#### Farmers Advised To Cease Grumbling

TORONTO, Jan. 11—(CP)—A June farmers' gathering was told today that the energy which farmers put into grumbling might better be directed to improve understanding between those who sell and those who buy.

The suggestion was made by John Broderick, president of the Ontario Federation of Agriculture. He told the 14th annual convention of the federation's junior section that farmers need a public relations and sales branch.

Some of the grumbling was traced by Prof. C. E. Hendry of the University of Toronto to what he said was a monopoly of leadership held by old members of rural communities.

Prof. Hendry said this monopoly, coupled with "extreme social control," created a neurotic state in rural dwellers. He said that gossip plays a large part in farm community life.

#### Armchair Fan Biggest Sports Problem in 1950

NEW YORK, Jan. 17—(AP)—The problem of the armchair fan with a television set in his own living room was voted most characteristic of sports in 1950.

A majority of the sports writers and sports broadcasters voting in an Associated Press year end poll agreed that television hurt attendance. A few thought TV was being made the "whipping boy" for a natural levelling-off in gate receipts.

The chair-bound fan didn't lack for sports entertainment. Most major league baseball clubs televised their games. All major fights flashed over the TV networks and a steady diet of U.S. college football games was fed into homes each Saturday.

Whether these fans eventually stir out to buy tickets and attend the events in person is puzzling promoters. Some watch with interest the tests of movies at home for which a set fee is charged. Others concentrate on getting top price for TV rights. Others ban TV altogether. The problem is far from solution.

Next to television and the declining attendance curve, the sports writers thought 1950 would be remembered for its numerous upsets particularly in football.

With the memory of the Navy-Army and Purdue-Notre Dame surprises still fresh in their minds, the writers found a "levelling-off" trend in sports. They pointed out the year marked the end of the super teams of Notre Dame, how Minnesota dipped to a record low and how St. Louis Cardinals tumbled into the second division after years of one-two finishes.

A return to pre-war standards and appearance of many new names in sports was held responsible for the many farm reversals.

The threat of war, most important in 1951, did not have an important effect on the 1950 sports scene. A few outstanding athletes were drafted but the mobilization program was not yet in full swing.
