

Concerning Women.

The ex-King Cetewayo has no daughter and several wives.

Mrs. Gladstone has gained a reputation as an unusually model wife. She is said never to take her eyes off her husband.

The ex-Empress Eugene did not go to Zululand and pray where her son Louis was slain. She is at Chiselhurst again, after her trip to Madrid.

Miss Eckhardt, a farmer's daughter, of State Centre, Iowa, pitched 'eighty acres of wheat from wagon to stack,' and was married a few hours afterwards.

Miss Marion S. Tripp has taught school at Davenport, Iowa, twenty-one years, and is taking a rest, having invested her savings so wisely that she can live on the interest of her money.

Lady Burdett-counts is a friend of brutes. Many a London costermonger, it is said, takes pride in his donkey through her influence. She thinks that goats should be used not as draught but as milch animals, and continues to institute a reform in the matter.

Dr. George M. Beard, been has been studying the comparative excellences of English and American women. The former, he says, endure longer; the latter bear a closer inspection. The English face is moulded; the American, chiselled.

Miss Lizzie Roskoff, of Pittsburg, Pa., has been sued by her late lover, William K. Hays, who wants to recover possession of a valuable gold watch and chain which he gave her when she was 'the idol around whom his heart's fondest aspirations clustered.' Decision reserved.

A Madrid correspondent writes: Has any one ever seen a Spanish belle sew? I never have. Of the half-dozen beauties in this group, not one of them could put a thread to the eye of a needle half as easy as the biblical camel could proceed through it. No one of them ever stitched in all her life.

'We feel,' says the editor of the Ringold Record, a western newspaper, 'the utmost regret at having omitted the marriage of Miss Ella Sconce last week. But we hasten to say that she was one of the best catches in our city, a girl of modest, unassuming manners, but as pretty as a sunbeam.'

HUMOROUS.

This is leap year, but look before you leap.

Many men are affected with de-billity these days.

Everybody wishes to be well off, including the man on a vicious horse.

If your foot is asleep, wake it up quickly, for the poet tells us that the soul is dead that slumbers.

There was a clever boy who said that he liked a 'good rainy day; too rainy to go to school, and just about rainy enough to go a fishing.'

They have found a creek out West whose waters are poisonous, and it is suggested that it be selected for Courtney to row upon.

'Well,' remarked a contemplative Irishman as he laid down his morning paper, 'to stale Maine would be a mane state.'

Notwithstanding all the modern improvements of husbandry, the matrimonial harvest is still gathered with the cradle and thrashed by hand.

Astonishing Success.

It is the duty of every person who has used Boschee's German Syrup to let its wonderful qualities be known to their friends in curing Consumption, severe Coughs, Croup, Asthma, Pneumonia, and in fact all throat and lung diseases. No person can use it without immediate relief. Three doses will relieve any case, and we consider it the duty of all Druggists to recommend it to the poor dying consumptive, at least to try one bottle, as 40,000 dozen bottles were sold last year, and no one case where it failed was reported. Such a medicine as the German Syrup cannot be too widely known. Ask your Druggist about it. Sample Bottles to try sold at 10 cents. Regular size 75 cents. For sale by all Druggists.

A PASTY PHILANTHROPIST.—The "Prisoner's Friend" of New York is a very handsome and quite wealthy Western lady named Linda Gilbert. She supplies the poor wretches with books, papers, etc., and to those who are pained in the deadly and horrible Tombs, she brings Liniment Iodine which she says is the only real treatment for the neuralgia and rheumatism. Giles' Pills cure Neuralgia. Sold by W. R. Watson. Send for pamphlet. Dr. GILES, 120 West Broadway, N. Y. Trial size 25 cents.

Correspondence.

We do not hold ourselves responsible for the statements or opinions of our correspondents

To the Editor of the Examiner.

DEAR SIR,—I am informed by those who read the *New Era* that the editor of that paper is desirous of having public indignation meetings, held for the purpose of expressing disapproval of Senator Carvell's appointment. To further the matter certain "confidence men," it is said, are now at work *Sundays* as well as week days, trying to get a meeting called in some Grit stronghold or other. Mr. Bowers has a right to call a meeting of his friends if he sees fit. His attendance thereat will be expected as a matter of course. He will then have an opportunity of explaining how it came about that, as Editor of THE EXAMINER, while owned by Mr. Carvell, he was found ready and willing not only to swallow Mr. Carvell, but the "wire fence" and "railway rings" as well. He will also be expected, when brought face to face with the local member for St. Peter's to explain away a few little differences of opinion that prevailed in certain quarters not so very long ago. The Government has, no doubt, committed a great error. Mr. Bowers should have been promoted to the Senate instead of Mr. Carvell. 'Tis true he doesn't reside in King's County, but then he has claims on that County; for did he not (non-resident as he was) once seek a constituency in the East, only to be returned to the bosom of his friends. Let me say in conclusion that the great interest manifested at present by outsiders is too apparent not to be easily seen through. Their little games won't do. People are too wide awake nowadays to be scared by even the grand army of the disappointed.

Yours &c.,

CITIZEN.

Will Beet Sugar Production Pay?

To the Editor of the Gazette.

SIR,—I have lately received a number of letters from farmers and others in various parts of the Dominion, asking if the production of beet-root sugar will pay. As there is much interest felt in the subject in the Province of Quebec perhaps you will kindly give space to a few remarks on this important question.

There is no doubt but the soil and climate of a great part of these united Provinces are admirably adapted for the cultivation of sugar-beets, and it has been conclusively proved, by the able, practical and accomplished Director of Agriculture (Quebec), Mr. E. A. Barnard, that the roots grown in your Province are rich in sugar—equal to, even surpassing that of the sugar-beet grown on the Continent of Europe, and it is a well-known fact that few crops are more beneficial to the soil than the beet, as it is not a scourging crop, and stock are fed on the tops and pumace of the pressed roots, thus returning the crop largely to the soil. The sugar factories must also necessarily be in the heart of the beet-growing neighborhood, as the roots are too bulky and tender to transport profitably or safely for any great distance, and this would give a small manufacturing population in each district suitable for the growth of the beets.

The production of beet-root sugar in Continental Europe was only about 140,000 tons in 1852.

In 1869 the production had increased to about 315,000 tons.

In the last season (1868—69) the production has increased to the enormous quantity of 1,555,000 tons.

But notwithstanding all these facts before me, I have come to the conclusion that the production of sugar from beets has not yet reached a natural production by our farmers, and clearly the idea that beet sugar is easily and cheaply produced is quite a mistake, and is one that will most certainly sink a large amount of capital in Canada.

The success of the enterprise would depend not only on the skill brought to bear on the manufacture, but on the good will of the Government and farmers. Nothing ought, therefore, to be done in the matter till a clear and proper understanding is come to with the Government and farmers.

The enterprise must be exempted from excise for a very long period. The term of ten years fixed by the Dominion Government expires in 1883. A renewal of this Act for at least ten years from the date of commencing is a *sine qua non* before any expenditure could be safely incurred.

The farmers would have to enter into binding contracts with the sugar manufacturers to deliver at the factories, each season, a fixed and sufficient quantity of well-grown beets at a stated price, taking back for their cattle the compressed pulp.

The chief difficulty will be with the farmers, but they can be assured that nothing does so much to improve the agriculture of a country as beet growing, and that it will pay them to do their all important part well; but they must at the same time be told that nothing but hard work will raise suitable beets for the manufacture of sugar. It demands much more attention during its growth than is commonly given to the "Mangel Wurzel," as it must be kept well freed from weeds and well earthed up, that the root may not appear above the surface, for the heat of the sun is very detrimental to the formation of sugar in the beet.

In conclusion I would say that it is very important that the bonus offered by the Quebec Government should only be given to those who have both the technical knowledge and the pecuniary means to ensure a fair trial.

Meantime,

Yours very truly,
GEORGE GORDON DUNSTAN.

CATARRH.

Constitutional Catarrh Remedy CURES CATARRH.

Hear what a Reverend Gentleman says of the Constitutional Remedy.

T. J. B. HARDING, Esq., Brockville, Ont.:—DEAR SIR—It is now two years since your "Constitutional Catarrh Remedy" was introduced to me. I have waited this long to see if the cure would remain permanent before doing this, my duty, to you, as at first the happy effects seemed to me to be "too good to be true."

I was afflicted in my head for years before I suspected it to be Catarrh. In reading in your Circular I saw my case described in many particulars. The inward "drop" from the head had become very disagreeable, and a choking sensation often preventing me from lying long. I would feel like smothering and be compelled to sit up in the bed. My health and spirits were seriously affected. When your agent came to Walkertown in August, 1876, I secured three bottles. Before I had used a quarter of the contents of one bottle I found decided relief, and when I had used two bottles and a third, I quit taking it, feeling quite clear of that ailment, and have not used any since until of late I have taken some for a cold in my head.

A sense of duty to sufferers from that loathsome disease, Catarrh, prompts me to send you this Certificate, unsolicited, with leave to make what use of it you may see proper.

Yours truly,
W. TINDALL, Methodist Minister.
