TECHNICAL TALK

CHINGFORD, England, (CP)—The Walthamstow and Chingford Chess Club is sold on chess by telephone. The club engaged a telephone line for four hours for a match against Southend at a cost of 32 shillings. It would have cost the players three times as much for rail fares for an ordinary match.

Let's Talk It Over

The thriving little town of Summerside is well abreast of the times in most aspects of modern living. In many branches of athletic endeavour its citizens have taken a prominent part, and have brought honor to the town by their achievements. The business life of the town is progressive and up-to-date. Music has held a high place in its cultural pursuits, particularly in recent months. Community concerts are coming back after a lapse of a few years, and music is becoming increasingly important in the schools.

In one phase of cultural activity, however, we are strangely below the norm. Our activities in the realm of drama are at best spasmodic and disorganized. At one time the Little Theatre group was active here, and had gained a certain degree of success. But while Charlottetown Theatians, who were organized about the time of the war, were active in the drama flickered and died in Summerside, due partly to the fact that some of the leading spirits of the movement no longer had time to devote to the drama, or had moved away from the town.

The Little Theatre has never been revived though we still have in our midst a group of the original Little Theatre members, whose experience would be invaluable if an attempt were made to bring the movement back to Summerside. We venture to predict that we have plenty of talent awaiting development here.

We have reason to believe that some of the leaders of drama outside our precincts would be glad to pay us a visit and help reorganize this very worthwhile cultural activity if we expressed a desire for such assistance. Even taking into consideration the number of our citizens who during the winter months devote their leisure hours to curling, bowling, skating, bridge and attending the cinema, there should be in a town the size of Summerside a group of adults who would welcome a chance to participate in such a profitable and pleasurable activity as the Little Theatre movement.

With her advisor, a handsome sikh, and an American big-game hunter whose previous expedition had failed, she heads a trek into the deepest and most dangerous reaches of the jungle, seeking the cause of the stampedes. Under stress of encounters with savage animals and other jungle hazards, the two men become natural rivals for the princess and their strained emotions finally explode in a death duel.
