China, Glassware, Crockery,  
Kitchen Utensils, etc., etc.

## LETTERS TO THE EDITOR.

### Anarchy.

(Continued.)

Sir,—My last letter stopped at the point where I was endeavoring to show that labor paid all interest—that when a business man or manufacturer borrowed money to carry on his business he charged the interest on the goods he offered for sale, and of course, it is the consumer who finally pays the interest. Now, I will try to form some idea of the magnitude of that portion of the earnings of labor which interest extracts from the worker. Along with other sources, I have gleaned considerable information on this subject from Col. Wm. B. Greene, of Massachusetts, in a valuable little book entitled "Mutual Banking." The way of presentation is, of course, my own. The assessors' valuation of the property of a State in this Union in 1842 was \$44,000,000. To-day it is \$259,000,000. During this period of fifty years the increase was \$215,000,000. This is the increase of actual value—such as machinery, buildings, improvements in land, etc. If the \$44,000,000 which the State owned in 1842 had been converted into money and loaned out at seven per cent. interest, payable semi-annually, and the interest also loaned out, in these fifty years it would amount to \$885,000,000. This is legal value. You can see that the legal value increased three times as fast as the actual value. I don't know exactly what P. E. Island was first settled, but it may be interesting to some one who does know to suppose the Island to have been sold at that time for \$1,000, and mortgaged at 7 per cent., interest payable half-yearly, and when due laid out on the same terms. Figure it out and see whether the whole property of the Island to-day would be able to liquidate the debt. Take another case. Suppose 1,000 Islanders owned each \$30,000, and moved to some desolate island on the North Shore where there would be no chance for farming, manufacturing or other useful work. Their whole capital would be \$30,000,000. Invested safely in mortgages, each of these 1,000 men to have a family, averaging five to a family, with a servant for each family. This would make 6,000 persons. Then 1,000 tradesmen, shoemakers, bakers, etc., also with a family of five, would settle also to get the custom of the rich men. Here we have a population of 11,000. The farmers of the Island would have to pay six per cent. interest on \$30,000,000. The interest at six per cent. amounts to \$1,800,000. These men need not strike a blow at any useful work whatever, and yet live on the fat of the land. How would the people of the Island look on such a city as that? Why, they would think it the finest thing in the world to have such a handy market for their produce, and would actually imagine that this city of blood-suckers was the genuine cause of any prosperity on the Island. Yet, when you look at it, their whole income was sucked from yourself—from labor. This is the vampire that your politicians endeavored to endorse, with the power of a veto! Ye gods! Now what do you think of the heft of this clog of interest on labor? Of course there is actually no such parasite city as the one supposed anywhere that I know of; but, mark you, there is no civilized city or town anywhere but where such a state of things exists to a more or less extent.

Finest Assortment in Canada.

monopolize corn, wheat, etc., would require vast storehouses and entail great expense. Money is easily monopolized. In times of uneasiness, when money is most needed, is the time when those controlling the currency restrict the circulation, thereby causing more or less panic, and enabling those holding money to buy when prices are low and ruinous. Suddenly they increase the volume of money, and what was bought low can be sold at high prices. This is going on to a greater or less extent all the time. Thousands of business men are thus sent to bankruptcy and not a few to the grave. By the power conferred on bankers they can increase or decrease the value of the dollar in your pocket as it suits them. Suppose, for instance, that all the money in circulation on the Island to-day is \$1,000,000, and that that amount of money could buy a determinate quantity of land, merchandise, etc. If the banks were suddenly to circulate \$1,000,000 additional, it would require \$2,000,000 to buy this determinate quantity of land, merchandise, etc. Money would become cheap. The dollar in your pocket would only be worth half what it was before. Conversely, by restricting the circulation, they make money dear. By this and various other processes which I fear becoming tedious prevents me from illustrating, they succeed in picking the flesh off your bones pretty clean.

In my next letter I intend to continue this subject, and show you the remedy Anarchists propose for choking off this incubus interest which lives on the labor of others.

D. W. GILLIS.  
Boston, June 1, 1892.

### The Road-Making Machine.

Sir,—There has been a prodigious amount of boasting in grit circles, recently, about the wonderful work performed by the Government road-making machine. A list of respectable testimonials was procured by Supervisor Dickieson and published in the Patriot for the benefit of the trio, and a number of grit scribes hailing from Lot 65, eulogizing the supervisor and his machine, which brought to my mind the words of Goldsmith:

"And still they gazed, and still the wonder grew,  
That one small head could carry all he knew."

Well, after all the puffing and blowing in connection with the innovation, my impartial observer, who takes the trouble of driving through Lot 65 will be more than surprised to find the road, for the most part, in a state quite the reverse of what it is represented to be by the supporters of the "penny-wise and pound-foolish" combination. With the exception of a few chains in certain localities, the highway throughout the township is anything but satisfactory to the travelling public. In many parts of the road the stones and sods, turned up by the machine, being left on the side of the road, so that one wheel of the vehicle is often sunk in the trench, and the whole business in danger of coming on its beam-ends. In view of this, I would respectfully suggest that the hon. gentlemen who paid the West River a flying visit last year take their annual drive and see for themselves.

SCRUTATOR.  
Lot 65, June 4, 1892.

STEPHEN H. WARREN.  
FROM THE ISLES OF THE SEA.  
**Liver & Kidney Trouble**  
COMBINED WITH  
**PALPITATION OF THE HEART**  
CURED!

STEPHEN H. WARREN OF ISLEBORO, ME., IS WELL KNOWN IN HIS NATIVE TOWN, AND THE GREATEST CREDENCE CAN BE GIVEN TO HIS STATEMENT. TO A REPRESENTATIVE OF THE SKODA DISCOVERY CO., HE RECENTLY SAID:

"For more than two years I have suffered from what Physicians called Liver and Kidney Trouble. Nearly all the time I would have severe pains in my back and side, with a constant dull pain in the region of my liver. My bowels were constipated. I was unable to eat, and I lost my appetite. I would palpitate greatly at times, in fact I was well broken up."

"For two months I have been taking SKODA'S DISCOVERY and SKODA'S LITTLE TABLETS, and I feel like a NEW MAN. Appetite good. Bowels in good condition. Heart palpitation all gone. No trouble with Liver or Kidneys now. I AM WELL. You certainly have a wonderful remedy in SKODA'S DISCOVERY as I have taken many of the Sarsaparillas, and have been treated by different Physicians without getting permanent benefit."

"THE ONLY MEDICINE SOLD WITH A GUARANTEE CONTRACT WITH EACH BOTTLE. TRY A COURSE (6 BOTTLES) AT OUR RISK, IF NOT BENEFITED RETURN BOTTLES AND GET YOUR MONEY. PAY ONLY FOR THE GOOD YOU RECEIVE."  
SKODA DISCOVERY CO., Wolfville, N.S.

jan2—dy & wk

THE Government of the Dominion of Canada has accepted the invitation of the Government of the United States to take part in the World's Columbian Exposition, to be held in Chicago from 1st May to 31st October, 1893. As it is important that a very full display of Canadian products be made at that occasion, a general invitation is extended to Canadian producers and manufacturers in agriculture, horticulture, products of forests, fisheries, minerals, machinery, manufactures, arts, etc., to assist in bringing together such a display of the natural resources and industrial products of Canada as will be a credit to the country.

An Executive Commission for Canada has been appointed, who will have the general charge of the exhibits and the allotment of space, and the several Provincial Governments have been invited to cooperate with the view of making the exhibition as complete and satisfactory as possible.

The Dominion Government will pay the transport of exhibits going and returning, and for the placing of articles sent.

Entries must be made not later than 31st July. The reception of articles at the Exhibition building will commence 1st November, 1892, and all exhibits etc. going to the Exhibition, must be in place by 1st April, 1893.

Forms of application for space and general information can be obtained on applying by letter post free, to the undersigned.

WM. RAUNDERS,  
Executive Commissioner for Canada,  
Department of Agriculture,  
Ottawa, 30th April, 1892.
