

## Australia Fears Red China But Continues Wheat Sales

By HAROLD MORRISON  
WASHINGTON (CP) — Australia fears Communist Chinese aggression but nevertheless has sold that country more than 74,000,000 bushels of wheat on credit, Australian Ambassador Sir Howard Beale said here.

"And in heaven's name, why not?" Sir Howard exclaimed when questioned about the deal at a National Press Club luncheon appearance.

"Canada sells it (to China), Argentina and the French sell it . . . there is no moral or other reason why we should not sell it."

those commodities." Asked also why Australia restricts Japanese and other exports to its immigration policy, Sir Howard said this is a normal right of every country and observed with a smile that the U.S. allows in only 100 Australian immigrants annually — five less than the number of Chinese.

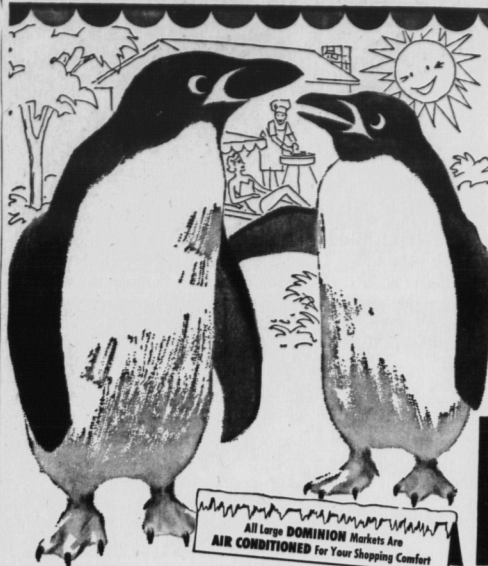

While Australia is in urgent need of more immigrants, it wants to retain its white, European background to prevent racial strife that could be fomented by large minorities.

Flanked by other Commonwealth ambassadors, including Canada's Charles S. A. Ritchie, Sir Howard spoke at the luncheon in praise and criticism of

the U.S., concluding that the U.S. and Australia must get closer together because they speak the same sort of life and face a common danger. The big danger was China which, despite its economic troubles, was still aggressive and militant and with a great population growth constituted a "formidable danger to the security of everyone in the area."

**PRICE UNCHANGED**  
GALT, Ont. (CP) — On their honeymoon in 1918 R. G. Ford and his wife hired a taxi from North Dumfries township to Hamilton. The price for the 30-mile ride was \$5. This year, the former reeve of the nearby township and his wife were celebrating their 44th wedding anniversary. They wanted to repeat the trip and asked the 1962 price. It was \$5.
