CURRENCIES

MONTREAL (CP) — The United States dollar in terms of Canadian funds was up 1-32 at $1.08 5-16.

Pound sterling was up 1-16 at $3.03⅛.

NEW YORK

NEW YORK (AP) — Casting a vote of confidence in the future of the market and the economy after the important Labor Day milestone, the stock market staged a late rally Friday which put the Dow Jones industrial average at its peak for 1963.

Topping its previous closing high this year of 726.96 reached May 21, the average advanced 2.92 to 729.32.

To Wall Street specialists this was a highly important development. Some of them now believe that the way is cleared for a vigorous attack on the historic closing high of 734.91 reached by the Dow Dec. 13, 1961. If this is surpassed it will bring a lot of "the public," back into the market, many analysts believe.

Motors, the heroes of the 1963 advance, led a late rally in Friday's previously irregular market. Airlines were strong most of the day. So were some electronic and data-processing issues which gained several points.

The Associated Press average of 60 stocks advanced .7 to 279.6, the latest in its series of historic highs.

Volume was 4,570,000,000 shares compared with 5,110,000 Thursday.

Sperry Rand, for the second straight day, was the most active stock, rising ⅜ to 15¾ on 181,400 shares.

Among Canadian issues traded, Aluminium Ltd. gained ⅛, Canadian Pacific ½, International Nickel ⅜ and Walker Gooderham ¾. Distillers Seagrams and Granby Mining fell ¼, Dome Mines ⅛ and McIntyre Porcupine ⅜.

Prices on the American Exchange were generally higher. Brazilian Traction lost ⅛, Preston gained ¼, Fargo Oil 7-16 and Jupiter Corp. ⅛.

Failure Reported To Bridge Gap Scientist-Public

CALGARY (CP) — Canadian newspapers have failed to bridge the communications gap between the scientist and the public, a chemist said Thursday.

Dr. W. G. Schneider of Ottawa, director of the division of pure chemistry with the National Research Council, is attending a two - day scientific symposium at the University of Alberta's Calgary campus.

In an interview he said that Canadian newspapers have failed to develop qualified science writers who can interpret the work of the scientist to the general public.

"It is a shame that science is still thought of as an ivory tower. It shouldn't be set apart," he said. "The work of the scientist will eventually have a direct effect on the public and people should have some knowledge of it."

IGNORE MOST FIELDS

Dr. Schneider criticized the press for concentrating on subjects such as nuclear physics and space research and virtually ignoring the vast body of other scientific work.

He said it is unhealthy in a democracy with increasing public expenditures on science that the public be uninformed and there is a danger of a scientific dictatorship developing.

"Undoubtedly scientists partly to blame for the lack information," Dr. Schneider said. "They find it easier to write for technical journals than to communicate with the press."

More than 100 chemists from Canada, the U.S., Britain, France, Switzerland and Australia are attending the symposium.
