Doors open at 2.30 o'clock in the afternoon
Tea from 5 to 8 o'clock. Admission 10c.
Tea ticket 25 cents.

Of Special Interest to our Farmers

Setting the Hen.

In the ordinary, rather indifferent
practice of caring for farm poultry, full
hatches of all the eggs set are not
generally expected, but to those who
have very carefully selected a breeding-
pen of layers of eggs to set, or have
paid out good money for a few settings
of eggs, the failure of a number of the
eggs to incubate is quite a serious dis-
appointment. It depends in a great
upon ourselves whether we get a measure
large flock of early chicks or not. The
hens that lay all winter are the ones that
do the early sitting, and it is on the care
of these, while sitting in cold weather
that our success depends.

It is well to have a warm pleasant
building with windows facing the south
for a hatching house. In order to
protect the sitting hens from the molest-
ation of layers and other disturbing
agencies, the pen should, if practicable,
be divided into two compartments five
or six feet long by two feet wide. At
the end of each compartment nest
should be placed a covered nest box
about 18 inches square. Woven wire
answers well for the partitions. The
partitions need not extend more than
three feet high if the wire netting is
extended over the top to keep the sitter
in and other fowls out. In each
compartment should be a pan of water,
plenty of coarse sand and grit, besides
a constant supply of mixed grain.

When two or three hens become
broody, each should be given a
thorough dusting with insect powder
and set at night on as many eggs as
she can cover well, but not more than
twelve. The eggs should be carefully
selected, or even large size and color,
rejecting any that are abnormal in size
or form, and not more than about ten
days laid. When the hens are put on
the eggs they should be enclosed in
the nests for a day or so and then
allowed to come off as they please, in
their compartments, for food, water,
and exercise. It is sometimes
necessary to shut them up a second
time, but usually when a hen is free
from lice she will stick to her nest
faithfully. If the eggs have been laid
by a pen of about a dozen young hens
that have been kept with the society
of a good male, changed from pen to
pen once a week it is seldom necessary
to examine the eggs in a week or more
to see that none are fertile. The result
should be a good percentage of live
chicks at the end of three weeks.

When the batch of hens set at one
time bring off their broods, the chicks
may be given to a less number of hens
or a brooder may be used, and the hen
set with more eggs, as it does not harm
a hen to bring off too or three broods
of chicks. When a hen is to be set
again her chicks, if to be raised in a
brooder, should be removed from the
nest soon after hatched and more eggs
given her at once. The chicks may be
kept in a flannel-lined blanket near
the stove till they can eat well. They
may then be transferred to a brooder,
which should be kept at 80 to 90
degrees for the first three weeks when
a lower temperature will suffice.—
Farmer's Advocate.

Benefit of a Separator

A writer in the Montreal Witness
says: "I have been using a separator
since last May, and I would not try to
make butter for market without one.
The first week's use of it convinced
me that a person milking from six to
ten cows was losing money and also
causing extra handling of the milk who

did not have a separator. At the time
I got my separator I was milking nine
cows and the increase over the old
way was fourteen pounds. The cows
were all fresh at the time, but the gain
has averaged one pound per cow. The
separator process makes better butter
because the cream is pure, all the im-
purities and dirt having been taken
out. Before I got my separator I had
a hard time to dispose of my butter at
20 cents a pound, and now I cannot
fill my orders at 25 cents"

Hired Help.

The cheapest man that a certain
farmer ever had on his farm, he said,
before an institute, he paid \$60 a
month. There is a good deal in that
remark. If a thoroughly competent
man can be secured, one who will take
an interest in his work, who can be
relied upon at all times, who is kind
to stock and careful with machinery
and implements, the matter of wages
ought not to cut much figure.—Agricultural
Epitome.

The Co-operative Farmer advises all
farmers to try a small patch of mangels
this spring. It says: If you have a
nice piece of land deep ploughed last
fall so much the better but on a liberal
dressing of barnyard manure and about
500 lbs to the acre of common salt.
When sowing the seed on application
of about 400 lbs of complete fertilizer
to the acre put in the drill is a help.
The seed should be soaked over night
and the water poured on at a boiling
temperature.

ASTHMA PERMANENTLY CURED.

A Well-known Canadian Notary Pub-
lic Suffered for 35 Years—Per-
manently Cured by Clarke's Kola
Compound.

R. D. Pitt, Esq., Kamloops, writes: "I
had suffered for at least 35 years from
the great oppressiveness of asthma and short-
ness of breath. I had during these years
consulted many physicians and tried all the
remedies, until the doctor told me I might
get temporary relief, but I would be al-
ways troubled. I tried Dr. Clarke's Kola
Compound, and after taking the first bottle
I became greatly relieved, and three bottles
have completely cured me. I can now
breathe as naturally as ever, and asthma
does not trouble me in the least. I feel
it my duty to bear testimony to the un-
paralleled effect this remedy has had in my
case, and would urge all suffering from
this disease to try Clarke's Kola Compound,
as only those who have suffered all their
years as I have can appreciate what a
blessing this remedy must prove to suffer-
ers from asthma." Three bottles of Clarke's
Kola Compound are guaranteed to cure. A
free sample will be sent to any person
troubled with asthma. Address The
& Macpherson Co., 121 Church Street,
Toronto, and Vancouver, B. C., sole Cana-
dian agents. Sold by all druggists. When
writing for sample mention this paper.

Clarke's Kola Compound is the only per-
manent cure for asthma; it is now success-
fully used throughout the leading hospitals
in England and Canada.

Chronic Eczema Cured.

One of the most chronic cases of Eczema
ever cured is the case of Miss Gracie Ella
Allen, of Hartland, N. B. On a sworn state-
ment Mr. Allen says: "I hereby certify that
my daughter Gracie Ella was cured of
Eczema of long standing by using four boxes
of Dr. Chase's Ointment. William Thistle,
registrar of Hartland also certifies that he
sold four boxes of Dr. Chase's Ointment which
cured Gracie Ella."

The knowledge a man doesn't possess
always crops out when a child questions
him.

Keep Minard's Liniment in the House

A bird in the hand is vulgar. Use a
knife and fork.

Dr. Chase Cures Catarrh after Operations Fail.

Toronto, March 16th, 1897.
My boy aged fourteen, has been a sufferer
from Catarrh, and lately we submitted him to
an operation at the Central Hospital. Since
then we have resorted to Dr. Chase's Catarrh
Cure, and one box of this medicine has made
a prompt and complete cure.

Tailor-Made vs. Factory-Made!

Take up the printed announcements of makers
and importers of ready-made clothing, and when
they strive to give emphasis to the alleged
merits of their clothing they invariably
tell how nearly they approach to tailor-made.

Here are some quotations—
"Elegantly tailored."
Cut and finished equal to order-
ed work," Equal in quality, fit,
and finish to suits made to order,
or similar statements.

Then tailor-made clothes are different to im-
ported factory-made, otherwise there would be
no need to make comparisons. If tailor-made
were not the better clothes they would not be
held up as the ideal to which the ready-made
strive to reach.

The fact is there is a great deal of differ-
ence between a factory-made imported
suit and a tailor-made in style and dura-
bility.

The man that is indifferent as to the
appearance of his clothes when he buys
them and when worn a month, may be
satisfied with a factory-made, but if he
has regard to looks and economy, he will
buy tailor-made garments.

For those who are not disposed to give the prices usually
paid for clothes made to special order, and are not satisfied
with the imported ready-made clothing, we have made, and
are daily adding, Suits and Overcoats of superior workman-
ship that we are selling as low in price as imported makes of
inferior quality.
