## Best of All

Cough medicines, Ayer's Cherry Pectoral is in greater demand than ever. No preparation for Throat and Lung Troubles is so prompt in its effects, so agreeable to the taste, and so widely known, as this. It is the family medicine in thousands of households.

"I have suffered for years from a bronchial trouble that, whenever I take cold or am exposed to inclement weather, shows itself, and have never known it to fail. It will relieve the most serious affections of the throat and lungs, whether in children or adults."—Mrs. E. G. Elderly, Council Bluffs, Iowa.

"I consider Ayer's Cherry Pectoral a most important remedy

## For Home Use.

I have tested its curative power, in my family, many times during the past thirty years, and have never known it to fail. It will relieve the most serious affections of the throat and lungs, whether in children or adults."—Mrs. E. G. Elderly, Council Bluffs, Iowa.

"Twenty years ago I was troubled with a disease of the lungs. Doctors afforded me no relief and considered my case hopeless. I then began to use Ayer's Cherry Pectoral, and, before I had finished one bottle, found relief. I continued to take this medicine until a cure was effected. I believe that Ayer's Cherry Pectoral saved my life."—Samuel Griggs, Waukegan, Ill.

"Six years ago I contracted a severe cold, which settled on my lungs and soon developed all the alarming symptoms of Consumption. I had a cough, night sweats, bleeding of the lungs, pains in chest and sides, and was so prostrated as to be confined to my bed most of the time. After trying various prescriptions, without benefit, my physician finally determined to give me Ayer's Cherry Pectoral. I took it, and the effect was magical. I seemed to rally from the first dose of this medicine, and, after using only three bottles, am as well and sound as ever."—Rodney Johnson, Springfield, Ill.

## Ayer's Cherry Pectoral,

PREPARED BY  
Dr. J. C. Ayer & Co., Lowell, Mass.  
Sold by all Druggists. Price \$1; six bottles, \$5.

## A CONFAB.

"GOOD MORNING, Farmer John. How is the travelling to-day?"  
"Very bad; nearly ruining my horse's feet. They are always very sore after going home from town."

"What do you think is the matter with them?"  
"I think they call it greased heel, or scratches, and some say it can't be cured."

"Oh, that's nothing. You get the MAGIC HEALER SALVE, and you can soon cure them. Did you not see the testimonials from Davies, Finlayson, Duff and Hooper in the papers a few weeks ago?"  
"Why, no; I don't get any papers now, so I didn't see them."

"My dear fellow, you go to any of the drug stores and ask for the Magic Healer Salve, and I'll guarantee that if you wash your horse's feet at night, and rub the Salve well into the sores, they will be thoroughly cured in a week."

"Well, in your recommendation I'll give it a trial; and if it does what you say, money will be no object. Good day, and thank you for the information."

## NOTICE.

THE SUBSCRIBER HEREBY GIVES NOTICE that it is his intention of commencing on the FIRST OF MAY to make a thorough examination of all

Privies, Dirty Yards, Cesspools, Ash Pits, Cellars, &c.,

of which those concerned will take due notice and govern themselves accordingly.  
Any information or long standing, it is potent, effective, and costs but a trifle.  
Miss Culture—What do you think of Henry George's single tax idea? Miss Gushington—Well, I see no reason why he should not tax single men, but I don't think he ought to tax single women—it isn't our fault.—New York Weekly.  
Ch'town, April 3, 1889—eod tf

## LETTERS TO THE EDITOR.

### The Judiciary.

SIR,—The Supreme Court meets here on Tuesday next; and I learn from good authority that no business is likely to be transacted, owing to the continued indisposition of two of the Judges, and suitors whose cases should be heard and determined at this term, will have to wait patiently until the warm weather rejuvenates the Bench.

Is it not too bad that this state of things should continue? No one cares to utter a word which would unnecessarily hurt the feelings of either of the learned Judges in question; but they must be aware of the fact that the public business is suffering, and that the patience, not only of the bar, but of everyone having anything to do with our courts is becoming well nigh exhausted.

They have always been looked upon as able and impartial jurists by all classes in the Province, and have received the respect due to their high position; but they cannot hope to maintain that respect, if, when the hand of time has placed a limit, almost a complete bar, to their usefulness, they still endeavor to perform duties which cannot rightly be performed but by more active men.

It is no use disguising the fact that we have only one Judge capable of standing the strain of a protracted trial, such as often occurs in our courts. Why should we be placed at such a disadvantage?

It is above all things necessary that people having business in the courts should feel, not only sure of obtaining a fair and impartial hearing, but that such can be obtained without undue expense and loss of time. They cannot feel sure of this at the present time, and are fast losing faith in our courts, which for so many years were looked upon with just pride by all.

You, Mr. Editor, spoke out fearlessly on this matter some time ago, and should not allow it to rest, until some reform is effected.

Yours,  
Ch'town, May 2, 1889. Lex.

### Late Steamers.

SIR,—Quite a feeling of dissatisfaction prevails now among the travelling public because of the delay and inconvenience caused by the way the steamer service is conducted between Summerside and Point du Chene. The boat comes over late every evening—Tuesday evening as late as 8.15 o'clock—and the mails and passengers don't reach Charlottetown till after bedtime. This is really too bad, and should not be permitted to continue. The Steam Navigation Co. only obtained a renewal of the contract with the government on the ground of improved service, and this is certainly what was promised. To keep the boat at Point du Chene until every dollar's worth of freight is secured may pay the Company but cannot please the public, and must result in a general protest.

### A Little Advice.

SIR,—Your correspondent "Subscriber," in yesterday's issue, is evidently suffering with indigestion, and I know of nothing better for that fell disease than a good bicycle, judiciously administered. He will not be able to purchase one, it is true, for the extra outlay he will be amply repaid. It will help to soften his heart, and probably cure the softness of his head, and, after he has fully mastered it, his internal apparatus will be found in a highly satisfactory condition. Try a bicycle, by all means, Mr. Subscriber, it will do you a world of good.

### The Shorthorn.

Speaking of the death of the Shorthorn bull, Sir Barton Windsor (50450), Mr. John Thornton, in his last Circular, dubs him "a massive, grand beast of the old stamp of Shorthorns," adding that "he was one of the last surviving sons of Mr. Carr's Sir Windsor Broughton—sire of the \$5,000 Vesper Star—from Isabel, a roan, square-set, fine cow, with a well-shaped udder; quite one of the best dairy cows at Morris Grange."

Are we to infer from the first point mentioned that the modern Shorthorn stamp is not of the "massive, grand" order shown by the old-time favorites? Alas! I am inclined to think that Mr. Thornton has meant to insinuate this very truth, and I wish that, along with an adequate appreciation of the fact that our cattle have lost some of their chief excellencies of the past, all would note the second portion of Mr. Thornton's reference, viz., that this "massive, grand" bull of "the old stamp" had a dam that was "quite one of the best milkers" in a noted herd! Truly, all great bulls and men must have great dams; and I imagine that until there is a more general return to the practice of breeding stock sires from those grand old broad-backed, deep-milking matrons of "ye olden time," we cannot hope to regain the reputation the Shorthorn once had of being the farmer's best, par excellence of the world; and if the bull's dam be one of those thick, mossy roans of other days, his quality will be in no wise impaired.

### Eczema, Itchy, Scaly, Skin Tortures.

The simple application of SWAYNE'S OINTMENT, without any internal medicine, will cure any case of Tetter, Salt Rheum, Ring-worm, Piles, Itch, Sores, Pimples, Eczema, all Scaly, Itchy Skin Eruptions, no matter how obstinate or long standing. It is potent, effective, and costs but a trifle.

Miss Culture—What do you think of Henry George's single tax idea? Miss Gushington—Well, I see no reason why he should not tax single men, but I don't think he ought to tax single women—it isn't our fault.—New York Weekly.  
Just received, a large lot of cast iron kitchen sinks, which will be sold cheap at A. Herman & Son's. ap30 3i

## A Warning from the States.

A correspondent at Needham, Mass., writes to the Moncton Times: Permit me to say a few words of Boston and its surroundings. I left the lower provinces on the 16th of April of a trip to Boston and vicinity; reached here on the 17th and found my way to the town of Needham. Being a carpenter, I thought during my sojourn in this place I should go to work and learn some of the mechanical arts of the place, but I find it hard to learn much here. During last summer I was asked to come to Boston and make money, but I cannot see why it is that people run away with the idea that they get along here much better than they do at home. In the first place, to live here costs twice as much as it does in New Brunswick, and wages are only 50 to 75 cents better per day. In Moncton and McAdam, N. B., and Amherst, N. S., last summer I made at the rate of \$30 clear per month, while here I can't better it, and besides clothing is high. A suit that would cost \$18 in Moncton would cost \$30 here, etc. Now, boys of the provinces, please take advice from a friend who has tried the matter and stay at home to do well. I don't blame any boy who wants to see and know the country near him, but when you have seen it, go home and settle under the good old Union Jack.

## Advantages of Thorough Milking.

In the first annual report of the Mississippi Experiment Station, Prof. Tracy details some interesting experiments with live stock, one of which, bearing upon the subject of "milking cows," teaches an important lesson. Prof. Tracy observed that it was very difficult to obtain good milkmen, and in order to test the difference between good ones and poor ones, he selected five cows for a trial. Workman A, who was supposed to be a good milker, milked these cows for two weeks, nothing having been said to him about the trial. At the end of that time the cows were turned over to workman B, who was told the object of the trial. It is natural to suppose, if he were a faithful man, he would get all the milk possible. The following table gives the results of the trial:

Cow.	Milker A.	Milker B.	Gain
	lbs.	lbs.	lbs.
First.....	128.5	154.	25.5
Second.....	138.	206.5	68.5
Third.....	199.	275.5	76.5
Fourth.....	161.5	172.5	11.
Fifth.....	100.5	223.5	63.

Here is a gain of from eleven to sixty-eight pounds of milk from each cow in two weeks, and a total of 244½ from all in favor of milker B over his companion.

## The Parnell Commission.

A London despatch of the 2nd says: In the special commission to-day, Sir Richard Webster continued his cross-examination of Mr. Parnell, eliciting a number of positive denials, which everybody expected, and some interesting affirmations. Witness declared he never knew of Nolan, the Fenian, until last year, and said that in a speech he delivered in the House of Commons in 1882, in reply to Mr. Forster, he repudiated every Fenian or dynamite who claimed connection with the league. He admitted that O'Meagher Condon was connected with the Manchester murders. He was chairman of the reception committee at Washington. Witness had always repudiated the dynamite and physical force party in America, and denounced them in the House of Commons. He was not aware that the Cincinnati Commercial Gazette reported verbatim a speech he made at Cincinnati, in which he is said to have referred to the severance of the last link between Great Britain and Ireland, and that its report was like that in the Irish World.

Another despatch of the same date says: Though the mass of details aimed to connect Parnell with the Fenians, and also to show that he must have known of the plots to commit murder, nothing was elicited from the witness to show he was in any way connected with the Fenians, or had any knowledge of the murderous conspiracies. Mr. Parnell read extracts from speeches delivered by him in 1879: "Let us remain within the law and constitution." "I hope the people will not be tempted to initiate violence and an illegal attitude towards the government." "The league is perfectly peaceable and constitutional; there is nothing behind it."

## About Horses.

Wilson, one of the fastest sons of the mighty George Wilkes, and that several years ago made a record of 2.16½ in a separate race over the Cleveland track with Director, is now in New York city, and it is announced by the local papers that an effort will be made to fit him for a few races this season. That such an attempt will be in any way successful is not at all likely, as Wilson's forelegs were given up as a bad job several years ago by John Splan and other capable men who had him in charge. In addition to this, it is not likely that a horse whose record of 2.16½ was made six years ago could by any possibility have much of his old time speed left, and in these days it takes a good one to hold his own in the free-to-all-class, no matter if his operations be confined to half mile tracks. Wilson, although a fast horse was a very rough-gaited one for a trotter of such great speed, but was dead game, which helped him out of many a tight place. He was brought out by Gus Glidden, who had an interest in him, the horse having been bred by Mr. Simmons, who subsequently purchased Glidden's interest, Wilson at that time having a record of 2.21½. In John Splan's hands he reduced this to 2.16½, and for a season was the fastest of the get of George Wilkes.

Just received, a large lot of cast iron kitchen sinks, which will be sold cheap at A. Herman & Son's. ap30 3i

## Local and Other Items.

No greater triumph in medicine or chemistry has been recorded than Hall's Hair Renewer to revivify and restore gray hair to the color of youth.

OATS.—The steamer from Summerside to Point du Chene on Tuesday brought upwards of 4000 bushels oats, principally for parties in New Brunswick.

SINGULAR.—An exchange says that there are living as next door neighbors at Westbrook, Cumberland Co., N. S., a brother and sister, the one nearly 80 years of age and the other about 25.

NEW CHURCH.—Tenders are invited by the Roman Catholics of Amherst for the erection of their new church. The building is to be of wood with stone foundation, and will be one of the finest structures in Amherst.

NOT THOMPSON.—It is now said that the man arrested in Arkansas a few days ago on suspicion of being John Thompson, the Braintree murderer, has been discovered to be a simple-minded fellow named Green.

PROLIFIC SHEEP.—A profitable young ewe is that of Mr. J. Price, Richmond, Carleton Co., N. B. She is four years old and has in three years raised eight lambs to maturity and is now raising three more, making 11 in all.

In the use of Ayer's Sarsaparilla, you need have no fear of arsenical poison, this medicine being entirely free from all dangerous drugs. Its powerful effects are due to the skillful combination of the best ingredients, and hence no ill results ever follow its use.

The superior merits of Ayer's Cherry Pectoral as an anodyne expectorant is due to a skillful combination of the most powerful ingredients. Nothing like it has ever been attempted in pharmacy, and its success in the cure of pulmonary complaints is unparalleled.

SHE SUCCEEDED.—While Miss Jessie Benning of Peoria, Ill., aged 18, was in the office of Wm. Scott, her fiancé last Wednesday, she picked up a revolver supposed to be empty, turned it toward her, and with the remark: "Wonder if I can kill myself." There was one loaded shell in the revolver and this exploded, the bullet entering her head with fatal effect.

SERIOUS ACCIDENT.—While the little seven-year-old son of Wm. Mellet, together with two or three other boys, were driving in a cart near the railway station at Souris, a few evenings ago, the horse took fright and ran away, throwing the boys to the ground. All escaped injury except Mellet, who received a severe fracture of the arm above the elbow. Dr. Muttart was sent for, and the little fellow is doing well.

&lt;
