

DANCE Irish town hall, Monday. Brown's orchestra.

PANTRY SALE at Kennedy's, September 11th, at 8 p. m. Sponsored by Darnley W. I.

CHICKEN and ham supper, St. Mark's hall, Kensington, Wednesday, September 22nd.

NOW FORANO cleaning and buying Williams, warehouse, Kensington. Signed E. W. Johnston.

PANTRY SALE, Smallman's Store, Saturday, September 18th, 2:00 p. m. Auspices Catholic Women's League.

NORTH BEDEQUE UNITED CHURCH. Services for Sunday, September 12th, Travellers Rest, 11 a. m. North Bedeque, September 12th, 7:30 p. m. Rev. J. K. Campbell, Minister.

B AND P CLUB ENTERTAINMENT. On Wednesday evening the members of the Summerside business and professional women's club were guests of Chief Justice Thane and Mrs. Campbell at their summer home at Stanley Bridge.

UNITED CHURCH OF CANADA, Kensington. Services for Sunday, September 12th, 10:30 a. m. Morning Worship. 7:30 p. m. Rev. L. M. Murray, B. A., B. M., Minister.

CASE AT ALBERTON. A man from Alberton, accused of stealing a sum of money and a quantity of merchandise from the Waugh's Drug Store in Alberton last Sunday night, appeared for preliminary hearing before Magistrate R. S. Hinton, Q. C., in County Magistrate's Court yesterday, and was remanded until Tuesday, September 14th.

CHURCH OF ENGLAND. Church Services for the New London Parish on September 12th, the 13th Sunday after Trinity. Rector: Rev. W. Eric Ingraham, St. Stephen's, Burlington, Sunday School Confirmation Class 10 a. m. and Holy Communion 11 a. m. St. Thomas, French River, Sunday School 3:30 p. m. Evening Prayer and Baptism 2:30 p. m. St. Mark's, Kensington, Sunday School begins 6:30 p. m. and Evening Prayer and Baptism, 7:30 p. m. Everyone is cordially invited to attend.

VISIT THEIR OLD P. E. I. HOME. Mr. and Mrs. Henry L. Smith, Saskatoon, Sask., left on August 31 after visiting their old home in Prince Edward Island. While in Wilshire they were guests of Mr. Smith's sisters and brother, Mrs. Aquila Bowman, Mrs. Kier, Hathaway and Mr. Arthur Smith, and at Hunter River they visited with Mrs. Smith's two brothers, and a sister in Mayfield. The last Sunday they spent on P. E. Island, Mr. Smith had the pleasure of playing the organ in the North Wilshire Church where he had been organist over 50 years. Mr. Smith sang a solo, "Lead Kindly Light," of which special mention was made by the minister and others. On Monday evening previous to their departure, their relatives and friends were entertained at the home of their sister, the Bowman household. They left the following morning for their home in Saskatoon.

L.O.L. DISTRICT VISITATION AT BEDEQUE. At the regular meeting of King Edward Loyal Orange Lodge, Central Bedeque on September 6, with W. M. Master Lloyd Atleek presiding, District Master John Barrett paid his official visit and addressed the meeting on the principals of the Order. He was accompanied by a number of members from Trevor Lodge Lot 16. Several members from Borden Lodge were present. The meeting was honored by the attendance of Grand Master Peter G. MacEachern and Grand Treasurer E. B. Bettion, who were given Grand Lodge honors and each in turn addressed the meeting. Alexander MacFarlane extended a welcome to the visiting brethren. Several of the District officers took part in the business of the meeting. Myric MacKenzie and Russell Bell were appointed to arrange a church service in Borden. Refreshments were served at the close of the meeting.

ALBERTON. Miss Louise Gillis, public health nurse, has returned to Alberton after a pleasant holiday.

Miss Mable Fielding, Alberton, is spending the week-end with Mr. and Mrs. E. R. MacAustand, Bloomfield.

Mr. H. J. McPhee, Lynn, Mass., is a guest of his brother-in-law, Mr. and Mrs. Don Campbell, Alberton.

Pte. Keith Raynor, Aldershot, Ontario, is spending several days at his home in Alberton prior to sailing for Korea.

Naval Cadet Home From B. C. Mr. Clive McDonald, son of Mr. and Mrs. Norman McDonald of Summerside returned home on Thursday after completing his second year of training as a university naval cadet at H.M.C.S. Naden, Esquimaux, B.C. Mr. McDonald, who is studying in the executive branch of the Royal Canadian Navy, spent six weeks at Royal Roads Military College on Vancouver Island taking instruction in navigation. Training also included a month at sea aboard the frigate H. M. C. S. New Glasgow and a cruise down the United States west coast.

On graduation Mr. McDonald is eligible for commission in the Royal Canadian Navy as a sub-lieutenant. He will enter Acadia University the last of the month for his fourth year studies.

MUSICIANS REPLACED. AMSTERDAM, The Netherlands (Reuters)—The Amsterdam concert orchestra has found replacements for four musicians refused U. S. visas because of alleged Communist affiliations. The 110-piece group is due in New York Oct. 10 to start a North American tour.

Local Air Force recruiting officials have announced that there will be a change in command of the local recruiting unit effective on Thursday, September 16th. F/L A. E. Giustien, who has been commanding officer of the unit since September 22nd, 1952, has been transferred to Air Force headquarters as a member of the directorate of postings and careers. Succeeding him is F/O R. J. Harvey, who has been second in command of the unit since May of this year. F/O Harvey stated that the mobile recruiting unit schedule will be maintained at its present level as another officer will be posted to the unit in October.

Continued from page 1

See Valuable existed, then the work could be done at one laboratory. A similarity in results was shown, and since 1953, the local Science Service Laboratory has conducted the potato fungicide trials for Canada.

NEW LINE OF WORK. Mr. F. M. Cannon, officer-in-charge of the Entomological Laboratory, advised the visitors that a new line of work was introduced in 1954. In some areas, Wisconsin for example, parathion has not proved satisfactory for the control of potato aphids when this insecticide was added to Bordeaux mixture. This was disturbing news because parathion is a powerful weapon against aphids (the transmitters of virus diseases), and Bordeaux is a leading fungicide in Prince Edward Island. Some of the results of tests being conducted on this important problem, Mr. Cannon stated, would be presented by the research officer in charge of the project during the afternoon.

The turnip root maggot, an insect of major concern to P. E. I. turnip growers, is presenting a difficult challenge to the research officers, and the opportunity to view some of the field tests would be given during the tour.

Mr. L. C. Callbeck of the Laboratory of Plant Pathology, and Dr. F. L. McEwen of the Entomological Laboratory were introduced as the research officers who would conduct the group on a tour of the various field plots at the Upton Farm in West Royalty.

At the Upton Farm, Mr. Callbeck showed the visitors a series of plots in which a number of different fungicides were being compared. Each plot had unsprayed rows on each side of it, so that all treated plots were surrounded by infected plants. Treatments had been applied seven times during the season, the first application being made on the 19th of July. The various treatments showed differences in blight control as illustrated by the degree of defoliation. The unsprayed check plots had been completely defoliated by disease since the 20th of August, and since early death, Mr. Callbeck pointed out, would result in a reduction of about seventy-five bushels per acre, for, at this time of year, healthy foliage should increase potato yields at the rate of about twenty-five bushels per acre per week.

UNUSUAL POTATO YEAR. This, Mr. Callbeck said, was a rather unusual year in the potato world. The growers in some areas, such as Wisconsin, Idaho and Montana, were troubled by lack of moisture, while in the Maine and Maritime Provinces area was plagued by a set of meteorological conditions conducive to late blight epidemics.

In Prince Edward Island the frequent rains and high humidities that prevailed from mid-July until the third week of August provided the conditions for late blight development and spread of late blight disease. During this period the frequent application of fungicides was of the utmost importance, and the growers who accepted the challenge by spraying as regularly as poor weather permitted, have, in general, brought the blight through that serious period in very good condition. Finer weather, with humidities below the critical point, moved in during the latter part of August, and the situation has been alleviated.

Good spraying should pay high dividends to local growers, for blight in some areas, and severe disease conditions in others—Maine probably suffering the most severe epidemic on record—market conditions should be strong and healthy.

It was the frequency rather than the volume of rain that produced the dangerous P. E. I. epidemic this season. From the 1st of July to the 8th of September, 7.62 inches of rain fell in the Charlottetown area compared to 9.37 inches during the same period of 1953. However, the 6.52 inches fell in 36 days as compared to 34 days in 1953 when 14.24 inches were recorded for the period under review. The frequent rains and the poor drying conditions this season kept the foliage moist for long periods, thus allowing the fungus to produce spores abundantly for days on end.

Bordeaux mixture, Mr. Callbeck stated, continues to hold a prominent place in the blight control program of island growers, and a survey conducted last fall showed that over one thousand seed growers used this cheap and effective spray in 1953.

The newer fungicide, disodium ethylene bisdithiocarbamate, which is sold under the trade names Dithane D-14 and Thiogreen, is the leading contender, and last year was used by more growers than any other fungicide. This product has proved to be an excellent fungicide, but under severe disease conditions frequent applications are usually necessary. Tests conducted over several years have illustrated that the losses from late blight tuber rot are likely to be higher in carbamate-sprayed fields than in Bordeaux-sprayed fields.

A more recent introduction, whole experiment consists of 68

Above are the executive officers of the Maritime Professional Photographers Association elected to office at a two-day convention in Amherst, Nova Scotia, last week-end. From left to right are: front row, Cliff Wright, of Halifax, secretary-treasurer; W. B. MacAdam, Crandall Studio, Moncton, president; Harold Bailey, of Kentville, editor of convention program; 2nd row: D. W. Sears, Read Studio, of Summerside, vice-president for P.E.I.; Murray Dorcas, Harvey Studios, vice-president for Nova Scotia.

Mr. D. W. Sears, (left), manager of the Read Studio in Summerside, and vice-president of Prince Edward Island of the Maritime Professional Photographers Association, is seen at the association's convention in Amherst last week-end presenting the Lorne H. Read commercial plaque to R. P. and R. H. Smith, managers of the Smith Studio at Amherst, N. S. The plaque, donated by the late Lorne H. Read of Summerside, is an annual competition award for the best commercial photograph.

Final Sessions. By Mr. Claude Wood: 1. Be it resolved that the thanks of this convention be extended to Dr. Shaw, Dr. MacKinnon, Mr. MacKenzie, Mr. Mufford, Mr. Rice, Mr. Ross, Mr. MacGuigan, Mr. Andrew, Miss Bonness, and all others who have in any way contributed to the success of our convention.

2. Whereas the newly authorized science texts for grades 7 to 10 make provision for a considerable instruction in health, we request the Department of Education to discontinue health as a required subject for the Grade Ten Provincial Examination.

3. Whereas the holding of the Grade Eight Departmental Tests in the individual schools instead of at special centres has proved successful, therefore, be it resolved that the method be continued.

The officers appointed for the following year were: President, Mrs. Grace MacKinnon, Spring Park. Vice-president, Miss Gertrude Villett, Winsloe. Secretary, Mrs. Gordon Rodd, Wheatley.

The convention was brought to plots with 17 different treatments. All the treatments were soil applications of different chemicals at various rates. The chemicals were applied to the soil at the time of planting, and, in a few plots, the treatments were repeated in early August. The purpose of the treatments is to kill the eggs, which are laid in the soil around the plants, or the young larvae before they tunnel into the turnips. Many of these chemicals have a long residual effect and may persist in the soil for several months. A representative sample of turnips from each treatment was examined by the visitors, and it was observed that some materials manifested considerable promise of controlling the root maggot.

There are at least two generations of root maggots in turnips each season, Mr. Cannon explained. The second generation is now just beginning to cause damage, and it is possible that before the crop is harvested the maggot damage will be more severe. A certain number of the plots will receive another treatment within the next few days in case the early treatments fail to protect the roots during the attack of the second generation.

Every new insecticide, soon after it is developed, is tested for control of root maggots in turnips, and as soon as one is found that will give a satisfactory control it will be recommended to the farmers of this province.

TURNIP MAGGOT CONTROL. Mr. F. M. Cannon, officer-in-charge of the Entomological Section, conducted the group through the turnip field plots set up for root maggot control studies. The

Local Teachers Convention At Tignish Concludes. The second day of the Tignish Local Teacher's Convention began at 9:30 with a roll call. Mr. Doiron, local supervisor, explained new procedure to be taken in buying Library Books. Mr. Doiron also brought up the point about grading pupils and this brought forth an active and interesting discussion.

Next number on the program was a demonstration of Physical Education by Mr. George Andrews. The last item in the morning session was the "Question Box". The questions were capably answered by Mr. P. E. Doiron. Convention then adjourned till 1:30 p. m.

The last session was opened by an address by Mr. Malcolm MacKenzie, assistant Director of Education. He spoke on Course of Studies and different teaching aids for teachers.

After this an interesting demonstration on Teaching Arithmetic to Intermediate Grades was given by Mr. Merrill MacGuigan of Queen Square School, Charlottetown.

The different committees then gave their reports:— Resolution— 1. Be it resolved that the thanks of this convention be extended to the pastor, Rev. J. A. MacDonald, for the use of the Dalton School and to Rev. Denis Gallant, who cordially welcomed the teachers on behalf of the pastor. Further that our gratitude be extended to the officials from the Department of Education, to all speakers and instructors on the program and to the organizers of this well-planned Convention.

2. Be it resolved that the teachers of this locality here assembled in convention express in a special manner their thanks to Hon. Keir Clark, Minister of Education for the favor granted them of establishing in their midst for the benefit of their pupils a complete High School. Be it further resolved that like sentiments be extended to the pastor, Rev. J. A. MacDonald for having provided, re-modelled and re-decorated adequate rooms for this purpose and to the Secretary Board of Trustees and ratepayers of Tignish for their untiring efforts in obtaining from the Department and for furnishing these rooms.

3. Whereas the Family Allowance is of such benefit to children attending school be it resolved that the Teachers' Federation urge the Provincial Government to petition the Federal Government for the continuation of this aid to students to their completion of High School provided they apply themselves to their studies.

4. Whereas culture and refinement go with our pupils all through life, be it resolved that as teachers do our utmost to instill into our charges the importance and charm of choice language, becoming dress and high ideals. Nomination Committee: Miss C. Arsenault was re-elected president and Mrs. Mary Rose Bernard was re-elected secretary.

The Convention then adjourned by singing "God Save The Queen".

To Be Known As No. 5 Medical Co. After October 1, 1954, the well known Medical Corps unit in Charlottetown, the 21st Field Ambulance, will become No. 5 Medical Company, RCAMC (Military).

Prior to the 1st World War the Medical Corps in Charlottetown was known as No. 9 Field Ambulance, and at the outbreak of war the unit mobilized under such well known local doctors as Dr. I. J. Yeo and Dr. W. J. P. MacMillan. It proceeded to Valcartier, Que. in August 1914 and was later amalgamated with other medical units.

During the late 1920's and the 1930's the unit was known as No. 26 Field Ambulance, later No. 21, and was commanded by Lieut. Col. J. J. Blake, E. D., who mobilized the unit in 1939. He had associated with him Doctors W. H. Soper, R. D. MacNeill, J. C. Simpson, Don Campbell, Major Charles Williams, the late Dr. G. L. Smith and the late Dr. R. D. Howatt.

By the late autumn of 1939 the unit had sufficient personnel on strength to cause the authorities to divide it up and supply medical services at Charlottetown, Mulgrave, N. S., and Sydney. In 1940 a company was sent to Debert, N. S. to join with No. 22 Field Ambulance as No. 22-21 Field Ambulance of the 3rd Canadian Infantry Division. This unit went overseas in 1941 and later served in Northwest Europe as No. 22 Field Ambulance and No. 7 Canadian Field Dressing Station.

After the end of the war the unit reorganized in 1947 under Major

J. H. Shaw who was later appointed the Assistant Director of Medical Services with the rank of full colonel. The command of the unit was taken over in 1950 by its present commanding officer, Lieut. Col. J. K. L. Irwin. Associated with him are Majors W. T. Hooper and Harold Stewart as well as other non-medical officers.

As No. 5 Medical Company the unit will be instrumental in carrying out training of Medical Corps personnel in this area and its Headquarters will move in October from the Ordnance Compound to the quarters now occupied by H. Q. 21st Armoured Brigade in the Armouries.

UNIVERSITY HEAD DEAD. WINNIPEG, Man. (CP)—Dr. Albert Henry Steward-Gilson, 63, president of the University of Manitoba, died Friday at his residence on the Fort Garry campus. He had been unconscious for two days and all for more than a year. Dr. Gilson was appointed university president in 1949 after being associated with McGill University since 1920.

Algeria Rocked By New Quake. ORLEANSVILLE, Algeria (CP)—Another violent earth tremor Friday night rocked this town which was destroyed by a 12-second quake Thursday. No new casualties were immediately reported. The new shock came as thousands of soldiers, police and firemen searched wearily through the wreckage for victims of the disaster. Earlier in the day, 16 minor tremors had swayed towering ruins precariously over the heads of rescue workers.

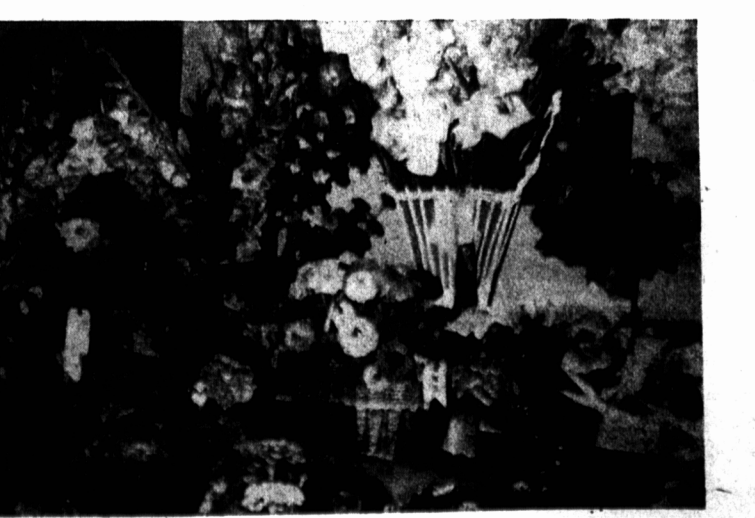

Full extent of the disaster is not yet known, but the final death toll now is expected to be at least 1,200. Between 5,000 and 6,000 persons are reported injured, and 20,000 are homeless.

Distribute Edition Of Illustrated Bible. "The Newest and Most Modern Bible," "a Picture-Book Bible," "The Jubilee Youth Bible" as it has been variously termed will be released to the public in September. Copies of it have already been presented to Prince Charles and Princess Anne.

Edited by Mr. John Sterling, the Bible is packed with 500 pictures that are simple snapshot sketches of every bird, beast, tree and flower mentioned in the narrative, the attractive volume is the Authorized Version, "without note or comment" in keeping with the 150 year policy of the publishers, the British and Foreign Bible Society. For the first time this new line of plain and practical illustration is introduced into the Bible. It is really an up-to-date visual aid rather than the old time type of story picture. Route-maps accompany the text to show the reader the road he travels, milestones give the distance, signal count out the passing of the centuries, badges or identity cards indicate the nationality of the people he meets. City gates and dwellings of the points visited are also shown. Highlights of the book are the special close-up studies of the Temple buildings, officers, vestments and vessels of worship; the costumes, coins, countryside and customs of the time of Christ, and the journeys of the apostle Paul.

It is the complete Bible but so arranged that the narrative flow on in uninterrupted fashion; passages, especially in the Old Testament, which are concerned with genealogies, itineraries, specifications and measurements, and other technical matters, are placed in three columns on the lower half of the page, but in their right sequence and of equal importance, yet not impeding the Bible Story. Several years' work has been put into this handy edition for young people and children. The aim and purpose is "to bring the story to life." It is published to commemorate the Third Jubilee—50th anniversary of the Society formed when William Wilberforce and some of his friends heard the story of Mary Jones, a little Welsh girl, who trudged many miles over rough roads of her native country to buy a Bible only to find the last copy sold upon her arrival at Bala. The first edition soon to be available will consist of 100,000 copies and is printed by Oxford University Press, and distributed by the Society below publication cost.

At Alberton Flower Show

The above photograph shows part of the beautiful display of flowers and potted plants at the Alberton flower show last Wednesday. There were over one hundred and sixty entries in the show which is sponsored annually by Regalette Rebekah Lodge.
