

Auxiliary Bible Society.

The annual meeting of the Auxiliary Bible Society of this Province was held in Y. M. C. A. Hall last evening. Among those on the platform were: Judge Young, (presiding), Rev. Donald McNeill, (Secretary), J. W. Morrison, Esq., (Treasurer), Revs. S. Weston-Jones, Fred. E. J. Lloyd, James Carruthers, John Read, F. W. Moore, W. A. Crawford-Frost, J. A. Gordon, Wm. Hutcheson, Judge Hensley, Dr. Leeming, W. E. Dawson, Esq., Archd. Kennedy, Esq., and L. Miller, Esq. The choir of Zion Church was in attendance, under direction of Mr. Logan. After singing "Old Hundred" and reading of the Scriptures and prayer by the Rev. Mr. Hutcheson, the Secretary read the "Fiftieth Annual Report of the Society."

Mr. Secord (colporteur) reports that he sold 144 Bibles, 290 Testaments and 17 prints in the course of the year; visited 2,502 families, converted or prayed with 993; found 12 families who habitually neglected to attend a place of worship; held thirteen public meetings for religious instruction; found 2 families without a Bible, and travelled 1296 miles. He met a woman who had not attended a place of worship for 12 years, and neither she nor her husband could read. He also mentions having visited a young man who was both sick and crippled, to whom he gave a Testament.

Mr. Walker (colporteur) reports that he sold 117 Bibles and 307 Testaments, and distributed 180 gratuitously; visited 2190 families; travelled 3024 miles; converted or prayed with 1127; found 20 Protestant families without a Bible. To sum up both reports, there were

Table with 2 columns: Item and Amount. Includes Bibles and Testaments sold (920), Distributed gratuitously (180), Visited (4,698), Conferences on religion (2,120), Miles travelled (4,320).

At the Depository 544 Bibles and Testaments were sold. Regret is expressed on account of the loss by death of Rev. W. R. Frame, Robert Cameron, Esq., and William Sanderson, Esq.

The Treasurer then read an abstract of his accounts as follows:—

Table with 2 columns: Date/Item and Amount. Includes Feb. 11—By balance as per Audit. (\$341 60), Subscriptions and donations during the year (525 55), Collections at annual meeting, 1888 (11 46), Received from Depository (88 03).

Dr. \$1,040 37 To printing Report, &c. \$ 65 00 Sundry small accounts. 16 08 Remitted—Parent Society. 740 10 Feb. 11, 1889—Balance in favor of the Auxiliary. 219 19

Dr. \$1,040 37 Jno. Wm. Morrison, Treasurer.

The Rev. Fred. E. J. Lloyd moved, seconded by the Rev. — Scott:—

Resolved, That the report of this Auxiliary—abstracts of which have now been read—be accepted, and that the following gentlemen comprise the committee for the ensuing year: All Protestant Clergymen on the Island, ex officio, and John Ball, Wm. Brown, George Davies, William Heard, E. R. Hodgson, A. Kennedy, Joseph Knight, Thomas Leeming, Charles Palmer, J. D. McLeod, David Small, W. Weeks, H. J. Cundall, Geo. E. Full, John I. Morrison, Robert F. DeBlais, Chas. A. Lawson, D. M. Fraser, Isaac Oxenham, W. A. Weeks, Jasper Pickard, Rev. F. W. Moore, A. W. Sterns, Charles Leigh, Jr., and L. Miller.

Carried unanimously. Moved by Rev. Mr. Read, seconded by Lemuel Miller, Esq.:—

Resolved, That this meeting, with grateful hearts, praises God for all the blessings vouchsafed in the enlarged circulation of His Own Word, through the instrumentality of the Parent Society and its many agencies throughout the civilized world, thus fulfilling the promise in Isaiah 55:1, "My Word shall not return unto Me void; but it shall accomplish that which I please, and it shall prosper, whereto I send it."

Moved by Rev. W. A. Crawford-Frost, and seconded by Rev. J. A. Gordon:—

Resolved, That this meeting would entreat all persons who love the Holy Scriptures to pray without ceasing, and to give substantial aid towards promoting the objects of the Society, by providing the Bible, in such translation, and at such prices, as to make it accessible to all classes of the people of our earth, so that it may bring forth fruit "in some an hundred-fold, in some sixty, and in some thirty."—St. Matthew, 13:23.

Carried unanimously. We regret that THE EXAMINER'S space will not admit of our summary reports of the able and eloquent addresses which were delivered by the movers and seconders in support of these resolutions. The following, moved by A. Kennedy, Esq., and seconded by W. E. Dawson, Esq., was enthusiastically carried:—

Resolved, that the thanks of this meeting be given to the speakers for their eloquent and encouraging addresses to-night, to the collectors for their gratuitous services, and to the ladies and gentlemen of the choir for their admirable singing.

Gladstone Writes a Letter.

Mr. Gladstone has written a lengthy letter to Beaufort, the Gladstonian candidate for Parliament in Kennington, in which he says: "The Irish crisis has become acute to an unusual degree, and is pressing itself beyond all former experience on the mind and conscience of the people of England. The great conspiracy, which aimed at stabbing the vital interests of Ireland by means of forged letters through the honor of Parnell has been disgracefully exploded, and those who urged the inquisition with such eager glee are now only seeking means to disown and evade the responsibility." After a reference to crime in Ireland, Gladstone says: "Until the last few days the firm constant administration of degrading prison treatment to all alike by Balfour was applauded as the true secret, at length discovered, of the well governing of Ireland; but this very day the hair-clipping and similar practices were condemned in the House of Commons by the ministry itself. That party, which at the election exceeded us in numbers by nearly 120, has just rejected a conciliatory bill for the reforming of prison treatment, but it could only muster for rejection a majority of 66. Every one who is able to read the signs of the times must clearly see the way in which the present struggle must terminate."

LETTERS TO THE EDITOR.

Manures.

SIR,—If the fertility of the land is to be maintained, a sufficient return must be made for the crops withdrawn from it. Even where all the crop produced is fed at home, the resulting stable manure does not give a sufficient return. The milk, flesh, bone and wool carry away valuable fertilizing material, which the manure-heap, be it ever so skillfully manipulated, cannot fully restore. At the same time, it is doubtful if science can ever find an artificial manure altogether equal to good stable manure. The manure of well fed cattle returns to the land a portion of the actual fertility previously withdrawn, and the proportions of all the necessary elements of fertility, except lime, are properly balanced and blended in it. In artificial manure, it is extremely difficult to arrange the proportions of the different materials, so as to accurately meet the wants of the soil and crop. Where good stable manure can be obtained in sufficient quantities and at reasonable cost, and without the danger of carrying with it the seeds of noxious weeds, no other fertilizer, except lime, is necessary to maintain the fertility of the land. But these favorable conditions only exist to a very limited extent. Therefore, the farming of the future depends in a great measure on the cheapness and quality of the supply of artificial manure.

Mussel-mud and lime may be distinguished as natural manures, and on the whole, answer the same purpose. Their immediate effects are different, as mussel-mud contains, in small proportions, other fertilizing materials besides lime, the latter fertilizing materials besides lime, the latter being in the mild form of carbonate of lime, while caustic or burnt lime causes immediate chemical results which mussel-mud cannot produce. After the year of application, their effects are the same, the mussel-mud holding out longer, as the supply of carbonate of lime is usually greater, and in a form rendering a portion of it available from year to year.

There is a pamphlet in the Legislative Library, published in 1872 by George Taylor, Esq., Fellow of the Royal Geological Society of England, giving the results of three separate analyses of mussel-mud, besides other interesting information on the manure supply of this Province. All authorities agree that in general practice there are only three substances necessary to be supplied in what are known as artificial manures, viz., phosphates, ammonia and potash.

These substances are all essential to fertility, yet phosphates are of the most importance, because they are never found in excess in any land, are liable to be rapidly exhausted, and cannot be supplied, as ammonia sometimes is, by the atmosphere, while their presence in sufficient quantities is essential to the raising of good crops. The use of a good superphosphate is always safe, because it is not liable to be washed out of any soil which furnishes other elements with which it can enter into combination. If any farmer has found by experience, as your correspondent "A Farmer" from Lot 48, says some have, that phosphates have not acted well on mussel-mudded land, I would be inclined to infer that the cause must be in the quality of the phosphate, rather than in the circumstance of the land being previously mussel-mudded. Carbonate of lime is held by all good authorities to be an excellent companion in the soil for soluble phosphoric acid. If, however, the phosphoric acid is supplied in very small quantities, or to a condition bordering on insolubility, to land containing carbonate of lime in overproportion, immediately good effects may not be perceptible; but all the actually soluble phosphoric acid, added to such land, will in the end be faithfully given to the crop. I hold many good authorities in support of my opinion and experience, the previous liming or mussel-mudding is a favorable condition for the application of a superphosphate, but I will content myself with one at the present time. Dr. Wall, of Pembroke, Wales, in a very able report on Welsh agriculture, published only a little over a month ago, says:—

"Liming is a necessary and most important element in the successful management of the soil of the farming land of Wales. Being composed mostly of silica and alumina, with small proportions of lime and the alkaline salts, their fertility cannot be developed without it. Artificial manures, such as superphosphate, are absolutely thrown away when applied to these soils without a preliminary dressing of lime."

The liberal application of lime or mussel-mud greatly increases the generosity of the soil, and by successive cropping it reaches a condition having lime still in abundance, but phosphorus, ammonia and perhaps potash gone. Such soil may be described as lopsided and cannot give good crops or pasturage, until the missing materials are restored either by the application of stable yard, or artificial manure. Ammonia is also indispensable to the successful growing of crops; but it is supplied to some extent by the atmosphere, and when applied artificially, it is liable to be washed out of the land by rains unless it is immediately taken up by the growing crop. An artificial manure adapted for land to which no stable manure is applied, or where that manure is of poor quality, should contain a reasonable proportion of ammonia; but as this material is very stimulating and expensive, it should be applied with care. Caustic lime should not be used at the same time or immediately after ammonia. For the information of "A Farmer," I may explain that in agricultural parlance nitrogen and ammonia are used as interchangeable terms. To speak with exactness, however, ammonia stands to nitrogen in the relation of 14 to 17, or in other words 100 lbs. of ammonia contains 82.6-17 lbs. of nitrogen.

Potash is a valuable fertilizer, but I think it an open question whether some of the lands of Prince Edward Island do not contain sufficient quantities of it. Seven hundred bushels of turnips contain, in roots, and tops, about 200 lbs. of potash. That yield is often obtained on old land, where the natural supply of potash has never been supplemented to any great extent, proving the existence of considerable quantities of that material in the soil. As, however, potash is relatively cheap, and is extremely useful in forming combinations with other materials, its application in moderate quantities can never be wrong. One of the uses of lime is that it sets the potash in the land to work, and this leads me to speak of the nitre beds or saltpetre

plantations to which "A Farmer" refers. I cannot do better than copy the description of these beds by Professor Tanner in his "Science of Agricultural Practice," page 188:—

"Good earth is enriched by additions of sheep manure or liquid manure. Caustic lime is added and the heap occasionally turned over. Nitrate of potash is formed within the heap and is separated by washing the earth. The changes which take place are these: the nitrogenous matter in the manure decomposes so as to form nitric acid, whilst the lime releases potash from its combinations in the soil, and by the union of the nitric acid and potash so produced, the much desired nitrate of potash is obtained."

I am not aware that this process has ever been used to manufacture nitrate of potash as an article of commerce for agricultural purposes; but nitre has been produced in this way in enormous quantities for the manufacture of gunpowder.

Where stable manure has been ploughed down in good soil and caustic lime applied to the surface, the same chemical process takes place as in the nitre beds. The good old practice of using lime and manure in this way, although so long denounced by agricultural chemists, is now freely admitted to be right. To produce the desired result lime should be applied fresh from the kiln. It should be water slaked and harrowed in immediately. A second application of lime to the same land cannot produce a similar chemical effect.

On such land, stable manure and potash salts, or an artificial manure consisting of ammonia and potash will produce the desired effect. There is no better method of producing nitrate of potash than by keeping the stable manure under cover, and by mixing potash regularly with it.

Land which has been limed or mussel-mudded will yield more readily the plant food in the shape of ammonia, phosphorus and potash which it contains; and in the same manner, as long as the carbonate of lime remains in the land, it will give better returns for stable or artificial manure subsequently applied.

I am not prepared to say that undue profits or commissions are made by agents or vendors of artificial manure in this province. The manufacturers fix the price and furnish statements of analysis, and the remarks in my last letter were intended to apply wholly to them. No commercial manure can be imported from the United States and sold at prices which it will pay farmers to give. Many of the materials used in manufacturing fertilizers have to be imported into the States, and are dutiable under the American Tariff. The compounded manure is again subject to duty when imported to Canada.

In buying in England we have the advantage of cheaper material and lower freights, and by buying the elements separately we obtain the ammonia and potash free of duty. Freight charges are minimized by buying the materials in the most concentrated form possible.

I have been furnished with Mapo's catalogue for the present year. The manures made by this firm, are, judging by the statements of analysis given, of high quality, but although their prices are not given in the catalogue, I believe I am within the mark in saying that they are at least 40 per cent. higher than the same materials will cost, if bought in the English market. I have found Carter's Turnip Manure to give satisfactory results. D. FERGUSON.

—The Patriot has also adopted THE EXAMINER'S view concerning the Government Stock Farm. Coming round!

"Jerome Cartwright" is the heading of an article in La Minerve. At first sight, it suggests a flavor of Benthamism, but closer acquaintance shows that the name was suggested by the knight's mournful ratiocinations—his economic jeremiads. According to him, everything is going wrong under the present dispensation, while everything is rose-colored in the retrospect of the administration in which he was a partner. "He is called the Jeremiah of the Liberal party, because his lamentations never cease."

1889-1889. Spring Trip from Liverpool. THE CLIPPER BARKENTINE "EREMA," 300 TONS REGISTER, P. LEDWELL, COMMANDER. WILL SAIL DIRECT FROM Liverpool for Charlottetown ABOUT THE 1st APRIL. And will carry Freight at Through Rates to the different Railway points on the Island.

DWELLING HOUSE BY AUCTION.

I am instructed by J. J. TRINOR, Esq., to sell by Auction, on the premises, Thursday, 21st, inst., AT 2 O'CLOCK, P. M.

That well-known property situated on Great George Street, opposite the Roman Catholic Cathedral, and at present occupied by Mrs. Richard Coakley. Terms at sale. G. M. HARRIS, Auctioneer. March 18—td pat.

Provincial Rifle Association.

THE ANNUAL BUSINESS MEETING of the P. E. Island Provincial Association will be held in the City Court Room, on WEDNESDAY, the 27th inst., at 3 p. m. G. L. DOGHERTY, Major, Secy-Treasurer. mch16—ly fri wky

Reply to Messrs. Howatt and Hood

SIR,—In your issue of the 8th inst., I notice an article signed by Warren Howatt and G. L. Hood, in which I am charged with wholesale falsehoods on oath. I don't think Mr. Hood intended any such charge, and presume he will explain. This matter was referred to in an explanation to the court as to why I had said so and so to Richard P. Lea, one of Howatt's witnesses, which said that he, Howatt, was acting like a wild or mad beast around the country abusing the whole Methodist denomination, and myself in particular, making a fearful commotion generally, and as an illustration of his vindictiveness, because they didn't, at his dictum, kick me out. He went in the church, stripped the carpet and cushion of his pew. As to the Bible, I neither heard nor made any reference to it; neither did I even say, let alone swear, that for any of the gossip was true. One thing I will say, that if he performed this childish act, in the dove-like manner suggested in the denial, then he was much belied by several of his own friends. Now, lest the public may consider Mr. Howatt a martyr, let me say further that the Methodists with whom I am associated will not knowingly allow any second-rate man without a fair trial. To this end, a committee was, last summer, appointed to wait on Mr. Howatt, and ask him to formulate his charges against me in writing that the matter might be investigated, and if he could prove that I was in any way wronging him by word or deed, retribution would have to be made, or he could have at least removed me out of my position as leader of the choir, and have saved the carpet. But, oh, no; he didn't care to put anything in black and white; to do that would be him. He couldn't do then as he did in the court—"positively deny" every statement that such men as Charles W. Clark, Anos J. Clark and Tremain Lea swore he made to them; and doubtless (on the advice of his counsel) throwing dirt, according to the old adage, as some of it would surely stick. Now, Mr. Editor, I must apologize for using so much of your valuable space over a private matter. But as the charge was a serious one, and as Howatt has, and still is, securing a respectable body of Christians, I trust that you will, on their behalf as well as my own, give the foregoing a place in your next issue, and oblige, Yours, etc., Wm. C. LEA.

FOR SALE.

THE FURNITURE AND FIXINGS throughout that well-known and centrally situated House known as the "Globe & HOTEL," on Buckingham Street, Halifax, N. S., next door to A. & W. Smith's. This Hotel is in the most convenient part of the city, being central and on the line of the Horse Cars, which pass the door every seven minutes. Commercial men make this their headquarters; it also has been the stopping place for P. E. Island traders for years. This is a fine opening for a live man, as the business is paying well. The present owner has to leave on account of ill health. Part of money may remain on time, but will be sold low to cash buyer. This Hotel is also headquarters for patrons of Husbandry. Write to or call on H. L. WALLACE, Globe Hotel, Halifax, N. S. feb15—dy law & wky tm

ESTATE OF ROBERT BELL, ALBERTON. TRUSTEES' SALE.

TENDERS will be received by the undersigned I until SATURDAY, 23rd March, inst., from persons disposed to offer for the Account books, Book Debts, Judgments and Notes of Hand due to the Estate of Robert Bell, of Alberton, P. E. I. TERMS—Twenty per cent. cash; balance, half in THREE and half in SIXTY months—with approved security. A list of the same may be seen at the office of Carveil Brothers, Charlottetown. The undersigned will not be bound to accept the highest or any tender. Dated at Charlottetown, 16th March, 1889. LEWIS CARVELL, Trustee of the Estate of Robert Bell. mch16—dy wky td 30th pat

A WARNING. WE would warn readers to be wide awake A lot of goods made for the western trade are now being offered to the public. This Clothing is made of the very worst Shoddy, and is deceiving in appearance. There is one establishment in the city that have closed their doors against such rubbish, and further, that never handle any kind of shoddy rubbish, viz., JAMES PATON & CO. The prices for good, sound, all-wool goods will be found very little more than is asked for these trashy shoddy goods. Boys' Spring All-wool Suits will be to hand in a few days. This being our first year for Boys' Clothing, there will be no old stock to select from. Do not buy before first seeing our new stock. mch13—1w eod

DRIVING PARK. NOTICE is hereby given that all persons found trespassing on the Kensington Farm, now owned by the Charlottetown Driving Park and Provincial Exhibition Association, will be prosecuted with the utmost rigor of the law, and all cattle found thereon will be impounded at the law direction. Persons found destroying or doing injury to trees will be prosecuted under the Dominion statutes. By order of the Directors. March 18—1w. A. B. WARBURTON, Secretary.

LOBSTER FACTORY FOR SALE, AT— Codroy, Newfoundland. BUILDINGS (two years old), Baths, Boiler and all necessary appliances. 1200 LOBSTER TRAPS, 400 CASES CANS, &c., &c. Will be sold cheap. Apply to JOHN F. CHETWYND, Halifax, Or McDOUGALL TEMPLETON, St. John's, Newfoundland. feb21—dy 3y

R. M. H. S.

By merry rhymes, in olden times, They told of things gone bye, How men of yore, with patience bore Their ills without a sigh.

Poor Job, with toils from pains and ills, He no relief could have, As science old did not unfold The Magic Healer Salve.

Thrice happy we, who live to see The Magic star arise; For easing pain, the fact is plain, The Healer takes the prize.

A mother wive, doth now advise, Its virtue test and try, This very day, without delay, A box of Salve to buy.

Sore new or old, from heat or cold, Lie Magic they assai; While Healer pure will work a cure With Salve that does not fail.

If chaps or cracks, or cuts or hacks, Or burns, your skin doth peel, By using right, in day or night, The Magic Salve will heal. mch16—dy 2aw wky

D. C. BROWN'S ESTATE.

SEALED TENDERS, addressed to the undersigned, will be received up to WEDNESDAY, the 26th day of March, inst., at noon, for the purchase of the Assets of the above Estate, namely:— 1st. Book Debts and Notes of Hand. 2nd. Stock of Pumps and Tools; also his interest in patent right to manufacture and sell on P. E. Island the O'Doherty Force Pump; stock of Heating Furnaces, Piping, &c. 3rd. Horses, Carriages and Harness. 4th. House Furniture. Terms—Cash or approved security. Tenders can be made for the above either separately or en bloc, but no Tender necessarily accepted. Inventory can be seen at the office of the undersigned. Dated at Summerside, this 7th day of March, 1889. THEO. J. CLARK, Assignee. mch6 eod—tl 19th

STANDARD-BRED STOCK BY AUCTION.

I WILL SELL at Public Auction, on my premises, at St. Eleanors, on Thursday, March 28th, instant, at 12 o'clock, noon, the following high-bred HORSES, viz:— 1st. B. m. Sappho, 5 yrs old, (standard and registered), sire, Herando 2891, dam by All Right 5817, in foal to Grayton 1941, rule 7. 2nd. B. f., 3 years old, sire, Herando 2891, dam by Sir Danvers 2nd dam the well-known Bendie mare, by Melanis Pony, handsome and very promising. 3rd. B. m., 3 years old, sire Dartmouth, he by Volunteer 55, dam by All Right 5817, in foal to Grayton 1945. 4th. B. f., 1 year old, sire, Westham 3935, dam by All Right 5817, 3rd dam by Saladin. This filly owing to its choice breeding, and being of a good size, ought to be valuable, either on the track, road, or as a brood mare (eligible to register, rule 7). In fact the above lot has sufficient blood in them to make them valuable as brood mares. 5th. Wine b. c. Graduate 7633, 2 years old in July next, sire, Principal 623, dam Sappho, by Herando 2891, 2nd dam by All Right 5817. This colt being very stylish and a good size, ought to make a valuable stock horse, rule 6. 6th. B. g., 2 years old, sire All Right 5817, dam (a celebrated mare) by Randolph Morgan. This colt being large, with good gait and action, should make an excellent carriage horse, if not a trotter. 7th. Black Shetland pony mare, 7 years old, well broken to harness, both single and double, being of kind disposition and a good roadster, safe for ladies or children to drive; just the thing for a family horse. 8th. Messenger mare, 1 year old, in foal to the standard-bred horse "Elysian 734". This is a good looking animal, and would make a desirable carriage and brood mare. 9th. Herando filly, coming 3 years old, well broken, of good style, and promises to be speedy. 10th. Administrator filly, 10 months old. If the above date should prove unfavorable, the sale will take place on the following Wednesday. Terms.—A credit until the 15th November, 1889, will be given on approved notes of hand. St. Eleanors, March 18, 1889. Wm. T. HUNT

DRIVING PARK.
