Highest average — Dorothy Ann Parker—96%.  
—Naomi Newson (Assistant)

EVER GIVE a "leg up" to a knight in full armour? In a recent film about Joan of Arc the movie makers get over this weighty problem by dressing the actress who played the title part in a suit of armour made of aluminum. Result: shooting, including scenes showing Joan mounting her horse, proceeded on schedule.

Canadian manufacturers use a lot of weight-saving aluminum not only because it makes things lighter to handle and cheaper to ship but because it makes up into more products per pound. Helps them market their products for less. Aluminum Company of Canada, Ltd. (Alcan).

The Lacordaire and Jeanne d'Arc held their study club on June 4 at the home of Mr. Joseph D. Arsenault. Twenty-four mem-

**Cannibalism Of Wireworm Bared**

TORONTO — (CP) — A gieger counter has bared the cannibalism of the wireworm.

Dr. J. W. T. Spinks, Saskatchewan scientist attending the Chemical Institute of Canada convention here Wednesday revealed this story while discussing a new electronic instrument designed to trace the movements of insects underground.

Two radioactivated wireworms were let loose to borrow underground. Above them, a gieger counter picked up the radioactive worm waves and they were recorded on paper, plotting the worms' trail.

After a while it looked as if the wireworms had mated.

But when researchers dug to find out, they found one worm had eaten the other.

Two and five visitors were present. President, Alyre Arsenault opened the meeting. An interesting program was given by Frank Gallant. Mrs. Victorin Arsenault invited members to meet at her home next month.
