Grateful—Comforting.

Epps's Cocoa.

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the properties of well-selected Cacoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage whico may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified by pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus,

### RAISING A RAILROAD BRIDGE.

**Lifted Five Feet Without Interrupting Traffic.**

The raising of a bridge in Switzerland upon the line of the International Railway, from Paris to Vienna, has attracted considerable attention from the methods pursued. The occasion for the change was that the river crossed—the Rhine—had lost in the sectional area of the passage between the piers, about twenty-five per cent in thirteen years, owing to the deposition of gravel and sediment, while the high water level had risen to such an extent as to pile floating debris six feet deep on the bridge floor in times of flood. The alterations included some reinforcements, beside the raising of the whole structure about five feet. The bridge was continuous over a centre pier, and had two main vertical posts there and four vertical end posts. To each of these posts an inclined strut was attached in a transverse vertical plane, presenting a surface for the top of a hydraulic jack to act upon. Eight special 100-ton jacks were used, with an eight-inch stroke and a working pressure of 400 atmospheres, the piston being nearly 0.7 in diameter. The fluid used was a mixture of water, alcohol and glycerine. Sixteen men operated the jacks, their movements being synchronized by a code of signals, designed to secure uniformity of action. The bridge was raised a foot or two by short lifts, followed up by thorough blocking, and then building under one course of cut-stone masonry. The total load was 540 tons, and the maximum load on a single jack was 88 tons. The bridge was raised in four stages during intervals between trains. The longest interval between trains was about two hours. The weight of trains was rigidly restricted during the time the bridge was undergoing repairs, and their speed was limited to three miles an hour in crossing the bridge. In addition, a special block system was organized upon that section of the line upon which the bridge is located, so that operations could be suspended, and the track restored five minutes before the arrival of a train at the site.—Locomotive Engineering.

**Electricity in Egypt.**

That the Arabs of Egypt are not quite up with the advancement of electrical science is seen by an amusing experience of Werner Von Siemens while traveling in that country. He, with several companions, climbed the great pyramid and there attempted some experiments on atmospheric electricity. His work had not progressed far before the Arabs arrived at the conclusion that he was practicing sorcery, and became uneasy. Finally they insisted that the savants should leave the pyramid. As their entreaties and threats produced no effect, they proceeded to resort to force.

"I placed myself then at the highest point of the pyramid," said Von Siemens, "and charged my strongest Leyden jar at the moment when a chief of the band was about to seize my hand to try and pull me from the place I had chosen. At this critical moment I brought the rod of my condenser within a centimeter of his nose. The effect of the discharge was greater than anything that I could have expected of it. The son of the desert, whose nerves had never been put to such an ordeal, fell backwards as though he had been struck by lightning, but uttering a yell he sprang up and, in an instant, vanished from our vicinity followed by all his companions."

**Expansion of Girders.**

A writer on strains in girders, referring to the amount of movement of iron girders due to expansion and contraction under extreme variations of temperature, observes that for iron and steel the coefficient or rate of expansion is nearly 1 inch for 100 degrees F. of heat for every 100 feet in length. Thus a girder 60 feet in length will expand 6-10 inch for 100 degrees increase of temperature and contract the same amount for 100 degrees decrease of temperature or a girder 75 feet long will vary 75-100 inch or ¾ inch, for a variation of 100 degrees. He says: "In order to provide for all contingencies it is the general practice to allow for a vibration of 100 degrees F., or a movement equal to 1 inches for every 100 feet in length." A girder 6 feet long will therefore require to have an allowance for movement in the moving end equal to 9-10 inch or 1 inch, the other end being fixed. It is only necessary to put the rollers under one end of the girder, so that the movement of the girder may be at the end only.—Iron Age.

**Raising Useful Insects.**

"Here is an interesting colony of insects," said an entomologist who was showing a writer over his country place in the suburbs of Washington.

"You see," he explained, "a little bunch of eggs has been deposited on this stone wall. Nearly all of them are hatched already. The young insects that are newly out are yellow, while those a little older are red and black. Yes, they do look something like small spiders, but they are not such.

"They are wheel bugs. They grow to be large predatory insects as big as the end of your thumbs. Caterpillars and various other garden pests are their chosen food. So, you observe, I encourage this colony. Any one of my neighbors would promptly destroy it, but I know better. People around here wonder how my trees and plants are always in such perfect condition. Here you have one of the reasons. The wheel bug is so called because of a mark on the thorax which looks like a wheel."—Washington Star.

**No Forests, Great Floods.**

The explanation of floods like the present one and that of 1889 is as easy as rolling off a log. There comes a heavy spring rain, perhaps of several days' duration. Instead of the natural condition of mountain sides with thousands and thousands of trees, whose foliage and trunks and roots hold the rain and allow it to flow gradually into the streams and rivers, the downpour falls upon barren places, with here and there great gullies made where the felled trees have been washed down to the rivers to save hauling, and the result is that torrents pour into the rivers in an incredibly short space of time and carry destruction in their track. The only wonder is the short-sightedness of the people who for a seemingly temporary benefit are ultimately the losers. The question of the protection of the forests of the state is one that is sure to come up for legislation very soon.—Philadelphia Times.

**Lathes Without Shafting.**

Engine lathes are now made which are driven by electric motors directly on the spindle in lieu of belts.

THE LANGLEY CASE.

**Lansing People Hear of His Illness and Subsequent Cure while in London, Ont.—Much Pleasure Manifested Over the News.**

LANSING, Mich., July 2—A friend of William Langley formerly of this city, now of London Ont., received a letter a few months ago stating that Mr. Langley had Bright's disease. Of course no hope of his recovery could be held out. Within a month, the same friend has received a letter from Mr. Langley stating that he is completely cured of the supposed fatal disorder. Mr. Langley says no medicine did him any good until he began using Dodd's Kidney Pills. These helped him from the first and in the end restored him to perfect health.

**How to Get a Sunlight Picture.**

Send 25 "Sunlight soap wrappers (wrappers bearing the words "why does a woman look old sooner than a man") to Lever Bros., Ltd., 43 Scott St., Toronto, and you will receive by post a pretty picture free from advertising, and well worth framing. This is an easy way to decorate your home. The soap is the best in the market and it will only cost 1 c. postage to send in the wrappers, if you leave the ends open. Write your address carefully.

What is

CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. *It is a harmless substitute* for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhœa and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

DR. G. C. OSGOOD, Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

DR. J. F. KINCHELOE, Conway, Ark.

Castoria.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."

H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."

UNITED HOSPITAL AND DISPENSARY, Boston, Mass.

ALLEN C. SMITH, *Pres.*,

**CAUSE OF BOWEL COMPLAINTS.**

The direct cause of pain and looseness of the bowels, is an irritation of the mucous membrane of the same, sufficient to produce excessive peristaltic or worm-like motion in the interior of the bowels, thus the partly digested food matter is kept constantly passing along and evacuated freely. This is called a diarrhœa; where the irritation is enough to cause bleeding, we have dysentery. Indirect causes of diarrhœa, by which an irritation is started are intestinal dyspepsia, overeating unripe or over-ripe fruit, tainted meats, or oysters etc.; torpor of liver, by which not enough bile is secreted; excessive flow of bile, etc.; TREATMENT. Thoroughly evacuate the bowls with Parsons' Pills, they are among the best to get rid of all irritating matter. Then take Johnson's Anodyne Liniment in teaspoonful doses diluted with water, every four hours, and oftener if the case is severe. In case of Asiatic cholera, one teaspoonful should be given every half hour. Thousands of people remember the year 1849, when the worse known epidemic disease spread over this country. Johnson's Anodyne Liniment at that time was little known outside of the state of Maine. But for its use at that time by its friends, many would not now live to spread the joyful news that any case of diarrhœe, dysentery, cholera-morbus, or kindred diseases, can be cured by Johnson's Anodyne Liniment. It never yet failed. The proprietors, I. S. Johnson & Co., Boston, Mass., will send their new illustrated book, entitled "TREATMENT FOR DISEASES," free to any person for the asking.

July 25

Avoid the mood Byronic,
Dismiss dyspeptic fears;
Take Hawker's Pills and tonic,
And live a hundred years.

The sad-eyed soulful poet wrote
An ode to rippling rill;
His readers found an antidote
In Hawkers Liver Pills.

The greatest flesh and blood maker in existence and a life-saver to consumptives is Miller's Emulsion of Cod Liver Oil, "the kind that cures" bronchitis, coughs, colds and all lung troubles. Every bottle warranted. No oily taste like others. In big bottles, 50c. and $1.00, at druggists.

The torture of dyspepsia and sick headache, the agonizing itching and pain of salt rheum, are removed by Hood's Sarsaparilla.

Notice to Commercial Travellers.

The attention of Commercial Travellers is called to the following sections of an Act passed by the Legislative Assembly of Prince Edward Island, Session 1894, intituled "An Act to Impose a Direct Tax on Certain Classes of Traders":—

1. "From and after the passing of this Act every casual trader not permanently residing in this Province doing business within this Province, commonly known as "Commercial Travellers," and every person not permanently residing in this Province, and who sells either for himself or any other person any goods, wares or merchandize in this Province, or solicits or canvasses for orders either for himself or any other person for the sale, exchange or purchase of any goods, wares or merchandize within this Province, either by the production of samples, photographs, catalogues, printed or written matter, or simply by word of mouth without the production of samples, photographs, catalogues, printed or written matter, shall, before he or she enters upon the business of so selling any goods, wares or merchandize, or soliciting or canvassing for such orders, pay to the Provincial Treasurer of this Province an annual license fee or direct tax of fifteen dollars."

2. "Upon payment of the said license fee or direct tax, the said Provincial Treasurer shall grant a license authorizing the person therein named to sell goods, wares and merchandize in this Province, and to solicit and canvass for orders for the sale, exchange or purchase of goods, wares and merchandize within this Province. Such license shall be granted and remain in force for the space of one year following the date upon which the said license shall be granted and no longer."

3. "Any such Commercial Traveller or person not permanently residing in this Province as aforesaid, who, after the passing of this Act, shall sell any goods, wares or merchandize, or solicit or canvass for orders for the sale, exchange or purchase of any goods, wares or merchandize in any manner aforesaid within this Province without having first paid the said license fee or direct tax, and obtained the said license, shall for each and every occasion upon which he or she shall sell any goods, wares or merchandize, or solicit or canvass for an order for the sale, exchange or purchase of any goods, wares or merchandize as aforesaid, be liable to pay the sum of two hundred dollars to the said Provincial Treasurer."

This Act is now in force.

License can be procured in Charlottetown at the Provincial Treasury, in Summerside from Wm. T. Hunt Esq., in Georgetown from George B. Aitken Esq.

ANGUS McMILLAN, Provincial Secretary-Treasurer.

Provincial Treasury, Prince Edward Island, 15th May, 1894.
