Over a thousand immigrants reached Montreal on the 14th inst.

An Icelandic paper is published in Winnipeg; edited by a woman.

Dynamite has been discovered under the walls of Woolwich arsenal.

Charles O'Connor, the great New York lawyer, was once a newspaper carrier.

Nature has sometimes made a fool, but a coxcomb is always of a man's own making.

Tens of thousands of dollars have been subscribed for the relief of Gen. Gordon.

Each man has an apitude born with him to do easily some feat impossible to any other.

Annoyance is man's leaven, the element of movement, without which we should grow mouldy.

The Emperor of Germany refuses to sanction the betrothal of Princess Victoria to Alexander, of Bulgaria.

Hon. W. S. Fielding, has resigned his position in the Nova Scotia government. His successor is not yet appointed.

The Bank of Montreal statement shows a falling off in the net profits, but the earnings are still almost 12 per cent. on the capital.

The political difference between Lords Churchill, Salisbury and Sir Stafford Northcote will likely soon settle on a friendly basis.

In the British House of Commons on Wednesday, a motion for the second reading of the Channel Tunnel bill was rejected 222 to 84.

A Michigan man claims to have seen a snake with hind legs. Michigan whiskey will please take a front seat.—*Burlington Free Press.*

The Duke of Marlborough has offered to sell twelve pictures, including Raphael and Rubens' pictures of the Holy Family, to the English Government for £2,000,000.

Brooklyn is the big bed-room of New York. Since the opening of the bridge 25,000 people, who do business in New York, have been added to the number formerly lodging there.

A gentleman with a large mouth and a proclivity to smile was only brought to complete rest by being asked by the photographer to please "try and smile within the limits of the camera only."

Warren B. Johnson, aged 65, who left California on foot in June, 1882, with a horse, wagon and a cow and a dog, arrived at home in Webster, Mass., on the 9th inst., all the animals accompanying him.

The total number of failures in the United Kingdom and Ireland, as reported weekly by Kemp's *Mercantile Gazette*, continues to show a surprising decline as compared with the records for like periods in 1883 and 1882.

One of the girls in the freshman class at Vassar startled the professor and her class brothers when called upon to decline the pronomial adjective, hic by startling off:—"Hic, haec, hoc, hug-us hug-us hug-us, quick! quick! quick!"

Principal Dawson, of McGill, who has arrived in London after his wanderings in the East, has written a paper for the May meeting of the Royal Society, on "Geology and Geological work in the Old World in their relation to Canada."

Political economists of England and Germany have concluded a careful series of calculations by which they estimate that the value of an unskilled labourer, at 25 years of age, to his country is $1,200; that is, the average sum which such a person contributes during his life to the wealth of the community in which he lives.

The first newspaper ever printed in this country by electricity, was the Zion, N. Y., *Citizen*. On the evening of March 13th, its whole edition was printed by the use of the Parker Electric Motor, which derived the current from a Parker ten-light dynamo fifteen rods away. Who says we are not progressing?

The St. John *Sun* says: Almost every boat and train arriving in St. John from the West, brings back some returning provincialists, disgusted with life in the States. Last week eleven former residents of the West side of the harbor returned home, to enter upon life anew, none the better off financially, for their sojurn under the stars and stripes.

Alderman Moon, of Toronto, who represents the Saskatchewan homestead company, has just returned from England, where he was on a lecturing tour, speaking to large audiences in London, Manchester, Edinburg and Glasgow. He is impressed with the idea that there will be a large flow of emigration from the old country to the Northwest during the summer.

"Heah, you Edwin Booth John McCullough, come right in dis yeah house and rock Henry Irving Lawrence Barrett to sleep. Clar to goodness, never seen such goins on in all my bawn days. Ain't I done tole not to be out dar playin' wid dem Irish gals. Spect you wanter grow up and follow the zample of Frederic Douglas. Ain't you got no spect for your old mudder?"

The Greek ritual forbids any lights inside of the Greek Church other than candles, and when it came to lighting the cathedral of St. Petersburg by electricity a serious difficulty presented itself. But a way was found out of it. The electric lamps were placed outside of the windows and an extra set of windows were placed outside of the lamps. The result is that the church is lighter by night than by day, the law has been complied with and everybody is happy.

The New York *Herald's* Rome correspondent confirms on authority of Cardinal Jacobini the statement that Irish bishops would meet in Rome to confer with the Pope about the end of October. The cardinal stated that the subject of Irish politics was not to be discussed. The principal matter for consideration will be educational questions. The cardinal stated positively that there was no truth in the reported illness of the Pope.

A successful experiment has been made with the object of testing the readiness of the German navy on a sudden emergency. At 8 o'clock on Tuesday morning, April 22, orders were issued without warning for the mobilization of the manœuvring squadron lying at Kiel. In a few hours the sailors and marines were on board their vessels and provisions and amunition were also embarked with great rapidity, showing that a squadron of twenty warships could if necessary have gone to sea within 24 hours.

It is curious statistical fact that 173 marriages were advertised in the *Times* in the seven days proceeding April 21, and that out of this number 80 brides were fatherless. This, I persume, says Mr. Labouchere, means that bridegrooms are looking more and more to the main chance, and only marry girls who have cash in hand. Prospects, nowadays, are not considered good enough. Mother-in-law have long been at a discount, but it would seem that young men have now come to the conclusion that ready cash is better asset than a father-in-law.

Walt Whitmen says that he does very little reading now. He doesn't think it worth while. His apparently singular remark is a protest against intellectual gormandising. It is as bad as overloading the stomach. Young people require much more food than the older people. The same is probably true in regard to intellectual pablulum. When one reaches the age of Walt Whitman, constant and systematic reading is unnecessary. Reflection or the arrange ment and classification of facts and the deduction of principles predominate over the acquisition of new facts.

Too Much Gold!

Gold is pouring into Europe from the United States at a tremendous rate. The London *Telegraph* of April 26th said:—"It is possible that the plethora of money so much complained of may be partially relieved by the introduction of the Russian and Portuguese loans next week; but against that influence must be set further large arrivals of gold. The Scythia has arrived from New York with £53,000 in gold; and the City of Rome with £389,000, and the Britannic with £186,200, are now about due from that port. The Washington has reached St. Nazaire from Central America with £27,156 in gold, chiefly for London—a much smaller remittance than for some time past. The Oregon left New York today with £300,000, and the City of Chester with £50,000 in specie. The total shipments from New York to Europe last week have amounted to £1,086,000 in gold, and £48,000 in silver." The same paper said on the 28th:—"Only a small amount of gold was sent to the Bank of England, £50,000 which arrived from America being bought for the Continent. A large total, however—nearly £680,000—from New York and Central America, is now awaiting disposal. Some of this will be taken for Holland and Germany, in connection apparently with the issue of the Russian loan, subscriptions for which will be received to-morrow; but after all deducsions a considerable balance will, no doubt, find its way to the bank. About £1,5000,000 is known to be still *en route* from New York, two-thirds of which is for England and the remainder for the Continent."

IT is a fact worth knowing that Mrs. Sophia Potter's Bone Rheumatic Liniment cannot be excelled for removing pain and soreness. All we ask is a trial that you may be convinced of the truth of our statement. Our experience is that one bottle tried also sells many more.
