panied by the following considerate and mild qualifications, which conclude the manifesto:

"It is distinctly understood that should the reply of Prince Gortschakoff be negative, the Russian agents are to quit the Ottoman States, and that the commercial relations of the respective subjects of the two governments shall be broken off.

At the same time the Sublime Porte will not consider it just to lay an embargo upon Russian merchant vessels, as has been the practice. Consequently they will be warned to resort either to the Black Sea or to the Mediterranean Sea, as they shall think fit, within a term that shall hereafter be fixed. Moreover, the Ottoman government, being unwilling to place hindrances in the way of commercial intercourse between the subjects of friendly powers, will during the war, leave the Straits open to their mercantile marine."

THE JAPAN SQUADRON.

We find in the Washington *Union* an interesting extract from a despatch from Commodore Perry, dated Napa Island off Loo Choo, June 25, 1853.

EXTRACTS FROM THE ROUGH JOURNAL OF COM. PERRY.

The Bonin islands extend in a direction nearly north and south, between the latitudes of 26 deg. 30 min. and 27 deg. 45 min. north—the centre line of the group being in longitude about 142 deg. 15 min. east.

The islands are evidently volcanic, the internal fires being still at work, as Mr. Savory, the oldest surviving settler on the Island, informed me that they experienced two or three tremblings of the earth every year.

The islands, headlands, and detached rocks, present the most grotesque forms exhibiting the appearances of castles, towers, animals, and almost every hideous thing conceivable to the imagination.

I know of no part of the world which can offer greater interest to the researches of the geologist than these islands present.

Port Lloyd is situated on the western side, and nearly in the centre of Pell Island. It is easy of ingress and egress, and may be considered a safe and commodious harbour, that of deep anchorage in from 18 to 22 fathoms.

The safest anchorage is to be obtained as high up the harbour as a ship can convenientely go, having regard to depth, and room for swinging and veering cable.—Strangers can easily discover by examination the proper position to which they can warp their ships.

Wood and water can be obtained in abundance. The water is obtained from running streams, and is of good quality.

The few settlers still remaining on Peel Island—the other Islands being uninhabited—raise considerable quantities of sweet potatoes, indian corn, onions and a few fruits, the most abundant of which are water-melons, bananas, and pine apples; a few pigs and some poultry are also raised. For these they find ready sale to the whale ships constantly touching at this port for water and other supplies. During the four days we were at anchor at Port Lloyd, three whalemen, two Americans and one English, communicated by means of their boats with the settlement, and carried away many supplies, procured generally in exchange for articles, of which ardent spirits are the most acceptable to many of the settlers.

Were it not for the scarcity of working hands, a much greater extent of land would be cultivated. At present there cannot be more than 150 acres under cultivation in the whole island, and this in detached spots, generally at the seaward termination of ravines furnishing fresh water, or upon plateus of land near the harbor.

The soil is of excellent quality for cultivation, very much resembling that of Maderia and the Canary Islands, (the latter being in the same parallel of latitude,) and consequently is admirably adapted for the cultivation of the vine, and of wheat, tobacco, sugar cane, and many other valuable plants. Of sugar and tobacco the settlers already cultivate enough for their own consumption.

Timber for building purposes is rather scarce, and would soon be exhausted if any increase of population were to call for the erection of many buildings. The best kind are the tamana and the wild Mulberry. The former is similar to the red wood of Brazil and Mexico, and is very enduring.

I caused the island to be thoroughly explored by two parties of officers, and their reports will be duly filled with other similar papers. The masters of this ship and the *Saratoga* also surveyed the harbour.

The scarcity of sea and land birds has been noticed by every one as singular, not more than five or six varieties of land birds have been seen.

Of quadrupeds we may enumeratehogs, goats, deer, bullocks, and sheep, with any number of cats and dogs.

The harbor of Port Lloyd and the neighboring water, abound with excellent fish, which may be taken with the hook or seine, though the places for hauling seine are few, owing to the coral which in many parts lines the shores.

Of edible shell fish there are none, that I could learn, excepting the chame gigas, (tridacne,) which must be very tough and indigestible.

The waters of the Bonin islands furnish abundance of crawfish, as also green turtle, of which we obtained a good supply.

According to Kempfer, these islands known to the Japanese as early as 1675, and they described them under the name of Bune Sima, and as abounding with fish and crabs, some of which were from four to six feet long. From the description of the crabs, I am led to believe that they mistook the enormous green turtle, which are so common here, for crabs. Other accounts give a much earlier date for the discovery of these islands by the Japanese.

THE PACIFIC RAILROAD.—The Washington correspondent of the New York Courier and Enquirer, who pretends to lay out the doctrines of the next President's message, says "the proposition to connect the Atlantic with the Pacific coasts by a great national railroad will be discussed, but the President will state his conviction that sound policy requires it to be left to the individual energies and the private capital of the country."

The Steamer Ohio, from Aspinwall arrived at New York, on the 28th. She had $ 928,000 in specie in freight, and $ 200,000 in the hands of passengers.

A private letter from San Francisco states positively that an expedition for taking forcible possession of Sonora is already organized in that city, under the lead of Wm. Walker, formerly of the San Francisco *Herald*, and Col. Watkins.

Two hundred men are already recruited for the expedition who were expected to proceed by sea in a fortnight. The leaders are all Southern men, and the design is to make Sonora a slave territory, under the name of the Republic of Sonora.

The constitution has already been drafted, and bonds issued in the name of the republic.

The eighteen deserters from the United States frigate Columbus had been arrested on the Mosquito coast, where they had been creating a disturbance, and were to be carried to Aspinwall in irons.

The New Light House on the east end of Pictou Island is now nearly completed, and will, in all probability be lighted in two or three weeks. We understand that William Hogg has been appointed keeper of this light. The propriety of this appointment was some time since called in question by an individual hailing from New Glasgow, in a letter which appeared in one of the Halifax papers, on the ground that other applicants, whose claims were superior, had been unfairly dealt with. We cannot speak as to the claims that any individual may have upon the government for favors, but we believe that a more trustworthy person than Mr. Hogg, could not have been selected for the situation.—*Eastern Chronicle.*

The stern part of the wreck of the *Fairy Queen*, has broken from the machinery by which it was held to the bottom, and has drifted down the coast. On Saturday, a man from Merigomish stated that on the day previous he and another person had boarded the wreck, as it was drifting at a distance of about two miles from the shore, and that they had discovered under it, the body of a man, but in a position where it could not be reached by them; a part of the body only was visible, but they observed that it was dressed in plaid trowsers. It is believed that this must be the body of Doctor McKenzie, as he was the only person on board who wore plaid clothing. We have heard that the wreck has drifted ashore at Malignant Cove, County of Sydney. The other part of the wreck has been towed ashore at Little Harbor.—*Pictou Chronicle.*

☞ JAMES MURRY was committed by Theo. Debrisay, Esq., for stealing a £7 New Brunswick Note from Mr. David Sullivan.

Birth,

On the 9th Inst. the wife of Com. Orlebar R. N. of a son.

Farm to be Let.

The Wonder of the World!
Devines' Compound Pitch Lozenge.

THE Great Remedy is at last discovered, and COUGHS, COLDS, ASTHMA. COSTIVENESS AND CONSUMPTION have lost their terror, and vanish as as if by magic before this Sovereign remedy. Was it ever before known that, *Hopeless cases of Consumption were crred for less than $5?*

Truly, if any individual is to be pitied, and needs sympathy, it is the consumptive,—always expecting to get well, and yet the painful evidence of decay almost "makes the inner soul shrink with the outer flesh."

"Some bloom as roses bloom,
And live as roses live,
A single morning space!"

While others, in more mature life,—by some imprudence and a slight cold neglected,—in the hectic flush, the painful cough,
"The prints of their parting steps appear."

All we ask is this one question:—If you have got mucous membranes, or any other members of the body that are "heirs to ills."—are you not interested n this *great remedy*, DEVINES' COMPOUND PITCH LOZENGE

Sold by W. R. WATSON and T. DESBRIASY & Co.,at APOTHECARIES' HALL.

Tailoring Establishment.

JAMES M'LEOD, TAILOR AND HABIT MAKER, respectfully intimates to the Gentlemen of Charlottetown, and his numerous friends in town and country, that he carries on the above business in all its branches, at the corner of QUEEN and KENT STREETS, nearly opposite the residence of DR. POTTS, where all orders in his line will be thankfully received, and attended to with punctuality.

Having had considerable experience in his business, he takes this opportunity of challenging competion, and feels confident of giving satisfaction to all who myy favor him with their patronage.

N. B. Two Journeymen and an Apprentice Boy wanted immediately.

November 3, 1853.

I do certify that JAMES McLEOD has for many years been employed by me, and he has obtained his knowledge from me in the cutting and making up of garments; I can, and do, therefore, recommend him to the public as the very best cutter and workman in his branch.
