

**We are lucky --**

Ninety per cent of the prescriptions being filled today could not have been dispensed ten years ago. The drugs prescribed were, at that time, unknown or unproved. Your prescription dollar is worth more today . . . it buys more drugs that cure, rather than just relieve.

**For Your Health's Sake--Visit Your Doctor & Your Pharmacist**

Your pharmacy has raised its prices less in proportion to the general increase cost of living than any other merchant with whom you deal. The cost of a physician's call is no greater than that of a plumber or an electrician. The cost of medicine he prescribes is no higher than the cost of a valve, a faucet or an electric outlet.

--- give your human machine  
the same consideration ---

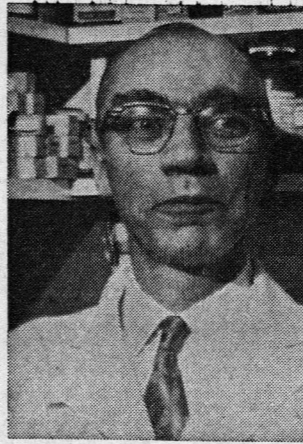

# When was the last time your doctor gave you a complete Physical Examination ?

Was it a year ago? If so, its time for another right now. If it has been eighteen months or two years, call your doctor in the morning! And there are people who are reading this message who have not had a thorough physical for years. This poor judgment is often shown by many people who are regularly smart and discerning on other important matters. Most people take excellent care of their automobiles, pets and homes but neglect their most important possession, their human body.

There is nothing seriously wrong with most people but it is just common sense to MAKE SURE. Prince Edward Island is blessed with a large number of excellent doctors of medicine. It is not difficult to make an appointment for an examination. The examination does not take long, and it is inexpensive. Furthermore, it may discover something that needs attention to give you a longer, happier and healthier life. If you are not acquainted with Prince Edward Island doctors, the pharmacists below will be happy to recommend one.

Everyone has a Good Car Checked Regularly ---

*These Prince Edward Island Drug Stores Are Highly Qualified to Fill Your Doctor's Prescription Efficiently, Economically*
