

Fishery Interests Stressed Before Gordon Commission

OTTAWA (CP)—Secondary industry should not get excessive tariff protection at the expense of fishery, the Gordon economic commission was told today.

The Fisheries Council of Canada, speaking for the \$290,000,000-a-year commercial fishery, said any additional protection might jeopardize Canada's trade relations with foreign countries.

"The importance of export trade to this industry and to Canada," the council said in a brief, "should be constantly borne in mind, and government measures should be designed to maintain and foster multilateral trade."

It added a greater degree of stability in United States tariff policy would be most helpful. At present, there was too much uncertainty in this respect.

About 65 per cent of Canada's fisheries products are exported, to some 25 countries. The U.S. takes about 70 per cent of the exports, by value.

The council took issue with the federal policy of tight control on vessel importations, which it said adds to production costs and affects Canada's competitive position on world markets.

It spoke against the subsidization of other major segments of the Canadian food industry. This could make the position of the fishery difficult.

Looking to the future, the council said there will be substantial increases in the production of Canadian fisheries in the next 25 years. It said the west coast industry looks to a doubling of salmon production, 40-per-cent increase in herring landings and a 50-per-cent increase in the market value of the halibut catch.

The prediction for the west coast, the council said, was based on the theory that power dams would not be built on salmon-producing rivers until a way was found to get salmon past dams without loss.

STUDY HYDRO PROBLEMS

Construction of hydro power sites on the Fraser river and its tributaries in British Columbia would decimate the salmon runs. The public interest could best be served by retaining existing and potential salmon rivers for salmon.

"Concurrently, work and study should be expedited in an endeavor to solve the problem of obtaining both fish and power from the same rivers, should such additional power be needed in the future."

Candidates For The Ministry

TORONTO (CP)—Thirty-five per cent of this year's 170 new candidates for ministry in the United Church of Canada are from the homes of working men, the church said Saturday.

Rev. W. Harold Young, secretary of its board of colleges and secondary schools, said in his annual report the 170, seven more than last year, set a church record.

"Homes of the medical profession across Canada have this year failed to produce a single new minister for the church," Dr. Young said. Businessmen's homes produced 28 per cent, 18 per cent were from farmers' homes, 11 per cent from the manse.

The maritimes conference produced 39 of this year's candidates and Newfoundland, five.

Hampton

Business visitors to the City on February 17, were Mrs. G. R. Cannon and Mrs. C. Sherron.

Relatives, friends, neighbors, in large numbers, were present to convey final tributes of respect for the late Mr. Bert Sturdy widely known and respected lifetime resident of Crapaud, whose death occurred at the home of his daughter,

Mrs. Willard Rogerson, Victoria, on February 15. Funeral services were conducted at St. John's Anglican Church Crapaud, on February 17, by the rector. Interment was in the Church Cemetery.

Funeral services for the late Mrs. D. C. MacLean, were held from the MacLean Funeral Home to Argyle Shore Cemetery, where interment was made. Services at the home and at the cemetery were conducted

ed by Rev. J. H. Bishop on February 21.

Best wishes to Mr. Blair Buell are being conveyed for a satisfactory recovery from a broken ankle.

Friends of Mrs. Maurice Burke were shocked to learn of her sudden death while visiting the Bol-den Islands, accompanied by her

Army Revamping Methods To Suit Atomic Warfare

By DAVE McINTOSH... Canadian Press Staff Writer...

OTTAWA (CP)—When it comes to new weapons, the armed forces are back in school a senior defence department official says.

New weapons such as air-to-air guided missiles and atomic artillery are coming or will come into use, he said, but the military is not yet sure what to do with them.

A. H. Zimmerman, chairman-designate of the defence research board, said recently that adoption of a new air-to-air missile by the RCAF may change the techniques of fighter interception.

Probably the greatest amount of head-scratching over new weapons is going on in the army.

ARMY EXPERIMENTS

The 1st Canadian Infantry Division did some preliminary experiments in atomic battlefield tactics last summer at Gagetown, N.B.

Maj.-Gen. John Rockingham, division commander, said recently that this summer a new system of deploying troops will be used in the face of mock atomic attacks.

The army has been putting a great deal of thought into the subject and, senior officers say, will have to put in a lot more before any definite conclusions are reached.

In a recent article in the Canadian Army Journal on atomic weapons and armies, Lt.-Col. J. M. E. Clarkson, MC, military assistant to chief of staff Lt.-Gen. Howard Graham, begins this way: "It is doubtful if there has ever been a time when the future cast of military tactics and organization has been obscure and yet at the same time so urgently sought."

Col. Clarkson comments on a new book by Lt.-Col. F. O. Miksche, a Czech army officer who served under Gen. de Gaulle of France during the Second World War. Col. Miksche foresees that atomic weapons will mean a return to trench warfare and the passing of fluid and mobile war such as the blitzkrieg.

MECHANICAL PROCESS

Col. Clarkson says the book's main argument assumes that aerial photography and spotting is a mere mechanical process and makes no reference to the problems that would arise if the defender did not possess air superiority over the enemy's territory.

But Col. Clarkson agrees generally with these points in the book: 1. Armies will be needed in any future war, but armies which are easily adaptable, able to fight conventional or atomic-type wars.

Mr. N.D. Allen closed the service with benediction. Lunch was served by Stanley Bridge United Church.

2. The need for simplicity in future weapons and tactics and for a drastic increase in the ratio of "teeth to tail"—troops in the line compared with support troops.

3. Air transport to solve the problems of supply and concentration.

The army now is working on plans for a small airborne unit as the forerunner of a battlefield air lift for supplies and troops.

FREE FOR RHEUMATISM ARTHRITIS & NEURITIS PAINS

If you or any of your family suffer from the pains of Rheumatism, Arthritis, Neuritis, Sciatica, or Neuralgia, this may be the luckiest day of your life—lucky because it may be the day you have been hoping for—the day when you discover a medicine that quickly goes to work to combat the pains of Rheumatism, Arthritis, Neuritis, Sciatica, Fibrositis, and Neuralgia.

Free to Sufferers

The new, improved Rosal formula was introduced in Canada only a few months ago but upwards of ten thousand Canadians have now put it to the test.

Many of the thousands of men and women who have tried Rosal had suffered for years—many were tired and worn out from pains in the hands, arms, shoulders, back, neck, legs and ankles. Many were finding it hard to work and keep up with their duties. But when they heard about Rosal and how it brings soothing, gentle, relaxing relief for Arthritis, Rheumatism, Neuritis, Sciatica and Neuralgia pains, they decided to give it a trial. And that is why Rosal has gained popularity so rapidly.

Now you too can try Rosal absolutely free, and see for yourself if this may not be the luckiest day of your life. All you have to do is send us your name and address on the coupon below or a postcard, and we will send you free, postpaid and without obligation, a full \$1.00 size package of Rosal.

Rosal is a modern scientifically compounded tasteless formula. All ingredients are listed on the label. You know what you are taking and that Rosal is absolutely safe taken as directed at meals and bed time.

Get Acquainted Offer

This \$1.00 package of Rosal costs nothing now or any time. All we ask is, if Rosal satisfies you, that you tell your friends. We believe that the more people who learn about Rosal the more there will be who pass the good word along to their friends and be glad to help us as we have helped them. That's why we make this free get acquainted offer.

To Visit Canada

The Earl of Home, British Commonwealth secretary, will visit Canada in May. He was born in 1903 and entered Parliament in 1931 as Conservative member for South Lanark. He succeeded to the earldom of Home in 1951.

(CP FROM UKIO)

NORTH RIVER

Mr. and Mrs. Raymond Weeks spent Sunday afternoon visiting at the home of Mr. and Mrs. Gordon Jewell.

Mrs. Lester Younker, who was a patient in the Prince Edward Island Hospital, is home again.

Mr. and Mrs. Stirling Ford and family spent Sunday evening at North River.

Mr. and Mrs. Kenneth MacKinnon and family, of Churchill, spent Sunday visiting at the home of Mr. and Mrs. John Jewell.

Mr. Fred Jewell and son Wen-fell were visiting at his brother's in Kingston.

STANLEY BRIDGE

One Flock, One Shepherd was the theme for the World Day of Prayer Service held in Stanley Bridge with Mrs. Eric Bell as leader, assisted by Mrs. Donald MacEwen and Mrs. Jas. M. Campbell.

The choir and organist, Mrs. Lorne MacEwen, led in the hymns. Special music consisted of "Have Thine Own Way" by Mrs. A. S. MacEwen, Mrs. Roy Douglas and Mrs. Lorne MacEwen; "Alone" by Mrs. Wilber MacKay and Mrs. Harold Dunning and "Saviour Like A Shepherd Lead Us" by Isobel Campbell.

Prayers were offered by Mrs. Harold Mayhew, Mrs. Leigh MacEwen and Mrs. George MacLeod. An address stressing the theme was given by Mrs. Marion Cole. Offering was received by Miss Olga Woolner and Mrs. John Fyfe.
