Miraculous Escape

In Guernsey, 17 passengers of a British European Airways airliner had a miraculous escape when a sudden 45-mile-an-hour gust of wind blew the twin-engine plane into a hedge just as it was about to land. The nose of the plane plowed into the ground and passengers crawled out of the tail door. But as the wind died down and the glass rose, the outlook along England's west coast was improving with rainstorms slowly passing eastwards over Europe.

Is Critical Rev. H. L. Henderson, mayor of Portage la Prairie, attacked the draft as "the weakest document" the federation had ever produced. (Mr. Henderson is a native of P. E. I.) Only large cities stood to gain from ending the exemption of crown property, and not many cities would be affected if municipalities were exempted from paying federal sales tax. Mayor Henderson called for a federal municipal provincial conference to "rewrite the charter of municipal government in Canada." At present, he said, Ottawa taxed the wealthy and "leaves only the poor man to die."

Says Price of Gold Should Be Increased SEATTLE, (CP)—V.C. Wansbrough of the Canadian Metal Mining Association said Tuesday that "the price of gold can, should and must be raised."

Not Predicting Recession The Trade and Commerce official was not predicting a recession, however, if one were to come originating in the United States for example, there would seem to be no reason to regard it as anything more than "a pause in the forward march of economic progress."

United States policy would be largely affected by recommendations from the congress he was addressing. He said that in the Canadian view "the time is not ripe for urging a return to the full gold coin standard. But that is no reason why private citizens should not purchase and own gold if they want to—and many appear to want to very much and in substantial quantity."

Foreign holders of gold who wish to store it in Canada should receive assurance, which they lack now, that they could be permitted to export it when they wished.
