Surface Softened means a softer, gentler, more absorbent tissue

NEW WHITE SWAN
LISTEN! YOU CAN HEAR IT'S SOFTER.
SHOUTS 'HARSH!'
WHISPERS 'SO SOFT'
You can hear the difference! Take two sheets of any ordinary tissue, grasp between thumb and forefinger and rub together. Hear that scratchy sound? That means this tissue is far from soft. You can actually hear its harshness.
New! Listen to New White Swan! Because it's "Surface Softened" you can scarcely hear it. Just a mere whisper that seems to say, "so soft, so soft" ... and proves that New White Swan is so much softer ... a better buy than ever!
