

Some cough mixtures smother the cough. But the next breeze fans it into life again.

Better put the cough out. That is, better go deeper and smother the fires of inflammation. Troches cannot do this. Neither can plain cod-liver oil.

But Scott's Emulsion can. The glycerine soothes and makes comfortable; the hypophosphites give power and stability to the nerves; and the oil feeds and strengthens the weakened tissues.

50c. and \$1.00, all druggists.
SCOTT & BOWNE, Chemists, Toronto.

Quebec Steamship Co'y (Limited)

Proposed Sailings from MONTREAL and QUEBEC During Season of 1899. FOR PICTOU, N. S.

MR. BELL M. P.

On Horned Cattle and Tuberculosis.

Sir,—The Patriot and Pioneer, have, in their extreme anxiety to support the Government, acted in a dishonest manner when giving their readers a report of the discussion in the House of Commons on Tuberculosis. They give great prominence to a speech by Mr. Bell, of P. E. Island. The ignorance which that gentleman shows about cattle and their management is only what we might expect from him. But we did not suppose it possible that a lawyer would be an ignoramus where a very simple question as to the legal points is concerned.

Can you favor your stock-owning readers by inserting the enclosed report of the discussion and the criticism on that discussion by a competent stock-writer.

AGRICULTURIST.

Tuberculosis Discussed in Parliament.

The members of the Canadian House of Commons spent the greater part of one day's session recently discussing the question of the prevention of tuberculosis in human beings and animals. While it cannot be said that many really new points were made, still the observation of the various M. P.'s, and the Minister of Agriculture, Hon. Mr. Fisher, will tend to emphasize certain aspects of the subject that should not be lost sight of, and others regarding which their appears to be danger that the zeal of some persons will run ahead of their judgment and knowledge. The Minister of Agriculture announced that he had taken the precaution to have Canada represented at the late Tuberculosis Congress in Berlin, Germany, by Dr. Farrel, of Halifax, whose report to the government should throw light upon this disease and its most modern and effective treatment.

Regarding the tuberculin test for cattle, The Farmers Advocate is inclined to agree with Messrs. W. C. Edwards M. P., and J. G. Rutherford, M. P., that to encourage its use by the general public would be a mistake. It reaches this conclusion after a very careful enquiry into the experience of persons engaged officially in tuberculin-testing in the State of New York and elsewhere. Its use as a diagnostic agent is comparatively a new thing. An error in the quantity or strength of the dose injected may give an incorrect diagnosis of the real condition of the animal operated upon, and under certain natural or exciting conditions the temperature of a perfectly healthful animal may rise. Furthermore, the particular way, as well as the degree, in which the temperature rises must be closely noted, because if it be sudden, followed by a sudden descent, then, the cause is some local or accidental disturbance. It has also been found that tuberculous animals, after one or more tests, do not show the reaction. Obviously, then, none but competent experts, officially designated, should be operating in this test, which requires scientific exactness.

Dr. Spoule, M. P., touched a point that cannot be too often or too strongly urged, viz., the need for systematic and thorough inspection of the sources of the milk supply of cities and towns. We have no doubt that a great deal of infant mortality is due, not to tuberculosis milk, as some alarmists allege, but to milk improperly cared for or low in quality—poor in solids and fat through the agency of the pump, and drawn from cows whose water supply is im-

John McKenna
Queen Street,

pure and whose food is often largely made up of refuse from breweries. In other words, the little ones are simply the victims of malnutrition. Our attention has frequently been drawn to the stables of some of these town milkmen that were in a wretchedly unsanitary condition.

Hon. Mr. Fisher briefly reviewed his policy, which had been for two years to disseminate information, to require the testing of imported animals, and making provision for the free testing by veterinary officers of Canadian herds for those desiring it, under special regulations. As a result some 16,000 cattle had been tested with tuberculin, and out of this number only 1,017 reacted, or about 6 1/2 per cent., which was a low percentage when it is borne in mind that was largely suspected herds, located in unsanitary byres near large cities, that had been tested.

Mr. Clancy, M. P., contended that the disease could not be stamped out while owners were allowed to retain on their premises animals known to be diseased. The policy was half-hearted, and should be more thoroughgoing in order to minimize the disease and reduce the danger to other stock and human beings.

The patient old cow has in her time been subjected to a good deal unmerited abuse, and that she is the great source of human tuberculosis we believe to be a slander. She has been charged with taking tuberculosis to countries where, it is alleged, it was not previously known; while if the truth were ascertained the persons who introduced cattle probably took the disease in their own bodies. As Prof. Conn himself states, it is doubtful if the danger of taking the disease would be appreciably less if we should exclude milk and flesh entirely from our diet. Dr. J. H. Reed, V. S. clearly points out, elsewhere in this issue that different organs of the animal may be affected. There seems to be a general opinion that is only when the udder is involved that the milk becomes germ-laden. Hon. Mr. Fisher told Parliament that for a year past he and his officers had been searching for cows with definitely effected udders for experimental purposes, but had been unable to find one. The probabilities are, as he stated, that in no country in the world are cattle so free from tubercular disease in any organ as in Canada. But despite all this, we have panicky regulations spasmodically proposed by enthusiasts—well-meaning, perhaps, but ill-informed, or else "worked" by persons who would create a bogus alarm in order to their own professional or personal interest, while the public bears the inconvenience and the expense. At the same time, the farmer or stockman who studies the well being of his animals profitable production, and his own interest generally, will take every needed precaution (by breeding stock healthy in every respect, by the use of wholesome food and pure water, reasonable exercise, thorough cleanliness in his stables, plenty of pure air and light) in order to maintain and improve the position we now hold.

Suffering caused by Piles

Is Quickly Ended when

Dr. A. W. Chase's Ointment is applied

Besides the intense agony caused by the itching, burning sensations of piles, there are other symptoms which produce restlessness and at times excruciating pains known only to the victim of piles.

What would one give to be free of this terrible disease? And yet there is a cure—a positive cure—which does not cost much and is not painful or difficult to apply.

Dr. A. W. Chase's Ointment is, so far as is known, the only absolute cure for blind, itching, bleeding and protruding piles. It gives relief at the first application and affords a perfect cure in the most aggravated cases.

Mr. Isaac Foster, Erieview, Ont., says: "I was troubled with itching piles for two years and could not sleep at night. I was half-crazed and tried everything. Finally seeing Dr. Chase's Ointment advertised I tried it and found it good. After a second application I found relief, and one large box cured me. Have never been bothered since, and I can recommend it to all suffering from the same trouble."

Dr. Chase's Ointment is for sale by all dealers, or Edmanson, Bates & Co., Toronto.

Weary of Experimenting

With salves, suppositories and ointments and dreading a surgical operation, scores and hundreds have turned to Dr. A. W. Chase's ointment and found it an absolute cure for piles. The first application brings relief from the terrible itching, and it is very seldom that more than one box is required to effect a permanent cure.

There is a better half in every wedding—but the best man doesn't get her.

Minard's Liniment is used by Physicians.

Great Britain, the United States, and France represent one-half of the total wealth of all nations.

Keep Minard's Liniment in the House.

DR. A. W. CHASE'S CATARRH CURE ... 25c.
Is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

The evil that men do is soon forgotten by themselves.

HIS OWN FREE WILL

DEAR SIR,—I cannot speak too strongly of the excellence of MINARD'S LINIMENT. It is THE remedy in my household for burns, sprains, etc., and we would not be without it.

It is truly a wonderful medicine.
JOHN A. MACDONALD,
Publisher Inquirer Chronicle.

A literary statistician declares that for the year 1898 eight novels a day were published, Sundays and holidays not included.
