1953 Potato Acreage Increased

OTTAWA (CP) - Canadian farmers this spring planted reduced acreages of all but one of the principal grain crops, the bureau of statistics reported Wednesday. Wheat, oats, rye, flaxseed and mixed grains were all given smaller areas than in 1952, the bureau said in its preliminary estimate of crop and summerfallow acreages. Only barley among the principal crops showed an increase. Last fall's plantings of winter wheat and fall rye showed "substantial increases" over 1951, however, and increases in fall rye offset the decline in spring seeding of that crop.
