Leave Rocky Point at 10 a. m. and 1.15, 3 and 5 o'clock p. m.  
Dated 1st May, A. D. 1899

Breathing and Malaria.  
The importance of guarding against aerial transmission of malaria is shown by the personal observations of Dr. Maurer. In Africa he had spent nights tramping in the marshes without suffering the least inconvenience, while his assistants suffered from chills, merely because they did not seem to be able, literally speaking, to keep their mouths shut. He absolutely refrained from talking, so as to allow none of the miasmatic air to reach his lungs through the mouth, the nasal passages, as is well known, acting as a sterilizing apparatus through the destructive action of the nasal secretions upon atmospheric organisms.—Exchange.

Cheap Injury.  
Casey—Shure, an it's th' unlucky mon Oi am!  
Claney—Unlucky be dom'd! How'n't yez kim out av th' wreck wid only a broken arm?  
Casey (sarcastically)—An for which Oi only git foive hundred dollars! Thim follies thot wor kilt git foive thousand.—New York Journal.

The ballet is said to have been invented by the Duchess of Maine, in Paris.

Oranges, limes, bananas and coconuts grow wild in Costa Rica.

No Gripe, Pain

Artificial Teeth  
on Metal Plates

A dentist who knows his business, and one that has any regard for his patients will always advise them to have a metal plate.  
PROF. MELVILLE B. BUCKLEY,  
Instructor Boston Dental College,  
Boston Mass

In view of the vast amount of injury done to the mouths of wearers of rubber or vulcanite plates, by the retention of undue heat, owing to the non conductivity of rubber, and as aluminum is now so cheaply produced, and making as it does a rigid, light, clean, unobjectionable plate there seems no reason why any person should wear a rubber or vulcanite plate. Not only this, but better results in fit and adhesion are obtained in difficult cases, than in the use of rubber.

L. P. HASKELL, D. D. S.  
Chicago Ill Dental School  
The above quotations are from hundreds by eminent dentists whose close observation in many years experience in plate work has learned them the many advantages of metal over rubber.  
Many persons who are compelled to wear artificial teeth on a plate find that the ordinary plate causes heating of the mouth, bad taste, shrinkage of the gums, etc., finally causing the plate to get loose, sometimes sore lips, sore mouths and sore throats, and caused directly from the wearing of an ordinary plate.

We recommend a metal plate either of  
Gold, Platinum, Aluminum.

It is a conductor of heat and cold, it is non-irritating, and is thin, lighter, and stronger than any other plate.  
We have testimonials from persons for whom we have made metal plates—not one would wear an ordinary plate again. You can have your impression taken, and a metal plate made same day, fully guaranteed because we make them ourselves, and know all about the material used. Call and see specimens of our work.  
Every piece of work done by us must give entire satisfaction to the patient, else we will not allow it to leave our office.

See our artificial teeth without plates.
