PLEASANT TO TAKE

DROPPED ON SUGAR.

JOHNSON'S ANODYNE LINIMENT CURES COLDS CROUP COUGH COLIC CRAMPS

All who use it are amazed at its wonderful power and are loud in its praise ever after. For Internal as much as External Use Originated in 1810 by an old Family Physician. Be not afraid to trust what time has endorsed.

Every Mother should have it in the house for the many common ailments which will occur in every family as long as life has woes. Dropped on sugar suffering children love it. Do not forget the very important and useful fact, that Johnson's Anodyne Liniment cures every form of inflammation, Internal or External. It is a fact, proven by the investigations of medical science, that the real danger from disease is caused by inflammation; cure the inflammation and you conquer the disease.

JOHNSON'S ANODYNE LINIMENT

Could a remedy have existed for over eighty years except for the fact that it does possess extraordinary merit for very many Family Ills? There is not a medicine in use today which has the confidence of the public to so great an extent as this wonderful Anodyne. It has stood upon its own intrinsic merit, while generation after generation have used it with entire satisfaction, and handed down to their children a knowledge of its worth, as a Universal Household Remedy, from infancy to good old age.

Our Book "Treatment for Diseases" Mailed Free. Doctor's Signature and Directions on every bottle. At all Druggists. I. S. Johnson & Co., Boston, Mass.

DODD'S

For the successful Treatment of all Diseases of the Kidneys and Urinary Organs,

Kidney

Bright's Disease, Diabetes and Paralysis, and all forms of Blood Poisoning.

Pills.

☞ These Pills are put up in large wooden boxes at 50 cents. Sold by all Druggists and Dealers—never by count or in bulk, and never under any other name than DODD'S KIDNEY PILLS.

The Dodd's Medicine Co., Toronto.

Gentlemen—A new medicine called Dodd's Kidney Pills has been recommended to me by my physician, and, by his advice, I send one dollar, the price of two boxes. Please send them without delay.

Yours truly, ANDREW FILKINS

Canton, McPherson Co., Kansas.

We can sell you Dodd's Kidney Pills at the following prices, viz:—50c per box, six boxes or $2.50. To the trade—$4.00 per dozen or three dozen at $3.75 per dozen. Sent by mail to any address, post paid.

A NEW DISPOSITION

CAN NOW BE PURCHASED—SO SAYS A FRENCH DOCTOR.

The Queer Effect of a Horseshoe Magnet on the Brain—A Sure Cure for a Case of the Blues.

"Dispositions for sale. This is the extraordinary sign which may some time appear in the windows of the drug shops. A series of extrordinary experiments which have been made by one of the best known scientists in France during the last year, but which have not before been made public, seem to promise some such marvellous result.

The strangest discovery of all the strange discoveries which have been recorded during the past decade by the progressive scientists of France, is one of which Dr. Luys has authorized the Journal to make the first announcement. Dr. Luys, it will be remembered is the scientist whose strange experiments concerning the effect on hypnotized patients of drugs in hermetically sealed tubes, were recently described in the Journal. He has until lately been at the head of the famous Charity Hospital of Paris. He was Charcot's favorite pupil and assistant, and probably knows more about hypnotism than any other man who lives to day.

One of the things which he has learned is that it does not pay to leave any experiment untried. He has followed many blind alleys of scientific research, and gone full cry on many a false scent; but he has at the same time given to the world more new facts concerning the science which is his specialty than any other one man except Charcot. He was the first to perform serious surgical operations while patients were under the influence of hypnotism, and he was the first to introduce hypnotism into regular hospital practice. His discoveries, which were recently the subject of an article in the Journal, came about, he acknowledges, through his keen observation of accidental fact. His present discovery is, to an extent, of a similar nature.

More than a year and a half ago a young woman went to Dr. Luys to receive a special treatment for chronic melancholia. He receives many patients at his house, which is located not far from where Du Maurier's old studio stood. The girl was about twenty-seven years old, and her malady was a peculiar one. It followed a severe attack of nervous prostration and was at first mere mental depression. This increased as time passed, and was accompanied by an inexplicable lack of ability to sleep.

After a month or two of this a complication ensued which was especially distressing. The girl was of an affectionate disposition naturally, and was herself the first to discover that there was growing in her heart an unreasoning aversion for those people whom she had formerly loved. Her father especially had been dear to her, and never in her life had he shown greater kindness than during her long illness. Yet she awoke one day to a realization of the fact that it was no longer pleasant to her to see him; that, indeed, her eyes involuntarily dropped when he came near, and her lips took on the sullen expression of a displeased child. Her younger sister, with whom she had probably spent more of her time than with any other member of her family, amazed her one day by bursting into tears, and by giving as the reason for her unhappiness the fact that she was evidently no longer welcome in her company. Her mother noticed the change in her general attitude toward her and grieved over it.

The girl herself did not for a second fail to realize the unreasonable nature of the change in her mental attitude. She did not for a second even try to find a sufficient cause for it in the actions of her family. She knew that it grew out of some sudden alteration in her own mental condition. But, in spite of her efforts to overcome it, her aversion to those who were nearest to her and should have been dearest to her, continually increased.

Matters reached such a pass at last that she could not enter the room in which any of her family were present without shuddering and shrinking, so great was her dislike for them. At last she became convinced that she was on the verge of insanity, and went of her own accord to consult Dr. Luys. With him she talked frankly, and toward him she felt none of that strange aversion.

Of course, his first move was to see her family and learn what he could of the circumstances which had led to her unfortunate condition. Then he began a conventional system of treatment, consisting of nerve-tonics, physical exercise and similar health-giving measures. These had little effect upon the girl. She told him with the tears rolling down her cheeks, day after day, that the unaccountable aversion for the members of her family was increasing rather than decreasing. The moment she permitted her mind to dwell upon any of those persons whom she ought to have loved best, it was filled with a dislike, such as one feels for certain dishes or odors. There was no resentment in her mental attitude, she merely disliked, she did not hate, but her dislikes soon reached the point where it made her home life unbearable.

All this, of course, had a serious effect upon her physical health. She pined and suffered in body as she pined, and suffered in mind. In three months she lost fifty pounds. She became so weak that it was with great difficulty that she paid her daily visit to the doctor, and he was at his wits' end. He had accomplished much in many more or less similar cases by means of straight hypnotism, or treatment by suggestion, but he never followed this treatment without the consent of the patient; indeed, it would be impossible to do so. This girl was strongly opposed to the use of hypnotism, and he did not attempt it. He finally decided that there was only one possibility of securing improvement in her mental and physical health, and that lay in a complete change of surroundings. At his request her father began to make arrangements to send her to England for a long time. It was during one of the last of her visits to the doctor that the accident occurred which Dr. Luys thinks has resulted in a discovery of a new property of magnetism.

Of course, as progressive an experimenter as Dr. Luys had long before tried nearly every possible method of electrical treatment. His office, which is a wholly independent building in the big garden back of his house, is full of the most elaborate electrical appliances. Many of his instruments are of the most delicate nature, and he protects them with the utmost care against the possibility of influence by outside electric currents. In order to do this he has at the back of his office a series of glass shelves completely insulated.

Some months before the young woman's case had reached this point Dr. Luys, in a pure spirit of experimentation, had had a huge horseshoe magnet constructed in such a way that it would fit about the upper part of a person's head, with one of its ends or poles on either temple. It is his theory that the human body is a magnetic storehouse, and that it, like the magnet, has its north and south pole—its positive and negative sides. It was he who discovered the strange fact that this magnetic force was of value in the diagnosis of disease; that to the hypnotic subject in a certain state colored flames would issue from any diseased portion of another person's body. It was in the course of his labors in support of this theory—a theory which has been indorsed, despite its seeming absurdity, by some of the best scientists of France—that he had this magnet built.

As the girl sat in his office that day in August, while he was filled with that feeling of utter helplessness which comes to the physician who has exhausted his resources unsuccessfully in his attempt to treat a patient, his eye fell upon this magnet. He carefully lifted it from its glass shelf and placed it on the girl's head, with no idea that any important result would come from the action. A moment after that some important callers arrived, and seeing to it that she was comfortably seated, he went out to confer with them. Probably three-quarters of an hour elapsed before he returned to his patient. I will tell the story at this point as nearly as I can in the doctor's own words:—

"I should not have been at all surprised" said he, "if I had found that during my really unwarrantably long absence the girl had taken off the magnet and gone home. When I re-entered the office, however, she was sitting in very much the same attitude which she had assumed before I left her. A remarkable change, however, had occurred in her appearance. She was even paler than usual, her eyes were more deeply sunken than they had been, and it was evident that she was weaker than before. Indeed, I was very much alarmed by her appearance. A part of this I attributed to the effect of the weight of the heavy magnet on her head, but this I knew did not wholly explain the change which had occurred in her condition since I had seen her a short time before. I hurriedly removed the magnet from her head, replaced it on the shelf, and then, sending a servant for a carriage, administered some mild stimulants and prepared to send her home. She told me that she felt very weak, but that her head seemed clearer than it had been before for a long time. Giving her attendant some instructions about what to do for her that night, I parted from her at my door, feeling somewhat fearful lest my experiment had done her harm.

"After she had gone I sat down to think out the reason for this strange experience. It seemed highly improbable that her weakness had been caused by any effect of the magnet, when I considered the matter, yet that magnet was an unknown quantity. I went to the shelf, got it again and put it on my own head, deciding to wear it for at least as long a time as she had worn it, so that I might note its effect upon myself. For forty-five minutes I sat perfectly quiet in the same chair which she had occupied. I noted with considerable surprise that even my own strength—and I am a robust man—seemed to be waning as the moments flew. At the end of the three-quarters of an hour I was quite unnaturally weak, but was as far from a solution of my difficulty—the real reason why she and I had both been weakened by the magnet—as I had been in the first place. My dinner hour had arrived, however, and I placed the magnet on the shelf again and went across the garden into my house. I have several children and a wife, and am very fond of them.

"They were gathered in the dining-room as I entered and greeted me with the usual chorus of welcome. I cannot describe to you my amazement when I found that their happiness at my coming had no echo in my own brain. My habitual pleasure at seeing them did not exist. Instead of that I felt toward them in a minor degree exactly the aversion which my patient had told me that she felt toward the members of her own family.

"Instantly the idea occurred to me that I might have discovered a new and most surprising property of the electro-magnet. My experience seemed to indicate that the magnet while resting on the girl's head had absorbed some subtle influence from her brain and stored it up to transfer it later to my own mind when I in turn placed the instrument upon my head."

Thus Dr Luys tells the story of his first experiment with his new instrument and its result. He has made many experiments since then. In the carefully written book in which he keeps a record of his work at his office the stories of these experiments are concisely told in scientific terms. It would not interest the public at large to go into the details of pulse, temperature and other medical technicalities which these records contain, but their general evidence is fascinating. If this evidence is borne out by subsequent experiments the sentence "Dispositions for sale," with which this article opens, may not in the future seem as absurd as it does now. What studies Dr. Luys has been able to make have tended to prove the following facts:—

First—An ordinary electro-magnet so fashioned that it will rest upon a person's head with its poles touching his temples will to some unknown extent absorb any strongly morbid influence which may at the time be working in his brain.

Second—After the magnet has been left for a sufficiently long time on the head of a person suffering from a morbid mental complaint, and is then placed upon the head of a person in a normally healthy state of mind, the morbid tendency of the sick man's mind will be to a considerable extent transferred to the healthy mind of the other person.

Third—No appreciable effect is produced by transferring the magnet from the head of one perfectly healthy person to another.

Fourth—The transfer of the magnet from the head of a healthy person to that of one suffering from melancholia or other morbid mind disease is nearly always perceptibly beneficial.

These comprise about all the facts which have up to the present time been ascertained by these extraordinary experiments. Dr. Luys is as far as ever from understanding the reason of this strange effect of the electro-magnet, but he feels certain that further and careful study along these lines will result in important additions to the world's sum of electro-medical knowledge.

When I asked him if, in his opinion, it would ever be possible to so develop this new plan that an artificial transfer of dispositions would be made between two people of different temperament—as, for instance, the insertion of a good temper into the brain of a grumpy individual, the provision of a philanthropic disposition to a miser, and so on—he laughed.

"No," he said; "these things will not be possible, but the things which seem fairly possible are scarcely less wonderful. For instance, if my studies along this new line carry me far enough, so that by means of the electro-magnet I shall be able to inject healthy mental force into the mind of a morbid melancholiac, so that I shall be able to transfer good brain influence from head to head as we now sometimes transfer healthy blood from wrist to wrist, I shall feel that my time has been valuably expended. That I shall within a year have the satisfaction of definitely accomplishing these things, and of accomplishing them every time I try, I have now little doubt."

With Invalids.

Yes! with invalids the appetite is capricious and needs coaxing, that is just the reason they improve so rapidly under Scott's Emulsion, which is as palatable as cream.

The Habits of Russia's Czar.

The most important personage in Europe to-day is the young czar of Russia. The Nihilists believe they have frightened him already out of his mind, and are rejoicing thereat, claiming that he suffers from loss of memory. It is said Prof. Mandel, the famous Berlin alienist, was sent for some time ago to see him, and that great secrecy attended his movements. However, he is now at the royal house party at Balmoral, having come there from Denmark. An observer at Copenhagen thus describes his habits and manners:—

"The emperor has not been here long, but it is already easy for us to see that his habits are totally different from those of his father. Alexander III. loved hunting, riding and walking. His successor scarcely ever walks or hunts or rides. In fact, he eschews almost entirely everything demanding physical exertion. Of medium height and delicate constitution, Nicholas II. will never be chief of an army or master of any sport. He delights to shut himself up in his study to read, to write, to think over state affairs, and to attend promptly to matters brought him by the daily couriers from St. Petersburg. After dinner he smokes a few cigarettes, and then generally plays billiards for an hour. At 11 o'clock he retires for the night, and sleeps as peacefully as a child until 8 or 8:30 a. m."

Religious Toleration in China.

Since the restoration of peace and his return to Peking, in an interview reported with a Methodist bishop, Li Hung Chang said:—

"Say to the American people for me, to send over more missionaries for the schools and hospitals, and I hope to be in a position both to aid them and protect them." As confirmatory of these sentiments, it is announced that since the war terminated all restrictions upon the propagation of the Christian religion have been expunged from the Chinese code. On the other hand, the war seems to have had the contrary effect on the Japanese, and we find the imperial diet engaged in decreeing the erection of Shinto temples in Formosa, in order that the spirit of a celebrated prince, and those of others who fell in the service, may be worshiped as gods; and the captured cannon are being molded into an immense Buddha to adorn the capital.

Origin of a Much-Quoted Saw.

The origin of "A fool and his money are soon parted" has not been ascertained with certainty, but the following story is sometimes told: "George Buchanan, tutor of James IV. of Scotland, made a bet with a courtier that he (Buchanan) could make a coarser verse than the courtier; Buchanan rose and picking up the courtier's money walked off with the remark, 'A fool and his money are soon parted.'"—Ladies' Home Journal.

A CASE OF ABSTES

No Help From Med en—Suffered for Many ears—Cured by Dodd's Kidney Pills.

North Bruce Feb. 15 (Special)—An old and well known settler in this township, named Thomas Brooks, who lives on Lots 7 and 8 in the 14th concession is rejoicing with his neighbors over his recent recovery, and he said:

"I was cured by using twenty-four boxes of Dodd's Kidney Pills, and as nothing else ever helped me, I say they saved my life."

I had tried all the doctors of this locality and was treated for Diabetes, hoping and suffering for years."

From reading of cures I determined to use Dodd's Kidney Pills, and I must say that after using the first box I would have considered them reasonable at ten dollars a box.

Blondin's, the tight rope walker's, stock in trade is offered for sale in Paris. Besides the tri-colored wheelbarrow, the harmonium, cornet and costumes, it includes the cable on which he crossed the river above the falls of Niagara.

O. S. Doan, of Clinton, says not to go on suffering as he did for years with Salt Rheum, when a few boxes of Dr. Chase's Ointment will cure you.

Dr. Chase's Ointment cured Hiram Frey, of Norwood, after suffering ten years with Eczema of the leg.

Chase's Ointment also cured his little girl of Eczema on the face.

Tiny, the smallest toy terrier in the world, died recently in London. He was less than four inches long. His late owner, Lieut. Gen. Sir Archibald Maclaine, has had the body stuffed and has presented it to the London Zoological garden.

Mrs. S. James, Seaforth, suffered for years with what is called old people's rash. She was treated by many physicians without any result. Mr. Fear, the local druggist, recommended Dr. Chase's Ointment, which relieved the irritation at once and speedily effected a permanent cure of the skin eruption. Mrs. James also says that Dr. Chase's Ointment cured her of itching piles which she had been troubled with for years.

You will, I believe, in general, ingratiate yourself with others still less by paying them too much courts than too little.—Lord Greville.

Baby Eczema and Scald Head.

Infants and young children are peculiarly subject to this terrible disorder, and if not promptly arrested it will eventually become chronic. Dr. Chase made a special study of Eczema and disease of the skin, and we can confidently recommend Dr. Chase's Ointment to cure all forms of Eczema. The first application soothes the irritation and puts the little sufferer to rest.

A person may not merit favor as that is only the claim of man, but he can never cement charity, for that is the command of God.—Sterne.

HAD INDIGESTION!

For a Matter of Some Forty Years or More.

Joseph Gardner, stove dealer, of Bath, Ontario, is a great believer in Dr. Chase's Kidney-Liver Pills for indigestion, constipation, dyspepsia, Bright's disease, rheumatism, and kidney, liver and stomach troubles generally.

"I was troubled for over forty years with indigestion and constipation," he writes. "At intervals I suffered from severe headache. I spent dollars and dollars without result until Mr. Balk, our druggist, advised me to try Chase's Kidney-Liver Pills. I did so, and must say that they are the only remedy that gave me relief. I would not be without them for anything."

Many people suffer from rheumatism. Bad blood and diseased kidneys bring it on. Dr. Chase's Kidney-Liver Pills will remedy all this and cure rheumatism, sciatica and all kindred complaints. Here is a sample case:

"My boy was all crippled up and suffered awfully with rheumatism," writes Mrs. H. Wills, of Chesley, Ont. "He also had a touch of diabetes. The doctors could do him no good, but Dr. Chase's Kidney-Liver Pills completely cured him."

Sold by all dealers and Edmanson, Bates & Co., Toronto. 25c.

When all other remedies fail Dr. Chase's Linseed and Turpentine will cure the worst chronic cold. 25 cents.

PUBLIC NOTICE.

Public Notice is hereby given that application will be made to the Parliament of Canada at the next session thereof, for an Act to incorporate The Dominion Building and Loan Association of the City of Toronto, in the Province of Ontario, a Building Society already incorporated under chapter 169 of the Revised Statutes of Ontario 1887, for the purpose of enabling the said Association to carry on business anywhere in the Dominion of Canada, with all the powers of a Loan Company and Building Society.

Dated at the City of Toronto aforesaid, this 1st day of February, A. D. 1897.

MACDONELL & BOLAND,
2 Toronto Street, Toronto, Solicitors for the said Applicants.

INLAND STEAM NAVIGATION COMPANY.

The Annual General Meeting of the Inland Steam Navigation Company, will be held in the room (up stairs) in Mr. John McEachern's Building, Corner of Queen and King Sts, on Thursday, the 18th inst, at 3 o'clock p.m.

L. C. OWEN,
Secretary.

Ch'town, Feb 1—mon tues thur sat.

A Bye Law to prevent children being on the streets after a certain hour at night.

Be it enacted by the City Council of the City of Charlottetown as follows:

1st. That boys and girls under the apparent age of sixteen years respectively shall not be on the streets of Charlottetown without proper guardianship after the hour of 8.15 p. m., from the first day of November till the first day of May, and after the hour of 9.15 p. m. from the first day of May till the first day of November, and at such hour all boys and girls shall be in their homes.

2nd. Fifteen minutes before 8.15 p. m., from the first day of November till the first day of May, and before 9.15 p. m. from the first day of May till the first day of November, the town bell shall be rung as a warning for all children under the said age to leave the streets and go to their homes, and such bell shall be called and known as the "Curfew Bell," and any such child or children found on the streets after such hour shall be liable to be warned by any police constable or peace officer to go home, and if after such warning a child or children shall be found loitering on the streets, such child or children may be taken by the constable or peace officer to his or their home.

3rd. Any parent or guardian may on complaint of any police constable or other peace officer be summoned to appear before the Stipendiary Magistrate for the City of Charlottetown for permitting his or her child or children habitually to break the provisions of this Bye Law after having been warned in writing, and may be fined for the first offence a sum not exceeding one dollar, with or without costs, and for a second offence a sum not exceeding two dollars, with or without costs, and for the third or any subsequent offence a sum not exceeding five dollars, with or without costs, and in default of payment of such fine or fines shall be collected by distress and sale of the goods and chattels of the offender or offenders and in such case it shall be lawful for the Stipendiary Magistrate for the City of Charlottetown to commit such offender or offenders to the common jail of Queen's County, with or without hard labor, for any period not exceeding twenty-one days unless such fine or fines and the cost of the committal and conveyance to the common jail are soon paid.

4th. The Bye-Law shall not apply to children on the streets after the said hour under proper control and guardianship or for some unavoidable cause.

W. F. DAWSON,
Mayor.
H. M. DAVISON,
City Clerk.

Mortgage Sale.

of Land on Lot 38, in Kings co.

To be sold by Public Auction at the Court House in Charlottetown, in Queen's County on Wednesday, the 24th day of February, next, A.D., 1897, at the hour of twelve o'clock, noon, under and by virtue of a power of sale contained in a certain Indenture of Mortgage bearing date the 23rd day of November, A. D. 1878, made between Alexander McDonald, of Township Number Thirty-Eight, in Kings County, Farmer, and Mary McDonald, his wife, of the one part, and James (Allan) McDonald, of Johnson River Settlement, Township Number Thirty five, in Queen's County, Farmer, of the other part.

All that tract, piece or parcel of land and premises, situate, lying and being as follows, that is to say:—Commencing on the north side of Jay's Road, at the south angle of a farm of land, the property of John A. McDonald; thence north a distance of thirty-three chains; thence east twenty-two chains and eighty two links, or to the eastern boundary of a tract or farm of land of twenty-four acres, recently purchased by the said Alexander McDonald from the said James A. McDonald; thence south to the said road, and from thence west to the place of commencing, containing an area of seventy-five acres, a little more or less, and is part of Township Number Thirty-eight, in Prince Edward Island.

Together with the rights, members, and appurtenances.

For further particulars apply at the office of Mr. William S. Stewart, Solicitor, Newson Block, Charlottetown.

Dated 6 January, A.D. 1897.

JAMES (ALLAN) McDONALD
3—law tl sale

FOR SALE.

The Rosebank Farm

Containing 180 Acres of Land.

THE above Farm has 120 acres cleared and in a good state of cultivation, the remainder covered with wood. It is situate opposite the City of Charlottetown on the Southport side of the Hillsborough River, convenient to Schools, etc.; one mile from Southport Ferry in Summer, and one mile from the city in the winter by the ice.

On the Farm is a good two story Dwelling House and a fine first-class barn and other outside buildings. It is all fenced with cedar posts and barb wire, with several cross fences of the same material.

The shore front extends for the distance of one mile, giving an abundance of sea manure, also a mussel bed within half mile of the shore.

It would make an excellent Dairy Farm or would make a fin site for a summer hotel, having superior bathing facilities and a perfect view of the city. The general surrounding are very picturesque, making it one of the most desirable health resorts in the Maritime Provinces.

Any purchaser wishing to buy the Stock and Farming Implements in conjunction with the Farm can do so if required. All questions asked will be promptly answered by the undersigned.

Half of the purchase money can remain on mortgage at 5 per cent.

For further particulars apply to the owner,

FRANK McKENNA.
Queen Street, Charlottetown,

EXTINCT MONSTERS.

Oh, had I lived in the good old days
When the ichthyosaurus romped around,
When the elasmosaurus swam the bays
And the sivatherium pawed the ground,
Would I have spent my precious time
At weaving golden thoughts in rhyme?

When the tinoceras snooped about,
And the pterodactyl flapped its wings,
When the brontops with the warty snout
Moseyed around for herbs and things,
Would I have bothered myself o'ermuch
About divine afflatus and such?

The dinotherium flourished then,
The pterygotus lashed the seas,
The rhamphorynchus prospered when
The scaphognathus perched in trees,
And every creature, wild or tame,
Rejoiced in some rococo name.

Pause and ponder, who could write
A triolet or roundelay,
While a megatherium yawped all night
And a hesperornis yawped all day,
While, now and again, the bray sonorous
Of Glyptodon asper swelled the chorus?

If I'd been almost anything
But a poet, I might have got along;
Those extinct monsters of hoof and wing
Were not conducive to lyric song.
So nature reserved this tender bard
For the kindlier age of pork and lard.
—Eugene Field in Chicago News-Record.

An Argument For College Sports.

Outside of emergencies there is much to be said in favor of brawn, and fortunately it is no longer necessary to argue that brains are better when there is brawn behind them, while on the other hand the time has already come when those who select athletes have little use for brawn without brains. So they supplement each other more and more. The college man caricatured for years as a consumptive, then as a big brute, is today neither. The type is approaching more nearly to that of soundness of body and mind. Twenty years ago a father exhorted his son to study hard and stand high; now the anxiety is that the student should not fail to take plenty of exercise.

The strongest argument in favor of school and college sports is the one advanced by nature herself. She develops the body before the mind. A man reaches the prime of physical power years before the maximum of his mental strength is attained. The best systems, backed by the best exponent of the times, have failed to make physical development popular among men whose college days and days of youth were over, who were in the struggle of their life's work. It then takes too much out of the man to build up his physique. He has not the time. If he had done the building years before, exercise will prevent retrogression. Youth is the time for physical development, the time to expand the chest and increase the biceps, to take the larger proportion of bodily exercise. Then in maturity the proportion should change to a mental exercise with the other for relaxation.—Century.

A Lumber Yard Without Lumber

In it would be a strange sight. But we wouldn't mind the look of it if we sold every board, plank and stick in ours before the opening of navigation.

There's Money In Lumber

But it's hard to get money out of it unless we hustle for it. We will work hard for the next few months and will make it worth your while to buy your spring lumber now. Come and see how we do it.

Let Us whisper in Your Ear

HOW WE DO IT

Listen! We buy our goods for spot cash, and give the customer the benefit of up-to date nineteenth century methods. Our claim is the very best value in Boots Shoes, Rubbers, Overshoes, Gaiters, Slippers, Leggins, &c.

Talk about the purchasing power of a dollar across the line, but if you want to know the real power of a dollar in buying Shoes, you will find it out when you see our prices.

City Hardware Store

R. B. NORTON & CO

English Manures

SUPERPHOSPHATES AND CHEMICALS

Sole Agents for P. E. Island for THE BRADLEY FERTILIZER CO., the largest concern of the kind in the world. We have a large stock, on hand and to arrive, at these well known MANURES, and can refer purchaser to many of our very best farmers who have been using them for years with very gratifying results.

We can also supply the same goods (Ground Slag) offered by our would-be competitors as "English Fertilizers at at least 20 per cent less price than they now ask for it, but at the same time we would not advise its use, believing that THE GENUINE ENGLISH MANURES AS SOLD ONLY BY US are much the best value. Prices, Pamphlets, etc., on application.

CARD OF THANKS.

For the many favors received from my numerous friends and customers during the year 1896, and would wish them a happy and Prosperous New Year, and that they may all continue to buy and drink the celebrated Special Blend of Empire Tea. that I sell. Also as many more, invited to participate in the pleasures of drinking Empire Blend during 1897,

T. J. MORRIS, Grocer and Crockery Man
