Well-Known Mining Name Linked In Windfall Probe

By KEN SMITH
Canadian Press Business Editor

TORONTO (CP)—Few people will be more interested in the results of investigations into the tangled affairs surrounding recent trading of Windfall Oils and Mines Ltd. shares than pert and vivacious Mrs. Viola MacMillan.

As boss for the last 21 years of the Prospectors and Developers Association — North America's largest organization of mining men—Mrs. MacMillan, 51, has been a long-time fighter for a better break for small mining companies.

She has no direct connection with Windfall, the shares of which boomed on rumor and fell on fact, but her husband George is president of the company.

She also is reported to be one of the largest individual shareholders in the company, although she has neither confirmed nor denied that.

And her name has frequently been mentioned in newspaper stories about the gyrations of the stock's price on the Toronto Stock Exchange.

TO INVESTIGATE

A royal commissioner will likely be named this week to conduct a one-man study of recent Windfall trading, according to an Ontario government source.

His investigation will be the third into the hectic mining activity in the Timmins area since the announcement last April of a $2,000,000,000 base-metal strike there by Texas Gulf Sulphur Co. of New York.

A fourth, into some United States aspects of trading, is being carried on by the Securities and Exchange Commission in Washington.

The royal commission is expected to have wider powers than either of the two other Canadian studies, by the Ontario Securities Commission.

One is examining the affairs of the 80 or 90 companies active in the Timmins vicinity immediately after the Texas Gulf announcement. The other is checking recent trading in Windfall and two other companies with holdings nearby — Glenn Uranium Mines Ltd. and Bunker Hill Extension Mines Ltd.

Windfall shares were selling for 56 cents July 2 when rumors started that the company got promising results in diamond drill exploration.

STOCK RISES

Sparked by the speculative fever that followed Texas Gulf's find, the stock rose to a high of $5.60. It was selling at $4.15 July 30 when Windfall President George MacMillan made public assays indicating no commercial ore was found.

Windfall dropped more than $3 in one day's trading. It closed Friday at 78 cents.

From the time of the first rumor to the assay report being published, more than $37,000,000 worth of Windfall shares were traded.

The investigations are trying to determine who traded in the shares as well as who started the rumors. They also will seek to establish whether there was any unnecessary delay in releasing the assay, results and, if so, who was responsible.

There also have been questions raised whether any persons profited because of inside information not made available quickly to the public and other shareholders.

Mrs. MacMillan, one of the best-known names in Canada's mining industry, sold Windfall its Timmins-area property for $100,000 and 250,000 unissued shares, 90 per cent held in escrow.

FILES STATEMENT

According to a filing statement given the Toronto Stock Exchange by Windfall, she got the property from two Timmins men — Alfred Rousseau and John Larche—for $100,000 and 250,000 of her issued shares free of escrow.

The transaction was subject to approval of a majority of shareholders, excluding Mrs. MacMillan, her husband and some others.

Noted for her restless energy, Mrs. MacMillan for years has gone into the bush prospecting with her husband, despite her five-foot, hundred-pound frame.

She has often said one of the things she deplores most is men who do not treat her as an equal because of her sex.

Born on a farm in Ontario's Lake Muskoka district in 1903, she was the 13th child of Mr. and Mrs. Thomas Huggard. She took a commercial course in North Bay and at 17 went to work in Windsor, Ont., as a clerk, then as a telephone operator and a legal secretary. It was in Windsor she met George. They were married in 1923.

Shortly after she got her first taste of mining when George was asked to go north by an uncle to do some work needed to keep some claims the uncle had.

For the next few years, the MacMillans prospected in the summer while in the winter she sold real estate in Windsor. At one point she sold Christmas cards and took in boarders.

HEAD FOR NORTH

In 1929, the couple headed north for more prospecting, winning their first success in the early 1930s after staking some claims in Hislop Township near Kirkland Lake. Mrs. MacMillan sold some claims, swapped others and ended up with an interest in the Hallnor Gold Mine.

For the next 15 years she and her husband prospected through northern Quebec, New Brunswick, Northern Ontario, the Yukon and the Northwest Territories.

In 1949 she bought an old base-metal mine in British Columbia for $65,000—much of it borrowed — sunk a new shaft and hit it rich. The mine, renamed the ViolaMac, produced $10,000,000 worth of ore.

Mrs. MacMillan since has been associated with several other mineral producers, including the ViolaMac Gold Mine and the Kam-Kotia copper mine near Timmins.

She has sold many interests in recent years and now is listed as a director only of Brouhan Reef Mines.

Her husband, regarded as an extremely able mining man, has never attained the limelight held by his wife.

But friends and co-workers say his easy - going ability makes a perfect match for Mrs. MacMillan's drive and energies.

Current Unrest In Cyprus Stems From Independence

By THE CANADIAN PRESS

Cyprus, an eastern Mediterranean island republic, won independence from Britain Aug. 16, 1960, after agreements by Britain, Greece and Turkey guaranteeing the independence.

The agreements were intended mainly to safeguard the rights of the Turkish - origin population who make up 100,000 of the island's 500,000 people. Most of the rest of the population are of Greek origin.

During the fighting for independence from Britain,the majority Greek - Cypriot population demanded union with Greece.

However, in the Zurich and London agreements of 1959-1960, Archbishop Makarios, a Greek Orthodox -churchman who became president of Cyprus, agreed to the present set-up which provided, among other things, for the preservation of British bases on the island and of Greek and Turkish armed units in proportion to the population.

The constitution gave the post of vice-president to a Turkish-Cypriot and the Turkish - Cypriots also received what turned out to be a virtual veto over legislation in the Greek - Cypriot - dominated parliament.

FIGHTING ERUPTS

Discontent with the legislative position erupted last Christmas into violent fighting between Greek and Turkish-Cypriots.

Because Cyprus is a member of the Commonwealth, Makarios called on London to help when the fighting got rough. Britain agreed and its forces tried to maintain order.

In March, however, a United Nations peace - keeping force took over. Britain contributed to the force and so did Canada, which has 1,100 men on the island. But the UN also encountered difficulty in keeping the opposing sides apart.

The UN complained its men were denied freedom of movement by the Greek - Cypriots and otherwise restricted in their task of keeping order.

The bidding:

North	East	South	West
1♠	Pass	1♠	Pass
2♦	Pass	3♦	Pass
3NT	Pass	4♠	

Opening lead—Jack of hearts.

Dear Mr. Becker: We had a big argument on this hand where South was in four spades. West led a heart. South took it with the ace, played a spade to the ace, and then led a low spade, won with the king. Later South lost a spade to the queen and a diamond trick, but he wound up making four spades.

The argument was over whether South played the spades right, or whether he was just lucky. Shouldn't he have finessed the ten of spades at trick two? I know he would have gone down if he had done this, but wouldn't that be the winning play in the long run? Sincerely yours, Constant Reader.

Well, the answer is that South was right on both counts. He was right on the actual hand, since he made the contract, and he was also right so far as percentages are concerned.

Problems like this are susceptible to arithmetical computation. Since declarer's sole aim is to avoid the loss of more than two trump tricks, if possible, he starts out by ignoring all spade combinations where the play of the ten or the ace is immaterial. These would include those hands where the trumps are divided 6-0, 5-1, or 3-3.

The pertinent hands are those where the spades are divided 4-2, with West having the doubleton.

West's doubleton can consist of K-9, K-8, K-7, K-6, Q-9, Q-8, Q-7, Q6 (in which case the ace play is better than the ten), or it can consist of 9-8, 9-7, 9-6, 8-7, 8-6, 7-6 (in which case the ten play is better than the ace.) The only other case, where West has the K Q alone, is not important because either play makes the contract.

Since there are eight pertinent cases where the ace play wins, and only six cases where the ten play wins, it is better in the long run to play the ace and then a low spade.

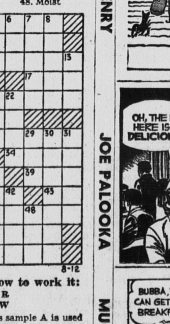
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
