Powerful Nuclear Blast Reported

WASHINGTON (AP)—A powerful underground nuclear test blast was set off Wednesday at the U.S. Atomic Energy Commission's Nevada test site.

A brief AEC announcement gave only a vague indication of its force, saying it was of intermediate yield. That means a force of somewhere between 20,000 and 1,000,000 tons of TNT.

The blast, one of a series for weapons development, is the 17th of that type set off in Nevada this year.

Gigantic Resources Pool Urged For Canada And U.S.

By HAROLD MORRISON

WASHINGTON (CP) — U.S. Interior Secretary Stewart Udall has suggested Canda and the United States create a gigantic pool of their resources and exploit them in cross-border trade on the basis of achieving maximum production efficiency at lowest costs.

He said this concept which he described as having "quite a bit of support" in the U.S. administration could be applied to the flow of Canadian-U.S. trade in hydro and nuclear power as well as coal and petroleum products.

Without elaborating on how this pooling arrangement could be operated, Udall told reporters "we are moving in that direction" in cross-border negotiations on the Columbia River power treaty under which the Canadian share of power benefits would be sold in the U.S.

Though some progress has been made in resolving Canadian-U.S. differences on the Columbia treaty, Udall said at a press conference that tne price problem remains to be resolved. It was the only big issue remaining that had not been settled.

The U.S., in this field, was acting as a "broker" between the potential U.S. buyers of Canada's power share and the seller, the British Columbia government. Udall noted that Premier W. A. C. Bennet has demanded five mills a kilowatt hour for the Canadian power share. This the buyers have refused to pay.

He gave no indication when a final agreement may be reached. Other officials suggested that another Canadian-U.S. policy negotiating conference, which had been tentatively planned for early October, may not take place for another month. It appeared that Bennett was standing fast on his price demands and no compromise had emerged.

PLAN COAL TALKS

Udall touched on his pooling proposal in announcing a Nov. 28 coal conference to seek ways of expanding U.S. coal exports.

In a separate occurrence, the commerce department said in a world trade report that a rise in U.S. coal exports to Canada coincided with unprecedented Canadian steel production.

Asked how the U.S. hoped to press for greater foreign purchases of U.S. goods if the U.S. did not also encourage greater foreign industrial production—such as automobile production in Canada—Udall said he believed the answer to some Canadian-U.S. trade problems, including those creating tensions, was in pooling of resources.

In the case of coal, the Canadian government was subsidizing coal production in Nova Scotia. The U.S. was producing coal more efficiently and at lower costs. Resources should be exploited where they could be produced more efficiently and distributed to the two countries on the basis of their costs and attainability.

Udall suggested some similar idea had been advanced by Trade Minister Mitchell Sharp who has called for a joint Canadian-U.S. study of continental resources and detailing an inventory of longterm needs. A joint ministerial conference agreed last month to establish a working group to prepare the way for technical studies.

Case Of Missing Evidence Piles Mystery Upon Mystery

By CARL MOLLINS

TORONTO (CP) — Mystery mounted upon official mystery here in the curious case of the missing evidence from the 1960 Ontario government investigation into a financial muddle at Eastview, an Ottawa suburb.

Municipal Affairs Minister J. W. Spooner called a press conference and announced that the missing evidence has been resurrected from original shorthand notes taken at the inquiry.

However, he said he had no explanation for the fact that sometime between the fall of 1960 and last Aug. 15 volume 15 of the 19-volume transcript of evidence had disappeared from three separate sets of the transcript — in his office, in the attorney - general's department and in Eastview.

Volume 15 contained the main testimony of Gordon Lavergne, mayor of Eastview from 1948 until 1960 and Conservative member of the Ontario legislature for Russell from 1954 until his defeat in last month's provincial election. The Ontario Conservative party dumped Mr. Lavergne as their candidate in Russell but he ran Sept. 25 anyway with the support of some local Conservatives.

SAY REPORT DIFFERENT

Mr. Spooner was questioned also about evidence presented by the opposition Liberal party that the published government report on Eastview differed from an original draft, notably in deleting unflattering comment about Mr. Lavergne.

Mr. Spooner said he could not explain that and stood by previous statements that the published document was the only one his office had received bearing signatures of the investigators.

The disappearance was discovered Aug. 15 when Ottawa lawyer John Nelligan, an investigator for Eastview, applied for permission to look at the transcripts.

Mr. Spooner said he launched inquiries following the election Sept. 25 and found shorthand notes of Eastview inquiry testimony were available from a firm of court reporters in Ottawa.

He obtained two copies of transcript to replace volume 15, one for his own office and one which was mailed to Eastview.

The Eastview inquiry resulted in the prosecution of Mrs. Adrienne Laroche, Eastview treasurer. She was sentenced in February, 1962, to nine months in reformatory for theft by conversion of $10,790 of Eastview funds. She was subsequently granted a retrial and the Crown now is appealing that decision.

Americans Not Optimistic Over Trade With Canada

By HAROLD MORRISON

WASHINGTON (CP) — The U. C. Commerce department says that Canada's earnings from its huge wheat sales to the Soviet Union normally might provide a bigger Canadian market for American goods, but the outlook isn't good, partly because of restrictive elements in the Canadian economy.

"A number of economic factors are unfavorable to expanding U.S. exports to Canada," says Victor McNabb, chief analyst for the department's office of international regional economics.

"Although economic activity in Canada has been increasing, there are some indications that the advance may have levelled off. Foreign exchange holdings are high but have declined recently. The Canadian securities market has been depressed, possibly influenced by the slackening in the inflow of capital.

"The currency depreciation, beginning in 1961, has damaged the competitive position of many U.S. commodities relative to Canadian products. No uptrend in U.S. exports has been observed since the remaining tariff surcharges were moved in April. These surcharges had been imposed in June 1962 to improve the foreign exchange position.

RESTRICT IMPORTS

"In addition, there may be a tendency for Canada to restrict imports as a means of reducing its trade deficit with the U.S.," added McNabb in a report on the world trade outlook published in the current issue of the department's international commerce magazine.

He estimated total U.S. exports to all countries edged ahead to a record annual rate of $21,470,000,000 in the first half of 1963, up two per cent from the first six months of 1962. But imports rose by three per cent to an annual rate of $16,620,000,000, reducing the commodity trade surplus to the annual rate of $4,850,000,000 from last year's $5,000,000,000.

In trade with Canada, U.S. exports rose just slightly to an annual rate of $3,969,000,000 in the January-June period from $3,913,000,000 a year ago while imports increased to a rate of $3,676,000,000 from $3,529,000,000.

This reduced the U.S. surplus in Canadian trade to an annual rate of $293,000,000 from $384,000,000 last year.

SENTENCED TO DEATH

DAMASCUS, Syria (AP) — A court martial Thursday convicted 10 supporters of President Gamal Abdel Nasser of the United Arab Republic on charges that they engineered a Syrian coup which failed three months ago. All were sentenced to death before firing squads.

CONTRACT BRIDGE

By B. JAY BECKER

QUIZ

Your right-hand opponent deals and bids One Diamond, both sides vulnerable. What would you now bid with each of the following five hands?

1. ♠A7 ♥A4 ♦8753 ♣A9542
2. ♠652 ♥AQ84 ♦9 ♣AKQ73
3. ♠AKQ853 ♥K962 ♦4 ♣AJ
4. ♠KJ6 ♥K92 ♦AQ3 ♣KQ84
5. ♠KQ842 ♥KJ963 ♦A7 ♣5

1. Pass. In determining whether to complete against an opening bid, the first consideration is the safety of the overcall. The number of tricks that can probably be taken is far more important than the number of high-card points.

Thus, this hand, despite 12 high-card points and the values for an opening bid, is not good enough to justify an overcall of two clubs. There is a reasonable chance that the next player might double, in which case a severe penalty could result. The best thing to do is pass and await developments.

2. Double. In general, a takeout double indicates at least the values for an opening bid, while an overcall shows less than the values for an opening bid. This hand is too good for an overcall of two clubs, and, furthermore, such a bid would imply lack of interest in the major suits. Partner may have sufficient heart or spade length to produce a game, and the best way to obtain this vital information is to double for takeout.

3. Double. Here, also, the best way to show the strength of the hand is to double. Although, on the surface, it would seem that spades should be trump, this is not necessarily true. Thus, partner might have a singleton spade and length in hearts, in which case hearts would be the better trump suit.

Usually, the doubler does not have an independent suit of his own, but, when he does, he is not barred from doubling if the circumstances indicate that that is the most effective way of showing his all-around values.

4. One notrump. The double is not used in this case because the notrump overcall in one brief stroke draws a far more accurate picture of the hand. It shows 16 to 18 points, notrump distribution and strength in all suits. A double would imply distributional features which are lacking. Partner responds as though the opening bid had been one notrump.

5. One spade. Even though there is ample strength for a takeout double, it is better to overcall with a spade. The reason is that precious ground could be lost by doubling and it might become impossible to show both suits later without going dangerously high. The rule about having less than an opening bid for an overcall in the one level sometimes has to be overlooked for strategic reasons.

DAILY CRYPTOQUOTE — Here's how to work it:

AXYDLBAAXR
is LONGFELLOW

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
