

THE DAILY EXAMINER.

MAY 11, 1888.

The "Patriot"—A False Witness.

The Patriot is informing the people concerning the finances of Canada. An idea of the reliability of the information it affords may be formed from the fact that it includes the \$15,000,000 to be borrowed in England by the C. P. R., among the expenditures of the Government.

It shall be a condition of the said mortgage that the net proceeds of the sales of the said lands shall, from time to time, be paid over to the Government, and the company may, at its option, also pay over other moneys to the Government, the whole to constitute a fund to be set apart and held by the Government exclusively for the purpose of satisfying the principal of the said bonds.

On the money thus set apart, which is not to exceed an amount sufficient to redeem the outstanding bonds of the said issue, the company shall pay to the Government half-yearly, on the first day of the months of June and January in each year, interest at the same rate as that carried by the said bonds, namely, three and one-half per centum per annum, the same to be applied towards satisfying interest, as it shall mature on the said bonds.

As soon as the aggregate amount of the said fund in the hands of the Government shall equal the principal of all bonds of the said issue then outstanding, the company may pay into the said fund also a sum sufficient to cover the interest, if any, up to that time, and thereupon the said mortgage shall be discharged and the Government shall assume and pay all interest which shall thereafter become due on the said bonds as well as the principal of said bonds at maturity, and the company shall be thereafter forever freed from any liability in respect to such principal or interest nothing herein contained to be construed as making the Government liable at any time to pay any part of the principal of the said bonds except in so far as the company shall have provided it with a fund for that purpose in the manner hereinbefore specified.

Further, it is agreed that every dollar of the loan shall be expended in the improvement of the lines of railway now in operation, and so inure to the advantage of the country. Schedule A. shows how the company will expend the proceeds of the sale of the bonds referred to in the annexed agreement:

- 1. On account of capital expenditure on main line between Quebec and Vancouver, in buildings of various kinds, snowsheds, sidings, permanent bridges, filling trestles, reducing grades and curves, and other improvements and facilities, and on vouchers and on pay rolls. \$ 5,498,000
2. For required rolling stock, locomotives, box cars, passenger cars, flat cars, snow ploughs, etc. 5,250,000
3. For required improvements on the said main line, elevators, bridges, locomotive shops, filling trestles, sidings, docks, lake and coast steamers—the residue, whatever it may be, estimated at. 4,252,000
\$15,000,000

To try to make the people believe that the \$15,000,000 so to be borrowed by the Canada Pacific Railway under the guarantee of the Government is a Government expenditure of the present year, is to out-Ananias Ananias.

Why will the Opposition persist in the misrepresentation that our lumber trade and other "natural industries" are hampered by having the cost of their supplies increased by what they call taxation? The facts are against those critics, as they would see if they did not willfully close their eyes to the truth. Mr. Perly, the well-known lumberman, told the House of Commons that members of his own firm and others had feared that under the N. P. they would have to pay increased prices, but, as he said: "What was the fact? The articles of clothing and the vast amount of goods that enter into shanty supplies were never advanced in price, and to-day we can get them cheaper than ever we could get them before." This tallies with the expression of all practical men; yet to run down Canada, its domestic enemies persist in stating that prices have been increased, because they choose to adopt the theory that unpaid Customs duties are taxation.

The following from the Regina Leader is in the right vein: "We have the utmost faith in Canadian individuality, independence and nationality. Within the Dominion are the materials for the building of a great empire, and Canadians mean to raise the structure."

Canadian Art.

LORD LANSLOWNE delivered an excellent speech at the opening of the Exhibition of the Royal Canadian Academy. Among other things, he said that he was glad to be able to express his deliberate opinion that there has been a very steady and perceptible progress in the general standard of merit at which the contributors to Canadian art exhibitions have been able to arrive; and that he felt no doubt that we are justified in looking forward to the time when Canada will have a school of art of its own characteristic of the country, and drawing its inspiration not from external sources, but from the life and natural features, so varied and so attractive, of the Dominion itself. Referring to the fact that the population of Toronto has risen in five years from 95,000 to 150,000, and that its assessable value has increased from \$65,000,000 to \$100,000,000, he said: "That is one kind of greatness, but in order to achieve true greatness a city which aspires to play a part in the fortunes of our race stands in need of more than this, and I wish to urge upon you as strongly as I can that the Royal Canadian Academy should be placed in a position to do something towards the accomplishment of this end by stimulating the study of an art which more than any other has helped to ennoble and refine the life of nations."

The other day a steamship with 800 immigrants destined for the West arrived at Montreal at half-past six in the morning. Breakfast was served on board, the newcomers were landed, their baggage inspected, and by half-past one they were on board a Canadian Pacific special bound for their new homes. This is expeditions, and no doubt the immigrant likes despatch and perfection of arrangement.

Hon. Mr. Abbot has introduced into the senate a bill to amend the Dominion Lands Act. Its object is to authorize the appointment of a board to administer the sum of \$60,000 for the purpose of assisting crofter immigration to Manitoba or the North-west. The board will consist of three or four persons representing probably the Imperial and Canadian Governments and the private individuals who have initiated the scheme. It is understood his proposed immigration venture will, at the outset, take the form of an experiment, a few families only being brought out to see how the scheme works. In the event of its succeeding, a larger number of families will be assisted to Canada.

The M. A. Starr.

THE steamer M. A. Starr arrived from Halifax via intermediate ports about half-past nine last evening. Capt Ferguson reports meeting an immense quantity of heavy ice between Cape George and Bayfield, and having the steamer's timbers scraped from stem to stern therewith. The steamer lay to in the ice for seven hours, and it afterwards took her about three hours to work out, having to put back some seven or eight miles and come round by Port Hood. The captain also reports a large quantity of ice between Picton and Wood Islands.

During the winter the Starr has, as has already been intimated in these columns, been thoroughly overhauled and renovated, and is now ready for a good summer's work. Mr. Harry Fishwick is the purser this season instead of Mr. Sterling, but the other officers are all at their usual posts. The cargo this trip was made up chiefly of exhilarating fluids as follows: 1 cask liquor, 1 half barrel "merchandise"; 1 barrel "merchandise"; 4 half hogsheads beer; 4 hogsheads and 2 barrels beer; 2 hogsheads and 1 barrel beer; 1 keg ale; 2 cases whiskey; 2 kegs ale; 2 hogsheads hop beer; 1 half hogshead hop beer; 20 hogsheads hop beer; 21 half hogsheads hop beer; 20 barrels bottled hop beer; 10 hogsheads bottled hop beer; 5 half hogsheads bottled hop beer; 18 barrels bottled ale. There were no passengers for this port.

The steamer is now being loaded with potatoes, oats, pork, canned meats, etc., and will sail on return this evening. We wish the Starr and all connected with her a pleasant and prosperous season.

Experimental Farm Work.

EVERY one, we are told by the Gazette's Ottawa correspondent, is in a state of activity at the Central Experimental Farm of the Dominion Government. Seeding is proceeding rapidly, about fifty acres having already been sown. One hundred acres "or more is expected to be sown the present week. Tree planting is also being pushed vigorously along, including avenue, forest, trees and other economic trees and shrubs. The orchard in connection with the farm includes a collection of apple trees numbering 903, consisting of 297 varieties, of which 174 are from Russia and other parts of northern Europe. Of these trees 216 were planted out in the orchard last autumn to test the relative merits of fall as compared with spring planting. Crab apples number 26 trees of 12 varieties, chiefly of American origin. Of plums there are 197 trees of 72 varieties, 32 of which are from Russia and other parts of northern Europe; cherries 155 trees of 71 varieties, 54 from Russia and northern Europe; peaches, 11 varieties; apricots, 4 varieties, 2 Chinese and 2 European; grapes, 891 vines of 127 varieties; currants; 865 bushes of 20 varieties; gooseberries, 3,650 plants, strawberries 90 named varieties and about 50 unnamed seedlings, 20,900 plants in all.

FRENCH kid gloves, 75 cts., corsets, 30 cts., sunshades, 30 cts. to \$2 at J. D. Reid's, Cameron Block, Tryon Woolen Mills Depot.

We would remind the ladies of the grand show at James Paton & Co's to-morrow. The young man with a slender salary should choose for his wife a girl of small waste.

REAL English Indigo Blue Serge suits made to order for \$11 at J. D. Reid's, Cameron Block, Tryon Woolen Mills Depot.

It is said that the Chinese remedy for smallpox is to make a patient beat a drum. If he can do it he is all right. Formerly they used to beat the patient to cure him, but civilization progresses even in China.

The Gift of Seeing.

A proud and happy man is he, All Nature's secrets knowing, Who reads God's truths on land and sea And reaps contentment's sowing; Who knows the Lord inflicts no death Without a blessing to it; And that enjoyment of the earth Depends on how you view it; That Nature's hieroglyphics traced On heaven, and earth and ocean, Are object-lessons teaching truth— Interpreted in motion; That all of these harmonious blend With no truth disagreeing, And each its message yields to those Who have the gift of seeing. So every true and perfect thing Yields to his soul its sweetness; A march he, and more than king, Who knows the grand completeness. —I. Edgar Jones, in the American Magazine for May.

Railway Extension.

Winnipeg papers of all shades of opinion just now bear evidence to an anxiety that exists in the province for an extension of the Canadian Pacific branches in various directions. The cessation of the monopoly clause has been productive of a considerable number of applications for charters, but there is apparently a lack of popular belief in the ability of the promoters to carry out their schemes. The Red River Valley Line will be completed; the contractors are sure of their pay for it, as the whole province may be taxed to provide the funds. But outside of that the hope of the settlers is in getting "the iron heel of monopoly more firmly fixed on their necks," as the suffering Grit editors were wont to call it, and it is the Canadian Pacific they look to for the provision of transportation facilities. And by the way, grinding under the aforementioned heel seems to have been a healthy process, for, as the Winnipeg Sun says, speaking of the redistribution bill: "The population and controlling influences are no longer overwhelming in the east but have been scattered over the west, northwest and southwest. Winnipeg alone has shown very marvellous progress among the settlements in the east, but, despite her progress, it is evident that the influence of the east must decrease, while that of the other portions of the province must continually increase." The population, by this is scattered just where the assailed road had most branches, and where its blighting influences should have been most powerful.

A United States Senate Scene.

Debates of a lively nature frequently take place in the U. S. Senate. On Thursday last there was one. It ended in this wise: Mr. Ingalls—Did not the soldiers of Indiana threaten to hang the senator with a bell rope on a train, after he made that Lincoln dog speech? Mr. Voorhees—the senator is a great liar when he intimates such a thing—great liar and a dirty dog. It never occurred, never in the world. That is all the answer I have, and I pass it back to the scoundrel behind the senator who is instigating these lies. (This was made in reference to representative Johnston, of Indiana, who was seated at a desk directly in the rear of Mr. Ingalls.) Mr. Ingalls—There is a very reputable gentleman in the chamber, a citizen of Indiana, who informs me that the signers of that certificate are entirely reputable inhabitants of Indiana, and that he knows fifty people who heard the senator. Mr. Voorhees—Tell him I say he is an infamous scoundrel and liar. Tell him I say so.

Euphemisms.

SIR,—I have read with much pleasure the different productions under the heading "Varia," as they appear from time to time in THE EXAMINER. The euphemisms for death were most interesting. May I be allowed to suggest that your correspondent publish those which he says he has, although he does not know the authority. Perhaps some of your correspondents may. I have preserved much of what "Varia" has written, in my scrap-book, and I should like very much to add to the list of euphemisms he has already given.

Yours, &c., G. P.

ADVICE TO MOTHERS.—Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural quiet sleep by relieving the child from pain; and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhoea, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind. [April 1, '88.]

Fresh discoveries of gold have been made in Wales, the yield being estimated at five ounces of pure gold to the tone of matter excavated. The deposits will not be worked until the case of The Crown v. Morgan—fixing the title to the deposits already discovered—has been decided.

A conductor poked his head in the door of a car and called out the station "Sawyer, whereupon a young man on his wedding tour, who was about to kiss his bride, yelled back: "I don't care if you did, sir, she's my wife."

"Do you believe there is any such thing as luck?" asked a young man of an old bachelor. "I do. I've had proof of it." "In what way?" "I was refused by five girls when I was a young man."

The efforts to negotiate a Russian loan of 500,000,000 roubles in Paris has failed.

An epidemic of a choleraic nature is raging in Madrid.
