

THE DAILY EXAMINER.
OCTOBER 6, 1883.

Telegraphy.

We are glad to publish Mr. James' letter.

If the Anglo-American Company have invested £30,000 sterling in the Prince Edward Telegraph System, they must have paid their predecessors a large profit on the cost of the property, as it is pretty well understood that it could be duplicated at the present time for about one-fifth that amount; and if to the actual cost we apply the earnings and expenses as given by Mr. James, the dividend would be about twelve and a half per cent. As experience everywhere shows that a reduced tariff gives increased business without necessarily increasing the expenses, we see no good reason why the dividend on the real cost of a new line should not reach twenty per cent. or more, and at the same time put this Province on the same footing as the other Provinces in regard to its telegraph facilities.

The time has arrived for action, and consequent emancipation; and we trust the new telegraph company will go ahead regardless of the efforts of the combination to head them off. Mr. James may be expected to help his employers.

The Provincial Exhibition.

THE Provincial Exhibition will be officially opened in the Drill Shed by His Honor Lieutenant Governor Haveland on Wednesday next, 10th inst., at 12 o'clock, noon. From the large number of entries already received both in live stock, farm produce, and other classes, the success of the approaching Exhibition is now fully assured. But it is to be desired, that as the prizes are open to the competition of the whole Island, further entries will yet be made, and that in all classes there will be a full and complete exhibit. All articles for the Exhibition excepting the live stock, which class was closed yesterday, will be received by the Secretary of Advisory Board and entered on his books up to Tuesday, October 9th, at two o'clock, and no later. Intending exhibitors should make a note of this, so that no mistake be made. The notable success of this Island at the St. John Dominion Exhibition, is gratifying and encouraging, and should serve as stimulus for further exertions. We trust that the Provincial Exhibition of 1883, will be superior in every respect to any heretofore held on this Island.

The "Coban."

FIRST TRIP TO CHARLOTTETOWN OF THE NEW STEAMER OF THE BLACK DIAMOND LINE.

The steamer "Coban," Captain Anderson, arrived at this port yesterday morning, from Pictou, and after receiving freight, proceeded to Montreal this morning. She is an iron screw steamer of 1060 tons gross measurement, and has a capacity of carrying fourteen hundred tons of freight. She was built at Sunderland, England, in 1882, and has been running between Montreal and the lower ports for the past fifteen months, also a short time to Bermuda. The "Coban" is a very handsome steamer in build, rig, and finish. She is supplied with all the latest steamboat fittings, such as steam wheel gear, forward lighthouses, fire engines, steam winches, etc. Her cabin passenger accommodation is small, but very comfortable. The saloon is splendidly furnished and the staterooms, which are of polished bird-eye maple, teak and mahogany, are well arranged and beautifully finished. The cabin now accommodates twenty-seven passengers, but it is the intention of the Company to extend it to accommodate over sixty. The "Coban" has also accommodation for twenty-six steerage and intermediate passengers, but the Company intend also to extend the steerage accommodation to suit the requirements of the route. The boat runs at the rate of ten knots per hour, and makes the round trip from Montreal to lower ports and St. John's, Nfld., in fifteen days. She has been quite successful on the route, and the Company feel warranted in getting another boat to run with her next season. This boat is now being built in England. She will have a capacity for carrying seventeen hundred tons of freight sixty or seventy cabin, and about fifty steerage passengers. When placed on the route next spring the Company will be able to give the people of the lower ports the advantage of weekly steamboat communication with Montreal and St. John's, Nfld. One of the steamers will be commanded by Capt. Robert Fraser of this city, who is well known as the successful commander of the steamer "Prince Edward." Capt. Fraser will leave for England this fall.

Besides the "Coban" the Black Diamond Line have a steamer named the "Tunstall" plying between North Sydney and Montreal. She carries seventeen hundred tons of freight and pays a good dividend. Captain Anderson, who commands the "Coban," is an experienced mariner. He has been running in gulf port steamers for the past ten years, and during that time has made a brilliant record.

We wish the Black Diamond Line every success in their enterprise.

EXTREMELY DOUBTFUL.—The Halifax Herald says: "The next great union," remarked a gentleman who was a delegate to the Methodist conference at Belleville, "will be the union of the Methodist and Presbyterian churches in Canada. There is a strong and growing feeling for it in Ontario. And why should we not unite? This is an age of union. Our aims are one. There is no very great gulf between our theological beliefs. The progressive spirit of the age is a fraternizing one. Union is strength. United we can go forward conquering and to conquer."

The Dominion and Centennial Exhibition.

Fourth or Arbor Day

PLANTING THE CENTENNIAL TREES.

This ceremony was creditable to the heart, and good taste of St. John. Queen Square has been a bare and not a pleasing sight. Some one started the idea of planting it with trees in honor of the loyalists who came over the border and in commemoration of their work. The idea accorded with the sentiment of St. John. Thousands were there, the Lieut.-Governor, Sir Leonard Tilley, Senator Boyd, Bishop Sweeney, the Co-adjutor of the Metropolitan, Members of the Government, Members of the Bench and Bar, the clergy, wealthy citizens, well-to-do citizens, poor citizens, white and black, old and young! The trees were well planted; no doubt they will be well kept.

HAYMARKET SQUARE FOUNTAIN.

The unveiling of the Haymarket Square Fountain was another interesting ceremony of this day. The fountain was erected and presented to the city by the Polymorphian Club; and is for the use and benefit of the citizens "while grass grows and water runs." As in the morning at the tree planting, so in the evening at the unveiling of the fountain, thousands were present. There were also illuminations, and music, and speeches, and a soldierly parade of the militiamen, who turned out as a guard of honor to His Worship the Mayor. This is the second public drinking fountain in St. John. The first, on Market Square, was presented to the Society for the Prevention of Cruelty to Animals, by a young man named Sears. He has fallen asleep; the fountain is his useful monument. It is provided with cups for the men and women; and separate troughs, which are always full, for the horses and the dogs; and while "the pure and sparkling beverage prepared by God himself to nourish and invigorate his creatures," continues to flow from it, and while there are men and women and horses and dogs in St. John, the thoughtful, practical kindness of its donor will be had in remembrance.

AGRICULTURAL MACHINES AND IMPLEMENTS.

But we must not forget the Exhibition. Before coming to the stock, let us take a look at the machines and implements for use upon the farm. They are in great number and variety,—but the larger proportion are well known on the Island. The machines for which Messrs. Gill and Kinsman, and Mr. Strong are agents on the Island, are prominent, and attract much attention, the "self-binder" being considered a marvel of ingenuity. Mr. McKenzie's improved potato digger is also favorably criticized. It is considered by many to be the best digger on the grounds and there is much regret that it cannot be seen in operation. The Hall Manufacturing Company are exhibiting their improved combined thrasher, shaker and fanner. The improvement consists in the introduction of a new kind of shaker which does away with the necessity for the old fashioned "beaters." Last year the Company sold twenty of these machines (without the improvement) in New Brunswick, and this year they will, no doubt, sell a greater number with the improvement. A wagon furnished with an apparatus by which large stones, trees, etc., can be lifted and swung and carried off the field, is being exhibited. The man who is showing it is, himself alone, lifting stones imbedded in the Exhibition grounds which weigh several tons. Simpler and more useful—at least to the farmers of the Island—is the machine for stumping. This machine consists of a light but strong derrick which a man can easily handle, from which is suspended a plate of iron about three inches wide; on each side of the plate are square iron rods with notches on the outer side; these are attached to the plate by means of a link on either side which catches in the rods as they slide up and down; a chain is fastened to the lower end of the rods, and a lever is attached to each side; put the chain around the roots of the stumps, work the levers, and the stump must come. Any blacksmith and farmer could make the implement; but of course it is patented. The ditching machine might be useful to many farmers, but it is more complicated. Mr. Dickson's improved machines for fanning and seed sowing attract much attention.

(Remarks on the Stock crowded out.)

This evening the following prizes won by the Island were awarded,—

HORSES.

Filly, 3 years old—Dr. Blanchard, Falconwood, 2nd.
Filly, 2 years old—Robert Longworth, Royalty, 1st; Charles Stewart, Milton, 2nd.
