EXTRACTS

From Professor Robertson's Latest Report.

THE STORAGE OF ICE.

In the course of his latest report, Professor Robertson says: It was necessary to give information on the methods of storing ice which should be adopted with the least expense and the greatest success in keeping the ice available for use during the warm season. In the storage of ice in a cheap ice-house, the following points are essential to prevent waste by melting:—

- (1.) Protection of the ice from currents of air. (These are likely to get in around the bottom of the building.)
- (2.) Provision for the drainage of any water from melted ice.
- (3.) Close packing of the ice, any spaces between the blocks being packed with pieces of broken ice when the house is being filled during cold weather.
- (4.) Ventilation over the covering which protects the ice from the ordinary atmosphere.

Ice is melted only when the temperature is above 32° Fah. The increase in temperature comes from some source external to the ice. When a lump of ice is left lying on the ground in warm weather, it is melted by the heat from the air which surrounds it. To prevent that, insulating materials of different sorts have been used. An insulating material for this purpose is any substance which prevents, or almost wholly prevents, the passage through itself of the form of energy known as heat. Different substances conduct heat more or less rapidly, and are spoken of as being good conductors or poor conductors of heat. Whatever is a good conductor of heat would be a very poor insulating material and a substance is a good insulator in proportion as it is a poor conductor, or non-conductor, of heat.

SEPARATING CREAM BY THE CENTRIFUGAL METHOD.

Speaking of the separation of cream Prof. Robertson says:—The milk for the separator should be carefully strained and heated to a temperature of 80° or 85° Fah. If it be used at a lower temperature, the cream is apt to become thick and clotted in the separator. Cold milk has a greater density than milk at a higher temperature; the higher the temperature up to 85° Fah., the greater the efficiency of the separation of the cream, all other conditions being equal.

Particular care should be exercised to prevent the use of any bitter milk. If any appreciable quantity of bitter milk be mixed with the general supply, the result will be a yield of butter which is likely to be more or less bitter in flavour. In very bad cases, the butter may become quite oily. These are both serious defects.

Where the heating and cooling conveniences are rather limited, the milk may be separated at a temperature of 80° Fah.; but in those cases, the inflow of milk should be lessened and be regulated according to the percentage of butter-fat which is discovered to be left in the skim-milk. That should not exceed one-tenth of one per cent. The Babcock milk tester should be used every day to check the percentage of fat in the skim-milk and in the buttermilk. For the testing of the skim-milk, the sample should be composed of small quantities taken from the outflow of the separator at different times.

The efficiency of the separation of the cream depends largely upon the skill and management of the operator although there are differences in the capacity and construction of the different centrifugal machines. The thoroughness of the separation of the fat into the cream depends mainly upon (1) the speed at which the separator

is run (2) the temperature of the milk and (3) the quantity of milk run through per hour. The operator should study carefully the instructions which are issued by the manufacturer or agent of the separator which he uses. It is desirable that the separator be run at its maximum speed, and that it be not exceeded. The separator should be set exactly level, and it should be kept so. Where belt machines are used, the belts should not be intensely tight; and in setting up the machines and calculating the speed between the engine and the separator bowl, from three to five per cent should be allowed for slippage of belts.

When the quantity of cream to be separated can be regulated by a set-screw in the bowl, it should be set to allow from fourteen to sixteen per cent of the quantity of average milk to flow through the cream outlet. A good rule is to take of cream which contains from twenty to twenty-five per cent of butter-fat, or cream which contains about one pound of butter to from three and a half to five pounds of cream. The set-screw inside the machines should be loosened occasionally, to prevent it from becoming immovably set.

Hood's Pills

Should be in every family medicine chest and every traveller's grip. They are invaluable when the stomach is out of order; cure headache, biliousness, and all liver troubles. Mild and efficient. 25 cents.

"Sunlight" Factory

In England turns out every ten weeks more soap than is used in the whole of Canada in a year. Sunlight Soap is used largely in all countries of the world, and the demand for it is more than three times as large as for any other brand.—Why? Because it is universally acknowledged to be the best soap made.

UP IN WINDSOR

Mr. Cole Discovers the Power of Dodd's Kidney Pills.

WINDSOR, Feb. 20—The following statement, which Mr. F. H. Cole of this place requests us to publish, is worthy of attention from every victim of Rheumatism in Canada.

Mr. Cole's experience fully warrants him in making this statement. "Words cannot describe how I suffered from Rheumatism and Kidney Complaint. I tried every cure that was recommended but got no benefit until I began using Dodd's Kidney Pills.

"Thank God I did use Dodd's Kidney Pills, for they cured me—made me sound and well, in every joint and limb." Those who suffer the agonies of Rheumatism or Lumbago need do so no longer. Dodd's Kidney Pills will cure them.

A new Knapp roller boat will probably be constructed in Toronto during the coming season.

Keep Minard's Liniment in the House

The head offices of the Canadian Life Insurance Company are to be removed from Hamilton to Toronto on account of high taxation in Hamilton.

Dr. Chase Cures Catarrh after Operations Fail.

Toronto, March 16th, 1897. My boy aged fourteen, has been a sufferer from Catarrh, and lately we submitted him to an operation at the Central Hospital. Since then we have resorted to Dr. Chase's Catarrh Cure, and one box of this medicine has made a prompt and complete cure.

H. G. FORD, Foreman, Cowan Ave. Fire Hall.

Count Tolstoi's new book, the proceeds of which will be devoted to the Dukhobor settlements in Canada, is entitled, "The Resurrection." The novel is strong in human study, with a central problem. Experts speak of it as the most vivid piece of literature that has ever come from Tolstoi's pen.

Minard's Liniment is used by Physicians

Young Jesse James' trial for train robbery has commenced at Kansas City. Mrs. Samuels, 74 years old, mother of the James boys, was a witness on the prisoner's behalf. The woman had one arm shot off by detectives years ago in defending her sons.

To all who find themselves with health gradually slipping away, Kidneys and Liver so disorganized that they are incapable of keeping the system free from poisonous waste material, Stomach Disordered, Howels Unpacked, Head Aching, Back Painful, take Dr. Chase's Kidney-Liver Pills. The quick way they help you back to health will surprise you.

Minard's Liniment Lumberman's Friend

Smallpox is ravaging the Abyssinian army.

Chronic Eczema Cured.

One of the most chronic cases of Eczema ever cured is the case of Miss Gracie Ella Alton, of Hartland, N. B. On a sworn statement, Mr. Alton says: I hereby certify that my daughter Gracie Ella was cured of Eczema of long standing by using four boxes of Dr. Chase's Ointment. William Thistle, ruggist, of Hartland also certifies that he sold four boxes of Dr. Chase's Ointment which red Gracie Ella.

Supper is to Many Indispensible

And the question arises, What should we eat, drink and avoid? Supper being a late refreshment

We Should Avoid anything and everything that does not comply with the the following, simple Hygienic rules.
We Should Eat That which readily assimilates, and does not overtax the digestive powers during the night.
We Should Drink Only that which induces healthy sleep, without any reactionary depression in the morning.
