# Steel Production In U.S. To Set All-Time Record

CLEVELAND (AP)—Steel production in 1955 will top the all-time yearly record by Dec. 16, Steel Magazine says. The metalworking weekly says output of steel for ingots and castings will reach 112,600,000 net tons this week. The record for a year was 111,600,000 net tons in 1953. Total production in 1955 will reach 117,000,000 net tons if present rates continue, the magazine predicts. Demand continues high, with the industry confident of a strong first half for 1956.

# Bulls Disappointed In NY Stock Market Reaction

NEW YORK (AP)—There was a lot of disappointment among the bulls in Wall Street last week when the stock market did not rally as they expected, a customary development towards the end of the year. The Associated Press average of 60 stocks ended the week at \$181.30, a gain of 30 cents but short of the record high of \$187.30 that mark was established last Sept. 23, the day before the president suffered his heart attack. The market's behavior during the week made it look as though the bulls were getting tired for the moment, even though economic and corporate developments gave every encouragement possible to the market.

# Report High U.S. Auto Output

DETROIT (AP)—U.S. auto makers this week will produce 181,479 cars, the second highest weekly automobile production mark in industry history, Ward's Automotive Reports estimated Friday. The agency also estimated this week's truck production at 28,355 units. Last week a total of 177,712 cars and 28,532 trucks rolled off the nation's assembly lines.

Canada's factories will construct 6,505 cars and 751 trucks this week, compared to 6,627 cars and 638 trucks last week. The comparable week last year Canadian factories assembled 4,604 cars and 748 trucks.

# Tremendous Development In Ontario Uranium Area

By FRASER MacDOUGALL Canadian Press Staff Writer  
BLIND RIVER, Ont. (CP)—Superlatives come easy to mining men when they talk about the Blind River uranium field. They call it the world's biggest, with a proven worth of a billion dollars and indicated worth of three billions, based on present metal prices. It will have the world's biggest uranium mine with a mill capacity of 5,700 tons of ore a day. Its uranium is found mainly in a rare mineral called brannerite, known to occur only in half a dozen places in the world.

Four mines, one already producing and three in the making, have contracted to sell uranium concentrates worth \$44,160,000 to the Dominion government-owned Eldorado Mining and Smelting Corporation by April, 1962. Mine officials expect this will be 70 per cent of Canada's production.

# Demand For Newsprint Outstrips Production

MONTREAL (CP)—Booming demand for newsprint has outstripped production, the newsprint association of Canada reported Tuesday. "Current demand appears to exceed supply available from all sources, and this situation seems likely to prevail until capacity expansions now under way come into production," the association said.

It was the latest development in a series that has kept the newsprint industry in the news during seven weeks in which 11 Canadian companies announced price increases ranging from \$3 to \$5.

In a report entitled "newsprint Data: 1955," the association said that in the first nine months of 1955 United States newsprint consumption increased by 7.8 per cent over 1954, compared with an increase of only one-third of one per cent the previous year.

The nine-month increase amounted to more than 250,000 tons, absorbing all additional production immediately available plus a substantial reduction in consumers' stocks. Total Canadian production last year was nearly 6,000,000 tons.

Capacity expansion in the industry were not expected to overtake the rising demand until "some time next year," the association said.

The statement confirmed earlier reports that producers were hard pressed to fill orders. One producer had advised customers that deliveries would be cut 7 1/2 per cent beginning in January and possibly continuing through April.

There was no indication whether the cutback would become general, but an association spokesman said earlier he knew of no such plan. The price increases brought a storm of protest and a threat by

WASHINGTON, (AP) — The Equator probably has shifted considerably in the last 200,000 years, says a report of the Carnegie Institution of Washington issued Friday.

It says studies of rock magnetism suggest the possibility that the geographic axis of the earth then was about 45 degrees away from its present position.

"On the basis of this picture it can be said that about 200,000 years ago the equator crossed Lower California, West Texas, Massachusetts, Gibraltar, Kenya and Tasmania."

# Expect Banks To Tighten Up On Lending Operations

OTTAWA (CP)—The Bank of Canada has held confidential talks with chartered banks in connection with the rise in consumer credit and indications are the banks will tighten up on certain phases of their lending operations. Federal financial authorities said Monday the central bank has made no suggestion to the banks as to where the lending brakes should be applied, though there is agreement here that a good place would be on bank loans to finance companies.

The main business of finance companies is the handling of automobile and other commodity sales on the instalment plan. The companies sometimes borrow from banks to buy instalment sales contracts from retail dealers.

Canada's big 1955 economic boom has been fed partly on high demand for consumer goods and an expansion of credit.

Last August the central bank started moving in on the credit rise by loosening its lending rate on loans to chartered banks to two per cent from 1 1/2. Another boost followed in October, to 2 1/2 per cent and then finally a third, on Nov. 18, to an all-time high of 3 1/2 per cent.

Generally chartered banks do not borrow much from the central bank, but the change in the bank rate is a general indication to the money market that it is time to tighten up on loans and boost interest charges.

Periodically, the Bank of Canada holds confidential talks with the chartered banks. Authorities explained the last talks were not aimed at forcing the chartered banks into any particular line of action, but merely to express federal concern, leaving it up to the banks to decide what action to take.

# Hook Kipling's Daughter On Tax

LONDON (CP)—The House of Lords decided Thursday that Mrs. Elsie Bambridge, daughter of Rudyard Kipling, must pay £35,482 on tax on her share in Canada.

She had petitioned the Lords, highest court of appeal in Britain, to quash a decision by a lower court ordering her to pay the tax on income derived from Kamouraska Investments Limited for the years 1948-50.

Mrs. Bambridge, who lives at Arrington in Cambridgeshire, England, claimed she was not obliged to pay tax on the money because it was left her in her mother's will together with her parents' debts.

# Reaches Bermuda After Battling Eight Gale

HAMILTON, Bermuda (CP)—26-foot icebird wrecked heaven ship up and down the Atlantic seaboard.

The rugged, ruddy Irish born adventurer related his adventures with "That's the way to live."

Dr. Cunningham, about 40, holds a degree in medicine and has practiced in Newfoundland. He sailed the icebird from Britain to Newfoundland via the West Indies three years ago.

"Well," he says, "I fell in time between holidays with work first got the offer of a medical appointment in Newfoundland. I'll fly to Canada to see what the job is like, and then I'll come back and talk the whole thing over with my friend here." He gave the icebird's black hull an affectionate pat.

Once he was washed overboard by a 20-foot wave while attending to rigging on the fo'castle head. The wave broke a gale force and pitched him into the foaming sea.

On his way
