

**THE FIRE RUINS AT SUMMERSIDE**

A mass of twisted rubble is all that remains of what was formerly the MacArthur building in Summerside, where R. E. Ellis Insurance, the Summerside bureau of the Guardian-Patriot and Foleys Drug Store

and the J. and S. Clothing Store were located on the ground floor. The upstairs part of the building contained the offices of J. Watson MacNaught, lawyer, Dr. A. MacMurdo, dentist, Dr. H. T. Colvin, optician, the Gentlemen's Club and the A. A. Rooms. The photo was taken from Summer Street looking through the remains of the brick structure to Water Street.

Dr. Peter MacDonald, Crapaud, led a hymn sing before the group retired to the church for evening worship.

**Western Prince Baptist Laymen Have Organized**

At a supper meeting held Monday evening February 3rd forty men gathered in O'Leary United Baptist Church to organize a Laymen's group and link themselves with the Maritime Baptist Laymen's Association.

Mr. Ralph Adams, president of the P. E. I. Baptist Laymen's Executive chaired the meeting and introduced to the guest speaker, Reid Sangster, a prominent Baptist Layman from Guysborough Co. Nova Scotia who travels the Maritimes in Co-operative and Credit Union work.

Mr. Sangster spoke to the group on the place of men in the church. He stressed that a Laymen's Group was not another social club but an organized body of men in action for the cause of Christ.

After a hymn sing and discussion concerning the nature of a men's organization, Mr. Sangster showed the group scenic films of the Eastern Shore of Nova Scotia and the Cabot Trail.

**OFFICERS**  
The following slate of officers was appointed for the year 1958: Mr. Raynall McNeill, O'Leary, President; Mr. Ray Shaw, Springfield, Vice-president; Mr. Lawrence Harris, O'Leary, Secretary, Mr. William MacDonald, Springfield, Assistant-Secretary Mr. Emerson Smallman, O'Leary, Treasurer; Mr. Howard Dunbar, Alma, Assistant Secretary.

The supper was provided by the ladies of the O'Leary Church.

**Sprinkler System Touches Off Alarm In S'Side Theatre Fire**

A fire sprinkler system in the Capitol Theatre in Summerside is credited with preventing a major fire Saturday morning at 7:00 a.m. The fire originated among some sweepings and garbage from the theatre in a small storage room at the back of the building between the theatre and the Canadian Tire Corporation store. It was discovered by Summerside fireman George Peters and special police officer Edmund Doyle who were on duty at the scene of the Thursday's half million dollar fire on Water Street.

Hearing the automatic fire alarm at the theatre on Central Street, a block away from where they are on duty, the two men ran to the front of the theatre where the alarm continued to sound. While Mr. Peters rushed across the street to the Ideal Dairy to phone the theatre owner, Mr. Harold Gaudet, Mr. Doyle went to the back of the building where he

**MODERN CAPITAL**  
Ankara, capital of Turkey, has grown from a primitive town to a modern city of 450,000 inhabitants in 30 years.

could hear the sound of water spraying from the sprinkler system and observe water rushing out from underneath the doorway leading into the storage room between the theatre and the Canadian Tire store.

When the men entered the building they found the theatre garbage seepings had apparently been the location of the fire, which had spread to one of the asphalt covered walls. The heat from the fire had touched off two of the sprinkler heads which were located in this room, and it is believed that the water from the sprinkler system had extinguished the fire on the wall and would eventually put out the rest of the blaze in the garbage.

Mr. Gaudet, owner of the theatre, said the sprinkler system had in all probability prevented another major fire in the town because the blaze would likely have affected both the theatre and the adjoining store, which prior to the entry of the Canadian Tire Store, was the site of the Capitol Bowling Alleys.

now the fire might have originated that from 10:00 a.m. Friday morning — seventeen hours previous to the discovery of the fire — to his knowledge, nothing had been placed in the room where the fire originated.

He said that since he installed the sprinkler system in these buildings about ten years ago, the system had proved its effectiveness on about three different occasions.

The Summerside Fire Department responded to the alarm Saturday and anxious citizens and businessmen, conscious of the effects of the half million dollar fire in the business area only two days ago, were quick to check the location and extent of the danger of the alarm.

Only minor damage was done to the wall and floor where the fire originated but when the door between the inside part of the theatre, near the stage was opened into the fire area, water from the

sprinklers in this room, sprayed the front part of the interior of the theatre until the water supply to the sprinkler system was shut off.

In noting the effect of the sprinkler system in the fire Saturday, it is interesting to note that a system was being installed and nearly completed in the store of Brace MacKay Co. Ltd., when that firm suffered a \$300,000 loss.

Many persons have speculated that this store might have been saved from destruction if the sprinkler system had been completed and in operation.

**Prince County United Church Men's Rally Held Sunday**

Over one hundred men of the United Church, from all parts of Prince County rallied at Trinity United Church in Summerside on Sunday afternoon. It was Laymen's Sunday in the local United Church congregation where, due to the absence of Rev. C. R. Webber, on a preaching mission in Marysville N. B.,

The Laymen took over the morning service. Mr. Kenneth Parker of Charlottetown was the guest speaker. He spoke effectively on the text "Ye Cannot Serve Both God and Mammon", exhorting his listeners to follow this direction in their day to day lives. Mr. Leslie Hiscott was the organist and Mr. John Scott and Mr. Keith Lapp, all of Summerside assisted with the service. The solo was sung by Mr. Kenneth Neve.

At 2:30 the Prince County United Church Men's Rally got underway under the chairmanship of Dr. Lea Callbeck, and with Mr. Ralph Callbeck of Bedouque conducting the opening devotions. Don Adams and Charles Linkletter lead the discussion period which was concerned with the problems of social drinking. Two members of Alcoholics Anonymous addressed the group outlining the aims of A. A. and the means by which they achieved their objectives. "It is not a religious program" said one of the speakers, "but it is a deeply spiritual one-based as it is on the acknowledgement by the individual that he needs a power greater than himself to restore him to sobriety." The discussion groups which followed dealt searchingly with many aspects of the problems created by alcohol.

**February 12th**

**Valuable prizes offered**  
Ladies and Gents Door Prize

**ICE CARNIVAL**

at **CRAPAUD RINK**  
**WEDNESDAY, FEBRUARY 12**

Classes are provided for Ladies, Gents, Girls and Boys. Adult and minor classes for couples. Contestants must pass in card at wicket for registration as to age and class represented. Also have similar card on shoulder.

**Over \$150.00 in Prizes**  
**Special Door Prize**

**Educational Broadcasts**

A series of educational broadcasts will be held over CJRW on successive Mondays at 6:30 p.m. starting on February 3rd.

February 10th—Interview of two teachers by Bob Schurman.

February 17th—Address by Mr. Gordon Rice, principal Summerside Elementary School.

February 24th—Panel discussion chaired by Mr. Clarence Mercer, supervisor Summerside Public Schools.

March 3—Address by Mr. Lorne Moase, President Summerside Local Teachers' Federation.

March 10—Interview with students by Rev. L. M. Murray.

March 17th—Address by T. E. Hickey, C.A., Trustee Summerside High School.

March 24th—Address by Miss Estelle Bowness, General Secretary, P.E.I. Teachers Federation.

**Inco Research helps Canada grow**

Towing highly sensitive electronic instruments from a plane, Inco's airborne prospectors look for promising ore deposits in the ground below. Electro-magnetic signals, sent down from the plane, rebound from the earth and are picked up by an electronic receiver in a bomb-shaped container towed by the plane. The signals are relayed to a chart recorder in the plane; a camera synchronized with the recorder takes a continuous strip of photographs of the flight line. Geophysicists locate areas that may contain nickel ore; then ground prospectors are sent in to continue the search.

Using a new method of prospecting, developed through Inco research, a significant ore discovery has been made in the Thompson-Look Lakes region of Manitoba.

**INCO'S aerial prospectors find minerals underground!**

*New air exploration techniques reveal hidden sources of nickel in Manitoba*

**INCO TRADE MARK**

Ten years and ten million dollars ago, Inco began exploring likely areas of Northern Manitoba in search of hidden sources of nickel. Flying back and forth over these areas, an aeroplane equipped with special electronic instruments made "soundings" of the earth's crust. It was gruelling work; often unrewarding. Still, logging as much as 28,000 miles in a single year, Inco's airborne prospectors were covering more ground than old-time prospectors could have worked in a lifetime. And they got results. Good results.

As the days ran on into years, interesting patterns began appearing on the charts in the plane. Careful study of these charts indicated the possibility of ore deposits. Ground crews were sent in. After months of detailed investigation and exploratory drilling they confirmed the preliminary findings of the air prospectors. And it was nickel ore!

Production shafts are being sunk as the initial step in a four-year development program that will involve an investment of \$175,000,000, most of which will be made by Inco. Starting in 1960, this program—along with improvements at Copper Cliff—will result in an increase to an annual rate of 100,000,000 lbs. of Inco nickel.

In this new land of opportunity 400 miles north of Winnipeg a new town will rise, schools and hospitals will be built, new sources of water power will be developed, new railways will be constructed, and Canada's entire economy will benefit. Inco research helps Canada grow.
