

DR. HIGGINS DURING A LECTURE

## Dairy Controls Tightening Here

The P.E.I. provincial regulations regarding the sale of milk by the producers is in the process of amendment to conform to the Canada Food and Drug Act. This will mean a marked tightening of quality controls on the part of the island's dairymen.

In order to assist the dairy farmers to understand the necessity for the regulation, and how best to meet them, Dr. Jim Higgins, veterinarian, department of health, and Earl Adams, dairy superintendent, department of agriculture, have been engaged for the past week in conducting a series of talks on quality milk control, sanitation, and bacteria control in general.

Dr. Higgins points out that the future of the dairy industry depends on the strict adherence to high quality standards, and those who are not willing to conform will not be able to remain in the dairy business.

In a recent interview, John Simmonds, president of Central Creameries Limited, Charlottetown, said that the departments of health and agriculture are to be commended on their efforts to improve the island's dairy industry, and that the growth and success of the industry depends on providing the best possible product.

He said that with teamwork between the farmer, the creamery, and the government, the possibilities of future development are tremendous.

The educational talks to the dairy producers were held at Charlottetown, Souris, Montague, and Morell.

Dr. Higgins said that further meetings are planned for the fall.

Department of agriculture officials expect that the new regulations, which provide for two grades of milk that can be processed by the dairies will go into effect June 1. Milk falling below these grades will be rejected.

Provincial dairy superintendent Earl Adams said Wednesday, milk producers whose milk cannot qualify for the grades will have their premises inspected and sanitary conditions brought up to standard before they can be reinstated as milk shippers.

The regulations provide for grades A and B milk. Grade A milk is milk that has a bacteria count of less than 1,000,000 per cubic centimeter and less than one milligram of sediment. Grade B milk cannot have more than 3,000,000 bacteria per cubic centimeter and two grams of sediment. Milk that has higher counts of bacteria and sediment will be rejected.

Mr. Adams said that the new regulations need cabinet approval.

## Mrs. S. Gallant Dies In Hospital

**WIGNISH**—Mrs. Sisome Gallant of Peterville died Monday at the Western Hospital, Alberton at the age of 79.

Surviving are four sons and five daughters, Philip and Ern-

## J. A. Gallant Funeral Held

The death occurred suddenly at Beach Grove Inn, Monday, April 19 of Joseph Alfred Gallant in his 78th year. Although in failing health for over a year, death came as a shock to his many friends and relatives in St. Hubert.

A veteran of World War I, Fred, as he was familiarly called by all who knew him, was a man who could be counted on to give a helping hand to anyone in need.

He will long be remembered for his friendliness and good cheer. A resident of St. Hubert for almost all of his life, Mr. Gallant had been at Beach Grove Inn for the past year, due to his failing health.

Left to mourn are his wife Margrate and an adopted daughter Florence, both are now residing in Charlottetown. Also three sisters, (Madeline) Mrs. Cyriac Gallant, (Marie-Anne) Mrs. Lester Burke both of Charlottetown, Ernest Clow of Summerside.

Also two brothers Norman of St. Hubert and Philibert of Brax. Another sister (Mihene) Mrs. Nick Bulger, and a brother Arsene have predeceased him.

Funeral was held on Tuesday, April 22, from the Compton Funeral Home, Summerside, to St. James Church, Edmont Bay for Requiem High Mass. Rev. Francis Tardiff officiated at the church and at the graveside ceremonies. Pallbearers were Frank Gallant, Henry Cormier, Johnny Arsenault, Gus Gallant, Urbain Cormier and Joseph Gassie. Interment was in the church cemetery.

2 The Guardian, Charlottetown, Thurs., Apr. 29, 1965.

## Records Will Be Set For Butter, Cheese

Production records will be set this year by Prince Edward Island dairymen with large increases in butter and cheese production during the first three months of 1965.

Figures released yesterday by provincial dairy superintendent Earl Adams show that butter production for the first quarter of 1965 was 628,000 pounds—a 17 per cent increase over the 537,000 pounds produced in the first three months of 1964.

† Cheese production in the first

quarter of this year showed a whopping increase of 110 per cent over the first quarter of last year. To the end of March this year, cheese production was 130,000 pounds, compared to 62,000 pounds for the same period last year.

The month of March saw the greatest increase in the production of butter and cheese. Last March saw 245,000 pounds of butter produced—a 50 per cent increase over the 163,000 pounds produced in March 1964—and cheese production last March was 36,000 pounds—a 125 per cent increase over March 1964's production of 16,000 pounds.

Mr. Adams said that ice-cream production is eight per cent higher in the first quarter of this year than in the first three months of last year.

## New Electronic Business Opens

Phil Doyle and James A. MacInnis, both Charlottetown men, have recently opened Charlottetown's newest electronics business, "Abeqweit Electronics".

It is held true by many that experience is the best teacher. If so, then the new partners have been well taught. Prior to opening "Abeqweit Electronics" Mr. Doyle served eight years with the RCAF as a communications technician and Mr. MacInnis served 10 years with the same force as a radar technician.

The new business, situated at 11 Elm Avenue, opens its doors to the public at 8 p.m. each day and remains open until about 9:30 p.m. or "until the work is done." Televisions, radios, and other service-needing appliances will be serviced in homes when possible. When this is not possible a pick up and delivery service will be made available. The new partners have not limited their skill to the Charlottetown area but have stated their willingness to travel "anywhere" with an eye to possible servicing of island dragger fleets.

est, Free town, Joseph and Peter in Toronto, Denise (Mrs. Tennis DesRoches) St. Felix; Mary Ann (Mrs. William Doucette) Palmer Road; Alice (Mrs. Marcel Perry) Peterville; Edna (Mrs. Joseph Gaudet) Free town; Olive (Mrs. Arthur DesRoches) Free town. Also surviving is a sister, Mrs. Denise Archambault, Montreal.

There are also 53 grandchildren. The remains rested at the home of John Chaisson. The funeral was Wednesday morning at the Immaculate Conception Church, Palmer Road. Interment was in the church cemetery.

## Spud Shipments Remain At High

Potato shipments from Prince Edward Island in the current crop year still continue at an increase over last year's shipments.

Up to April 26 this year, 9,904 carloads left the province, compared to 9,206 carloads for the same period last year.

Shipments from the Maritime area this year have reached 21,751 carloads, compared to 19,986 carloads last year.

Of the 9,904 carloads shipped from this province this year, 8,068 went by rail and the others by truck and boat.

## Ferry Service Will Open As Ice Permits

The Wood Islands - Caribou ferry service will begin as soon as after May 1 as ice conditions permit.

The Northumberland Ferries Limited ships, MV Lord Selkirk and MV Prince Nova, are now tied up in Picotou, N.S. but are ready to be put into service.

A check on ice conditions Wednesday morning showed that heavy ice blocks Northumberland Strait from Cape Tormentine eastward through to Cape North in Cape Breton.

## OLD ALLOY USED

The United States alloy for five-cent coins, 75 per cent copper and 25 per cent nickel, was first used for coins in 235 BC.
