of 1965, compared with a deficit of \$772,000,000 in the same period of 1964, the Dominion Bureau of Statistics reported Thursday.

The third-quarter deficit was only a slight improvement of \$6,000,000 from the deficit amassed in the first half of the year.

The bureau said larger increases in imports than in exports were the leading factor.

Allowing for seasonal factors, the third-quarter deficit was the equivalent of an annual rate of excess of imports over exports amounting to \$1,000,000,000.

REFLECTS DEMAND
Increases in imports are a reflection of strong Canadian demands associated with record levels of incomes and expenditures, including the large investments in machinery and equipment and some accumulation of inventories, the bureau said.

Exports to the United States and some overseas destinations have continued to rise over last year, and in the third quarter a new factor in exports over the year was the first delivery in the sales of wheat to the U.S.S.R. announced during the quarter.

Canada's surplus on commodity trade with other countries in the first nine months amounted to \$76,000,000 compared with \$59,000,000 in the same period of 1964.

The deficit on non-merchandise trade, international payments in interest, dividends, shipping, advertising and such charges—amounted to \$92,000,000 compared with \$91,000,000 in the first nine months of 1964.

by an inflow of \$19,000,000 in inheritances and migrants' funds, compared with an outflow in the same period last year of \$13,000,000.

Short-term capital movements into Canada in the first three quarters of this year amounted to \$461,000,000 compared with \$94,000,000 a year ago. Long-term movements amounted to \$448,000,000 in nine months this year compared with the 1964 total of \$360,000,000.

But there was a sharp reduction in short-term capital movement into Canada in the third quarter as compared with the earlier six months. This resulted from a sharp increase in Canadian holdings of bank balances and other short-term funds abroad.

In July, August and September, Canada's transactions with the rest of the world in current goods and services netted a surplus of just \$6,000,000, compared with a surplus of \$214,000,000 in the same three-month period of 1964.

Merchandise trade almost was entirely responsible. Transactions with the United States accounted for about one-third of the shrinkage and transactions with the United Kingdom for about one-sixth.

The biggest drain in non-merchandise transactions during the first nine months was \$52,000,000 in payments of interest and dividends abroad. This was a \$25,000,000 gain over \$47,000,000 paid abroad in the same period of 1964.

Freight and shipping charges paid abroad amounted to \$86,000,000, compared with \$86,000,000 last year. But this widening of the gap almost was matched

Noah's Ark May Appear At Expo 67

MONTREAL (CP)—A Noah's Ark in the St. Lawrence River may be among the more unusual pavilions at Expo 67 if its promoters can find a commercial sponsor prepared to spend about \$700,000.

The ark is the brainchild of Gerald Ries, managing director of the Zoological Society of Montreal. Its theme would be the importance of conserving the world's wildlife.

If a sponsor is found, the exhibit will be designed and managed by the World Wildlife Fund.

The fund's director, Ian MacPhail, who is based in London, is in Montreal to explore the possibilities of making the project a reality.

Mr. MacPhail said the pavilion could attempt to illustrate the dangers of extinction to many animal species. Some 1,000 animal species are currently threatened with extinction, he said.

ATTEMPT ESCAPE COLOGNE (Reuters) — Some 4,000 East Germans tried to escape to West Germany and West Berlin during the first 10 months of 1965 but only 1,233 succeeded, it was reported here Wednesday. The headquarters of West Germany's federal frontier service said the figures based on information from escaped East German border guards compared with 1,674 escapes in the same period last year.

Opening lead — queen of hearts.

It's not so easy to see how South made six spades even if you look at all four hands. Certainly the contract was sound enough, since there would have been nothing much to the play of the hand if the diamonds had been divided normally, that is, 4-2, or 3-3. In that case, it would have been easy to take either four or five diamond tricks and thus assure the contract.

But the diamonds were divided 5-1, as South quickly discovered when he won the heart lead with the king, cashed the Q-A of trumps, and played the Q-K of diamonds.

South thereupon discarded the five of hearts from dummy and played a low club, forcing West to win with the ace and concede the last two tricks.
