

Nova Scotia Making Gains, Toronto Told By Delegation

TORONTO (CP)—Nova Scotia is on the move and industry, both primary and secondary, is making solid gains. E. A. Manson, Nova Scotia Trade and Industry Minister, said here.

Mr. Manson and a delegation from Nova Scotia's Industrial Estates Ltd., a provincial Crown corporation, were in Toronto to preview a film called "New Nova Scotia" to industrialists, bankers, investment dealers, and the press.

"We have a responsibility," said Mr. Manson, "to show Canada—in fact the rest of the world—what Nova Scotia is, what it is doing, and where it is going."

Frank Sobey, president of Industrial Estates Ltd., said Nova Scotia "has the ingredients for good sound industry."

"We have power rates comparable and in some places lower than rates in Ontario. Our freight rates for shipping to western Canada are also comparable to those from such points as Montreal and Toronto. There is opportunity in Nova Scotia for industrial develop-

ment. There are 2,000,000 consumers in the Maritime provinces and Nova Scotia is the centre of that market."

Since his establishment five years ago, Industrial Estates, has assisted in establishment or expansion of 25 industries in Nova Scotia at a cost of \$10,000,000. Mr. Sobey said.

Business conditions generally are good in Nova Scotia in the coal mining areas where substantial help is needed to establish employment on a permanent basis, he added.

Mr. Manson said that although the film, showing new industries, new homes and new highways, was completed only recently, "the best illustration of the progress that we are making in Nova Scotia in the fact that it is already outdated in some respects."

"We, as well as many other provinces in Canada, have our serious local problems," the minister added. "However, in addition to our problems we

also have many assets and the film illustrates a few of them."

OTTAWA (CP)—The navy said Tuesday that Defence Minister Harkness will be a guest of honor at the commissioning of the destroyer escort Mackenzie at Montreal Oct. 6. The navy also has many assets and the film illustrates a few of them."
