

THE DAILY EXAMINER.

AUGUST 16, 1888.

The Colchester Election.

The election of Sir Adams Archibald by a very large majority is what everybody expected; and contrary to the result of many another election, what everybody expected has come to pass in this instance.

Sir Adams Archibald is a man of great ability, of great experience in the politics of Canada, of unblemished probity, — such a man as the nation ought to have in its supreme council. But his election, yesterday, was much more than a recognition of his fitness for a seat in the House of Commons. It was an expression of the enlightened public opinion of Colchester that the National Policy is, on the whole, a good thing for Canada; that the Canadian Pacific Railway is an assured and magnificent "success"; that the general policy and administration of the Government, in the past ten years, have been adapted to the needs and interests of the country; that an "unrestricted reciprocity" which would inevitably result in the vassalage of the people of this country to the United States, is not to be thought of; and that the tricks and fads of the Grits are becoming much too thin.

We congratulate the people and the Government on the election of Sir Adams Archibald. For Sir John McDonald, it is the latest of a series of victories which without parallel in political history — a series of victories for which a parallel can only be found in military annals, — in the career of a Cæsar or a Napoleon.

Crop Prospects.

It is pleasing, indeed, to learn that the crops throughout Canada are, on the whole, in excellent condition, and that the prospects of a bountiful harvest are good. From returns recently submitted by the Winnipeg Board of Trade, we learn that the crops throughout Manitoba are doing splendidly. These returns show an increase in wheat acreage over last year of 25 per cent., in barley of 25 per cent., and in oats from 10 to 15 per cent. This is very reassuring in the face of recent reports as to the damage done by the late cool wave.

In the United States, however, the prospects are not so good. The Rural New Yorker, a recognized authority, says that "the winter wheat harvest is now completed and shows no improvement in quantity over previous estimates and frequent and heavy rains during harvest have caused a decided depreciation in quality. It is an unsatisfactory crop to handle, and millers find it difficult to get enough of a quality to keep up the standard of last season's flour. The spring harvest is now in progress and the quantity and quality promises to be from ten to fifteen per cent. below last year's crop."

England has also had a bad harvest, and the reports from Russia and Hungary are being toned down so that the wheat interests of the world bid fair to be stronger than for years.

Late Irish News.

DUBLIN, Aug. 14. — At the regular meeting of the national league to-day, Dr. Counsel, the chairman, said the Irish party in parliament hoped that before the commission of inquiry had proceeded far in its work, a decision would be obtained in the law courts to settle the fact that the Times letters were forgeries. It would be perfectly immaterial whether the result of the commission's investigation might be when Parnell had proved the letters forgeries.

Kenny declared that Balfour stood at the bar of public opinion as the legal murderer of Mandeville and was now using his tyrannous power to injure Dillon and O'Kelly. The latter had been imprisoned for telling the people to refuse to answer questions under the infamous act. If the people had not refused to answer questions under the infamous act they would have been cowards. The latest triumph of the Parnellites was the exposure of Chamberlain, who by his own letter had proved up to the hilt the truth of Parnell's accusations.

LONDON, Aug. 14. — The Pall Mall Gazette, commenting on the action of Parnell in bringing suit against the Times in Scotch courts, says: "Parnell's trick seems to please his supporters and disquiet his foes; but it resembles playing fast and loose, and we doubt whether it will do its contrivers any good. The tardy adoption of the course which he refused to take when it should have been useful to his English allies will not be understood. The commission will proceed. Parnell cannot arrest it. If he refuses to testify before it he will harm nobody so much as himself."

Parnell's summons against the Times will be called at Edinburgh, September 13th, when parties to the action must appear. An order will then be issued to lodge defences, which will be on October 16th. The issues will be placed before the court for adjustment on October 28th. The trial will begin in November at the earliest, and possibly may not take place until after the Christmas recess of the court, if either side to the case should exercise the right to take the case to the Inner court, where the lord president and a jury would try the action.

In England the courts interfere curiously in the adjustment of religious questions. The latest instance is the prosecution of a clergyman for using water instead of wine in celebrating the holy communion. The clergyman was reprimanded by the judge and mulcted in the costs.

Was Millman Innocent?

THE OPINION OF AMERICAN DETECTIVES.

The following letter appears in the Montreal Times to hand this morning: — "NEWCASTLE, Aug. 13. "EDITOR Times: In reference to the Millman case, which I see referred to in a late issue, I may say that shortly after the execution of Millman a discussion took place between some young men in regard to Millman's guilt, the majority believing Millman innocent. It was agreed to send the whole evidence, including the statement of Millman before execution, to three well known American detectives, one of whom has a world wide reputation. We agreed to wait till we got the opinion of all before opening any, and some of us were not a little surprised to find that the whole three expressed the opinion that William Millman was innocent; one saying he believed it impossible that he could be guilty. Since the reported confirmation of their opinion in Ottawa, I think it right to publish this."

The Rifle.

Launch of the Halifax.

(North British Mail, Glasgow, July 28.)

At Govan yesterday afternoon there was launched by the London and Glasgow Engineering and Shipbuilding Co. a very fine cargo and passenger steamer, the Halifax, built to the order of the Canada Atlantic Steamship Co., of Halifax, Nova Scotia, for their Charlottetown, Halifax, and Boston passenger service. It is a steel screw steamer of about 1600 tons gross register, having been built under special survey of Lloyd's and Board of Trade. The vessel has been specially designed for the trade intended, and combines large carrying capacity with a guaranteed speed of 15 knots per hour. She is to be commanded by Capt. J. R. Hill, of Halifax, N. S., who is well known in shipbuilding circles on the Clyde, and under whose superintendence she was specially designed and built. Splendid accommodation has been provided for 350 first-class passengers, the saloon being spacious and beautifully furnished. The state rooms are large, and a thorough system of ventilation is provided, and the incandescent electric light is fitted in every part of the ship, even to engine-room, tunnel and stoke-hole. There are three decks, main, spar and shade deck. The latter extends from taffrail forward, to within 20 feet of stem, forming a spacious promenade for passengers. On same deck is a large smoking room amidships over saloon, and pilot house forward, in which there is beautifully furnished accommodation for captain and officers. The accommodation for engineers, petty officers, firemen, and seamen is arranged amidships, together with galley, pantry, bar, ice-house, and other usual fittings for a first-class passenger steamer. Under the spar deck forward is comfortable accommodation for 50 second-class passengers. On spar deck forward is a large social hall with several state rooms, including two spacious bridal chambers. On same deck is a large dining saloon suitably fitted to seat 80 people. Several superior state-rooms are also arranged in this part of the vessel. She is fitted with baths, lavatories, and state-room basins, supplied with hot and cold water, regulated by patent spring taps; also steam heating apparatus throughout, steam steering gear act, worked from pilot house with connecting steel rods; steam winches at each of the three hatches, steam warping captain aft, steam windlass and captain forward. On main deck are ladies' cabin, state rooms, and sleeping berths, to accommodate 175 first-class passengers. The vessel has water-tight bulkheads, water ballast and double bottom, double plates and superior strength in bows, to withstand shocks from ice and other collision, and all the most recent appliances for safety and comfort. Her engines are of the most modern approved type, supplied by the builders, being triple-expansion, to indicate about 2,000 horse power, and it is confidently expected that a high rate of speed will be attained. The Halifax, on leaving the ways, was most gracefully christened by Miss Bessie Forsyth, daughter of Mr. George E. Forsyth, of Halifax, Nova Scotia, one of the directors of the company. The steamer will shortly go on berth to receive cargo for Halifax direct, and will be despatched thence by Messrs. Bruce, Babbie & Co., 58 Renfield Street, who are the Glasgow agents for the company.
