Excellent Driving Records Chalked Up By P.E.I. Disabled

The disabled drivers on the Island have proven themselves capable and efficient operators of automobiles. J. A. Gallant, Motor Vehicle Registrar says that he is proud of the fine job that these people are doing and the example that they set.

These people may frequently be seen in action as most of their automobiles bear a special plate marked "caution-hand controls."

Mr. Gallant said that these people have a good driving record chiefly because they are aware of their handicaps and have developed the know how to keep out of tight spots.

He said that many drivers that have all their limbs and both their eyes have another handicap that leads them to serious accidents; they are not capable of using their heads.

Perhaps we could all take a few trips from our handicapped drivers, he declared.

San Patients Entertained

The Charlottetown Choral under the capable direction of Mrs. G. E. Full entertained the Sanatorium patients on Monday evening.

Over 40 patients assembled in the auditorium which was gaily decorated for the Christmas season. The remainder of the patients heard the program of well chosen Christmas carols over the intercom system.

Mrs. S. S. Carson acted as narrator for the evening.

The following selections were beautifully sung: We Wish you a Merry Christmas; Deck the Halls; What Child is This; The Coventry Carol; Sno-Gan, Jingle Bells; Willie Take Your Drum; Christmas Bell Carol; Joy To The World and Silent Night.

At the close of the program on behalf of the patients, Mrs. Full and members of the Choral were thanked by the medical superintendent.

St. Mary's

(Continued from page 1)
If possible by September 1960, with the usual school facilities, space and facilities for domestic science, and an assembly hall with a seating capacity of 600-700 for an annual rent of \$22,000 or \$440,000 for twenty years.

After twenty years, this 27 room school would be made available, without rental, on condition that the board provide needed replacements; e.g. seats, furnace etc.

"The adoption of this proposal would cost the town in a 20-year period, \$707,005.04 less than the cost of a 27-room school built by the school board, and in fact, \$75,005.04 less than the carrying charges on the loan required to build this school."

SECOND PROPOSAL

"Our commission will supply an assembly hall with a seating capacity of 600-700 space and facilities for domestic science, 11 classrooms, and land upon which the town may build a 16-room school for an annual rental of \$1,500. After twenty years, the Academy's facilities would be made available without cost, to the board on condition that the board provide needed replacements."

"Acceptance of this proposition would cost the town, in a 20-year period, the sum of \$711,488.20 or \$271,488.20 more than our first proposal, and \$435,516.84 less than a 27-room school built by the school board."

"The third proposal was: 'our commission will provide 25 classrooms for an annual rental of \$2,300. It is to be observed that no provision is made to the proposal for domestic science or for an assembly hall.'

"IMPROVEMENT"
The commission contended that acceptance of any one of the proposals would result in general improvement to education in the town without militating against the "kind of quality of education provided for non-catholic children."

The contention was that such education would be improved as schools would be kept to a reasonable size and that improved education for the Roman Catholic children would beneficially affect the entire community.

They added that improved interdenominational relations would result and the wishes of the parents of the majority of pupils in grades 1 to 10 would be "satisfied."

Mr. Gordon said he had "absolutely no comment."

USELESS DISCUSSION

The union said "it was useless to discuss production when the cost of that production was not made available to the committee."

Mr. Manson declined comment on what effect, if any, the matter would have on the success of the committee, set up to collect facts on the current crisis in the coal industry.

The committee was formed after Dosco announced it would be forced to close three of its Cape Breton mines if new markets could not be found."

... of Jan. 4 as follows: Monday evening in Park Royal United Church; Tuesday evening in the Baptist Church; Wednesday evening in St. Paul's Church; Thursday evening in Trinity Church; and Friday evening in Zion Church.

Prof. Corston will also address a meeting of the Ministerial Association Tuesday afternoon, January 5.

Plans were laid for further addresses and papers in the months following, Rev. Frank MacLean giving a review of his visit to Britain and the continent in February, and Rev. T.H.B. Somers presenting a paper on "The Presbyterian Doctrine of Ordination" at the March meeting.

The meeting closed with a vote of appreciation to Rev. H. L. Milton and the members of the executive for a significant year of fellowship and work.

THE ARROW in the above picture shows approximately the spot from where Fred Gallant, of St. Charles, a workman for a construction company fell yesterday and where he landed at the base of the steel framework. The young man sustained multiple injuries. The building under construction on Cumberland Street in Charlottetown is an addition to the Maritime Electric Company plant.

Worker Seriously Injured in Long Fall From Building

Fred Gallant, 21-year-old resident of St. Charles lies unconscious in the Charlottetown Hospital following an accident which occurred at the Maritime Electric plant at the foot of Cumberland Street shortly before noon yesterday.

Gallant and the job foreman, E. Miller of Halifax were on a two-man movable stage welding steel studs into the face of the outer cross beams and had worked their way to the topmost tricer when the apparatus to which

the south end of the stage was attached let go.

Foreman Miller who was on that end felt the tremble and shouted to his partner and grasped the edge of the nearby stringer. Gallant, however, was unable to save himself and was pitched headlong past Miller to the ground below. An ambulance was called and he was rushed to the hospital immediately. His condition was reported as "fair".

Both Gallant and Miller were employees of the Guildford Construction Company of Halifax which has the sub-contract to erect the outer wall of the new addition to the power plant. M.E. Schurman Co. are the general contractors for the building.

A.C. Cameron, manager of the Maritime Electric Company said yesterday afternoon that work on the new addition had commenced the latter part of August but that due to a shortage of material the erection of the steel frame had not commenced until Nov. 8.

The Guildford people too had been help up for material and had been working on their part of the job for a few days only.

Mr. Cameron said the new structure would house the new boiler the company intended to set up. A new turbine house will be erected nearby.

LOCAL BRIEFS

LEAVE FOR OTTAWA

Hon. R.R. Bell, attorney-general, and Hon. Leo Rossiter, minister of industry and natural resources and fisheries, are leaving today for Ottawa where they will attend a two-day meeting for preliminary discussions on conservation. The two cabinet members are expected to return the latter part of this week.

HAZARD FUNERAL

The funeral for Miss Mary Elizabeth Hazard, was held on Tuesday, Dec. 15th, 1959 from the MacLean Funeral Home where the service was conducted by Rev. Canon E.M. Malone. The pallbearers were, M.W. Weeks, D.M. Gass, E.B. Jones, G.J. Rogers, Allan MacLeod, R.E. Hyndman. Interment took place in Sherwood cemetery.

ARTICLE PUBLISHED

A Charlottetown author, Sonia MacRae, has an article appearing in the December issue of the United Church Observer. It is entitled "Whose Birthday is it?" and deals with the question of a child as to whether Christmas is the anniversary of Jesus' birth or that of Santa Claus. The building of a miniature Nativity scene helps set the child's thinking straight.

Coal Fact-Finding Committee Said Unable To Find Any Facts

GLACE BAY, N.S. (CP)—District 26 of the United Mine Workers of America (Ind.) said here Tuesday a special fact-finding committee set up to study the problems in Nova Scotia's coal industry had become "a committee that couldn't find any facts."

The union's office here released a statement after its representatives on the committee, district president Bill Marsh and research director James A. Morrison, walked out of a committee meeting in Halifax Monday.

Mines Minister Manson, chairman of the committee, said Monday the meeting had been adjourned until January. Mr. Manson said Tuesday he did not announce the union's walkout because "it seemed to be a matter for Mr. Marsh to disclose."

CLASH WITH GORDON

The union representatives clashed with Harold Gordon, Dominion Steel and Coal Corporation's coal chief, over the company's refusal to disclose production costs in its Cape Breton mines.

Mr. Manson said "the argument between Mr. Marsh and Mr. Gordon went on for some time." He said he permitted a five-minute adjournment, after which Mr.

Marsh and Mr. Morrison left the meeting. Mr. Marsh had said he was leaving only the meeting, not the committee, Mr. Manson said.

The union statement said Dosco withheld "information which was vital to the work of the committee. The cost-per-ton figure is the base from which a fact-finding committee would have to work . . ."

Mr. Gordon said he had "absolutely no comment."

USELESS DISCUSSION

The union said "it was useless to discuss production when the cost of that production was not made available to the committee."

Mr. Manson declined comment on what effect, if any, the matter would have on the success of the committee, set up to collect facts on the current crisis in the coal industry.

The committee was formed after Dosco announced it would be forced to close three of its Cape Breton mines if new markets could not be found."

GATES AJAR

CHASE CROSS, England (CP) "Iron gates from 30 shillings, open every night till seven," said an advertisement in a newspaper in this Essex community.

"You mean to say— just 3-a-day may send backache away?"

Sounds good! Logical, too! You see the normal job of the kidneys is to remove excess wastes and acids — so often the cause of backache—from the system. Dodd's Kidney Pills stimulate the kidneys in this function and so may bring you that welcome relief from backache they have many others. Try just 3-a-day. You can depend on Dodd's—in the blue box with the red band. 64
