

**READY FOR ANOTHER FLIGHT**

The Flying Farmer, Eldon Woodside of Clinton, above, prepares for a brief flight over the C. in the new Paper Super Cab aircraft, which is readily portable from an agency in Hamilton to Ontario.

The plane which is fitted with the attachments for operation of crop spraying and pest control equipment, has a horsepower of 150. It has a cruising speed of 115 m.p.h. and a landing speed of 45. A short flight of around 15 minutes is possible making it ideal craft for photographic work. The gasoline capacity gives the plane a maximum range of between 450 and 460 miles.

The primary instruments consist of a turn and bank rate of climb instruments, an outside air temperature gauge and a day clock. The radio equipment is a NARCO VTLR-2 set complete with shielding. The aircraft complete with all accessories is valued in excess of \$8,500.

Mr. Woodside who has been flying his own plane for the past eleven years, was the first student of Paul's Flying School which was formerly operated at the Charlotteville Airport.

At present he has a contract to fly the mails to Pictou Island twice a week, Tuesdays and Fridays. He also conducts wildlife surveys from the air for the Dominion Government covering Prince Edward Island and sections of Nova Scotia and New Brunswick.

In winter months he is frequently called upon to make mercy flights to various snowbound localities, carrying doctors, veterinarians, the sick to hospital and the dropping of medicines.

**Science Now Shrinks Piles Without Pain Or Discomfort**

Finds Healing Substance That Relieves Pain And Itching As It Shrinks Hemorrhoids

Toronto, Ont. (Special) — For the first time science has found a new healing substance with the ability to shrink hemorrhoids and to relieve pain and itching. Thousands have been relieved of the pain and itching of hemorrhoids in the privacy of their own homes without any discomfort or inconvenience.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors observing patients while gently relieving pain, actual reduction in size, and relief of itching.

And most amazing of all—the improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough

**See Indications Tight Money Policy Is Easing**

By RUSSELL ELMAN  
Canadian Press Staff Writer

HALIFAX (CP) — Reginald Dean, president of the Bankers' and Dealers' Association of Canada, said Thursday he believes the federal government has signalled its intention to change Canada's tight money policy and there are "good indications" of an easing of the credit situation.

He told a press conference that in the last two months there is evidence of declining interest rates indicating a better flow of credit.

He declined to give an opinion as to exactly how the government has effected a change in fiscal policy, but added:

"We do know that the Bank of Canada, operating through the chartered banks, has eased on credit restrictions."

The 50-year-old head of an association that represents 200 investment firms, said there have been "very marked" lower yields obtainable recently on federal provincial and municipal bonds. On the bond market most offerings were being snapped up and sold at a premium.

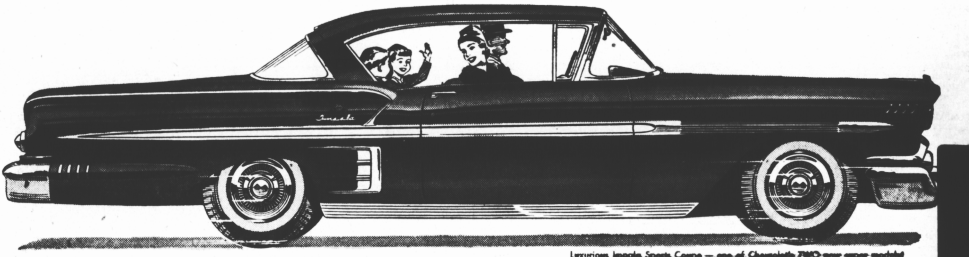

"As a result, I considered the outlook for borrowing by municipalities brighter."

Commenting generally on the economy, he said he thinks Canada is at a "pause" in her development, but there is no recession. "What is happening here is that the economy at large is looking forward to an eventual easing of the money rate."

Mr. Dean said there is far more "grassroots" investment by Canadians than before.

"Canadians to a very large degree are stepping in and assisting materially in the development of their own resources," he said, adding that the growth characteristics of solid Canadian stocks are good.
