corn.

These figures indicate a substantially increased value of farm crops and products over that of 1950, but the volume of grain and of potatoes at the same time is very considerably below that of 1950, which leaves a position where more imported feeds will have to be purchased for normal livestock population.

Appointed Assistant Supervisor At Havana

Mr. E. M. Robinson, O.B.E., Manager of the Bank of Nova Scotia in Charlottetown, will be leaving the City at the end of January on transfer to Havana, Cuba. He will assume the post of Assistant Supervisor for the Cuban branch.

Mr. Robinson is no stranger to the West Indies, having served at the Santo Domingo branch for twenty years. A native of Marysville, N.B., he began his banking career at the Fredericton branch in 1922, and was transferred to the Dominican Republic in 1926, remaining there until 1946. In 1940, he was appointed Manager of the Santo Domingo branch.

The award of the O.B.E. was made to Mr. Robinson in 1946 in recognition for his services to the Ministry of Food of the British Government as representative and shipping agent for sugar in the Republic during the war years.

In 1946-47 he visited the countries of South and Central America as Special Representative of the Bank, prior to his appointment to the General Office at Toronto in 1947. He was the Manager of the Bloor-Spadina Branch in Toronto from 1949 until he came to this City in March, 1950.

Since coming to Charlottetown, Mr. Robinson has given wholehearted support to community activities, acting as chairman of the Special Names Committee in the Cancer Campaign for this year.

1951 One Of Finest Growing Years In P. E. Island History

By W. R. SHAW, (Deputy Minister of Agriculture)

It may be safely stated that the year 1951 was one of the finest growing years in our history. Favourable production circumstances, however, worked with opposite effects on farm economy. Pastures ranging into luxuriant growth earlier than usual and continued their lush condition without a break throughout the season until late Autumn. Dairy production, as a result, developed unusual vigor and with fewer producing dairy cattle on our farms the anticipated decrease in production levels was translated into the highest butter year in our records.

The season's production will end with about 5,100,000 pounds of butter, which is 10% higher than last year; and the cheese production will be 775,000 pounds, or 17% higher than in 1950. Favourable conditions for beef yields also added thousands of extra pounds of grass beef to our volume. As a matter of fact returns from beef production during the whole season

of 1951 were undoubtedly the most satisfactory in the annals of this Province.

Hay production was up, but quality was down, while grains increased in acreage were lower in both yield and quality, the wet season having caused some lodging and off-coloured grain which interfered more particularly with seed grades than with feeding qualities.

Potatoes were definitely down in acreage; as a matter of fact too low, and wet weather, blight and other difficulties combined to influence production to one of the lowest yields for many years.

Feed Grain Problem

The hog and poultry industries have all contracted slightly, while the sheep industry has expanded. But to complete the complexity of the situation the loudly heralded big Western grain crop, which should have been harvested last

(Continued on Page 9 Col. 1)

P.E.I. Farm Production

The following table, which has been furnished by Mr. W. R. Shaw, Deputy Minister of Agriculture, in connection with his year-end review of farm activities, is only an estimate at present but gives some idea of trends in production for the year.

Table with 6 columns: Crop, Area, Yield, Value, Area, Yield, Value. Rows include Wheat, Oats, Barley, Mixed, Grains, Buckwheat, Potatoes, Field Roots, Hay & Clover, Corn.

These figures indicate a substantially increased value of farm crops and products over that of 1950, but the volume of grain and of potatoes at the same time is very considerably below that of 1950, which leaves a position where more imported feeds will have to be purchased for normal livestock population.

Mr. E. M. Robinson

He was also the vice-president of the Charlottetown Board of Trade, a director of the Charlottetown Club, and a member of the Y.M.C.A., the Curling Club and the Golf Club.

His successor as manager of the local branch will be Mr. Chester R. Handring, a native of Newfoundland, who is at present a member of the staff at the General Office of the Bank in Toronto.

Orders Consulates In Cleveland, New York Closed

WASHINGTON, Dec. 28 (AP) — The United States State Department today banned American travel in Hungary, and ordered Hungarian consulates in Cleveland and New York closed.

Secretary of State Dean Acheson announced the action. It was in retaliation for Hungary's detention of the four U. S. Air Force fliers released today after the U. S. paid \$120,000 in fines.

In a statement, Acheson said: "The American people are rightfully indignant. Because we value the welfare of the individual above all else, we have paid the so-called 'fines'."

Patience Wearing Thin

He warned at the same time that "our patience is not inexhaustible."

Acheson charged also that the Communist Budapest regime has "ignored the basic rules of long-established international conduct."

"Repeated requests were made to the Hungarian authorities to permit American officials to visit the airmen," Acheson said. "No such access was allowed either before trial or subsequently when the request was renewed."

"In the circumstances, in view of the refusal of the Hungarian officials to exercise this normal right, which is basic to the extension of customary consular protection to American citizens abroad, the United States Government will no longer validate the passports of American citizens for travel in Hungary."

"Furthermore, since the reciprocal basis of the exchange of consular privileges has been nullified by Hungary, this government is also notifying the Hungarian legation in Washington that the Hungarian consulates in this country, which are located in Cleveland and New York, should be closed immediately."

Airmen Return To Base

ERDING AIR BASE, Germany, Dec. 28 (AP) — Four United States fliers shot down by the Soviet air force and held in Hungary for 40 days returned to their home base tonight. Their freedom was purchased by the U. S. Government for \$120,000.

The four men stepped, haggard but jubilant, from a C-47 transport which had brought them from Tulin Airport, near Vienna. It was a twin to their old transport, valued at \$97,500, which the Communist Hungarian Government had confiscated after it was forced down in Hungary Nov. 19.

Mrs. David Henderson and Mrs. Jess Duff flung themselves into the arms of their husbands, two of the four fliers once feared dead from Communist anti-aircraft fire. Capt. Henderson's three young children danced with joy.

Officials declined to permit the four released men to speak to reporters here immediately, but scheduled a press conference for tomorrow afternoon.

Coal Prices In Britain Advance On Jan. 1

LONDON, Dec. 28 (Reuters) — The British cost of living received another upward push today when the National Coal Board announced an average rise of seven shillings and eightpence a ton in the price of coal. Coal will cost about \$16.50 a ton after Jan. 1.

SAINT JOHN, N. B., Dec. 28 — The new Saint John airport will be opened officially Jan. 8 and may be in use by Trans-Canada Airlines as early as New Year's day, officials said today. Transfer of T. C. A. operations from P. E. I. will bring these services 31 miles closer to the city.

N. S. Poultry Industry Threatened By Disease

HALIFAX, Dec. 28 (CP) — Nova Scotia's \$10,000,000 poultry industry is threatened by Newcastle disease and Federal experts are trying to find a remedy, an agricultural official said here tonight.

John Proudfoot, a prominent New Glasgow chicken farmer, said earlier today that bad vaccine from Dominion Government laboratories at Ottawa is responsible for bringing the disease into the Province.

The disease now has affected about one-third of breeder stock in the central and northern sections of the province. More than 13,000 birds were destroyed and an additional 12,000 have been placed under quarantine. Some 7,000 hens were lost on the Proudfoot farm alone.

The official said the disease struck the province only once before in 1949 and the mild epidemic was eliminated quickly. He confirmed that the current sickness developed in flocks recently vaccinated.

Symptoms are a mild cold and sneezing in the early stages, followed by nervous disorders and a drop-off in egg production. There had been no spread evident in the last 10 days and the disease seems to be confined.

It struck heaviest in Pictou County, which markets its eggs mostly in Cape Breton and Northern Nova Scotia.

Only remedy is de-population of the flock, the official said. Farmers were hoping that the Federal Agriculture Department's "slaughter and compensation" policy would be offered.

Montreal Flood Slowly Recedes

MONTREAL, Dec. 28 (CP) — Dynamite today failed to clear the ice-choked Riviere des Prairies.

An expert said bombing from the air seemed the only solution left to clear 2,000,000 tons of ice jamming the river.

Meanwhile, flood-weary residents of three Montreal suburbs saw relief only in the fact that water is gradually receding. Engineers set off seven blasts during the afternoon but the ice refused to budge.

TRURO, N.S., Dec. 28 (CP) — A faulty connection in a set of Christmas tree lights today started a fire in an apartment building which caused \$5,000 damage.

The tree burst into flames when an occupant, Harry Brown, snapped the light switch.

Brown's cat, burned to death, was the only casualty.

"Around The Corner" Shooting Gun!

DETROIT, Dec. 28 (AP) — The United States army has perfected a sub-machine-gun that shoots around corners.

Joseph C. Soma, project engineer at the Detroit arsenal, says the curved barrel is more accurate than a straight one.

Sights are secret, but the gun shoots a .45 calibre slug that can be deflected as much as 90 degrees and will pierce an inch-thick pine board at 100 yards. It will fire 450 rounds a minute.

The around-the-corner gun is made by attaching a curved barrel to the army's M-3 sub-machine-gun.

The barrel can be set to fire left or right, up or down.

Tank crews in Korea asked for such a gun to shoot Communists off the tops of tanks.

OTTAWA, Dec. 28 (CP) — Canada will have a strong demand for labor in 1952, though there may be "spotty" unemployment throughout the year, Labor Minister Gregg predicted today.

In his annual New Year statement, the Minister said it is likely the main characteristics of the 1951 labor picture will carry into next year as defence industries speed up.

In a simultaneous new year message, President Percy R. Boughoff of the Trades and Labor Congress of Canada was critical of the government for not stemming recent unemployment and for permitting continued winter immigration without enough jobs available.

Lewis Blames Mine Management For Explosion

BENTON, Ill., Dec. 28 (AP) — John L. Lewis today blamed the mine management for the blast which took 119 lives in Orient Mine No. 2 near West Frankfort last Friday.

The United Mine Workers' president, in an interview, said the Chicago, Wilmington and Franklin Coal Company knew three to five days before the explosion that the mine was dangerous.

With a voice shaking with emotion, Lewis said: "Great events cast their shadows before them, and so do mine explosions."

The tunnels in the mine were "squeezing" at least three days before the blast, he said.

"Squeezing," Lewis explained, is the shifting of earth around tunnel-ways. That process leaves large quantities of methane gas from the coal seams, he added.

Investigators have agreed that methane gas caused the blast.

The management knew of this "squeezing," Lewis said, and should have closed the mine to clean out the gas before permitting further work.

Most of the women who cry at weddings have been married themselves!

HALIFAX, Dec. 28 (CP) — Official forecasts issued by the Dominion Public Weather Office at Halifax tonight and valid until midnight Saturday.

Synopsis: The weather is fine and extremely cold in most of the forecast district. A disturbance over the Great Lakes is moving eastward and will cross the district tomorrow, causing a light snowfall changing to rain in the southwestern regions. Less than three inches of snow is expected.

On Sunday colder air will return to the district, accompanied by snowflurries.

Regional Forecasts: Prince Edward Island: Clear with a few cloudy intervals and widely scattered snowflurries tonight. Saturday overcast, snow beginning in the morning and ending in the afternoon. Much milder Sunday. Light winds tonight. Saturday southeast 20 becoming southwest in the afternoon. Low tonight and high Saturday at Charlottetown zero and 25.

Outlook for Sunday: Snowflurries. High tide today at 11:56 A. M. and 10:57 P. M. Sun rises today at 7:51 A. M. and sets at 4:39 P. M.

MCA AIR SERVICE DAILY EXCEPT SUNDAY
