THE Patriot never heard, we suppose, of two forms of deeds being in common use. In the one, the vendor warrants and defends the purchaser; in the other he sells whatever interest he possesses. All deeds given by Government are of the latter kind, as well as a large proportion of private conveyances.

An immense quantity of tweeds will be sold at a slight advance on cost at D. A. Bruce's, 72 Queen Street.

THE Patriot has refused insertion to Mr. Ferguson's letter, which we publish to-day, and gives as a reason that it is "vulgar" and "insolent." In the paper containing this intimation appears another intercepted letter, which is simply a disgrace to any paper that publishes it.

NOTICE.

IT having been brought to the notice of the Directors of the Gas Light Company that there were persons desirous of consuming gas, who were occupying stores and dwellings unprovided with the requisite fittings, the Board have resolved that in such cases the Company will bear the first expense of putting in the necessary pipes &c.

Persons desirous of becoming consumers of gas can employ any fitter they choose, and having certified the bill as correct, the Company will pay the same; the consumers reimbursing the Company by twelve equal instalments, payable monthly.

That all consumers may participate in the great advantage of using Bray's Patent Burners, which, with the same consumption of gas, will give twenty per cent. more light than other Burners, the Company will supply them at the nominal sum of ten cents each. Ch'town, Dec. 7, 1881—1m eod

N. B.—A few of the above burners, to consume 10 feet of gas each per hour, have been imported, and will be loaned and fixed on free of charge for those consumers who may wish to have a good and attractive light in their shop windows during the Xmas and New Years season.

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BRAY'S BURNERS," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas.

Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £100,000 (\$650,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best union Burners attainable at moderate cost, I have selected them for a series of experiments."

The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Willis, F. C. S., F. I. C. E., showed that Bray's Burner's yielded the greatest amount of light of all the two or three score of Burners reported upon which included all the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Taiter, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devco's Brilliant Oil and ordinary Oils, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devco's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles.

A good Argand or Johnson's Burner, the Burner's used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, on the authority of scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and dangers, renders its use desirable wherever it can be introduced."

As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.53 per 1000 feet as now charged here when consumed, more especially through Bray's Burners.

Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific Instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Six Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent. greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced."

UNTIL FURTHER NOTICE a Passenger Train for Georgetown, to connect with steamer "Northern Light," will leave Charlottetown at 4.50 p. m. daily, Sundays excepted.

A Passenger Train will also leave Georgetown for Charlottetown daily, Sunday's excepted, on arrival of the "Northern Light."
