Local and Other Items.

MAN is often deceived in the age of a woman by her gray hair. Ladies, you can appear young and prevent this grayness by using Hall's Hair Renewer.

AFTER THE FLOOD.—Twins of Mrs. John Emmerling, born at Johnstown since the disaster, have been named Philip Henry Wreck and Otto Emil Flood.

WHAT HE LEFT.—A Kentucky man who was dying alone left his will in lead pencil on the head of a whiskey barrel, and it is held to be valid. The only property he left, however, was a gallon of whiskey in the barrel.

WEATHERWISE.—The cold wave of the past week has furnished a never failing topic of conversation. The weather this season has fairly outdone itself in eccentricity and turned the wisdom of the weather sages into foolishness.

A BIG LIST.—The Halifax *Chronicle* says: The Carrol left Boston on Wednesday at one o'clock with 2,700 barrels of freight and 330 passengers. This is the largest list of passengers carried between Boston and the Provinces this summer.

A CENTURY OF LIFE.—Mme. Euphroifine Le Blanc celebrated her 100th birthday on the 4th inst., at Shediac. She is a great grand daughter of Rene Le Blanc, of Minas, immortalized by Longfellow in Evangeline. She is still hale and hearty.

AN ODD SCENE.—An exchange reports that an odd scene occurred the other day in two hayfields, not an eighth of a mile apart at Lancaster, Pa. In one all work was stopped for the day by pouring rain, while in the other not a drop fell all day.

FOLLOWED HIM FROM GERMANY.—A German woman reached Halifax a few days ago in search of her husband who had left her in Germany. She had followed the runaway to New York and then to Halifax. The husband is supposed to be in King's County, N. S.

HALIFAX PRICES.—The *Chronicle* says: The market reports show that flour is still slightly advancing. Granulated sugar has gone up a quarter of a cent per pound, and the price of molasses has been raised one and two cents a gallon. Island and American salt pork has declined 50c. to $1 per barrel according to grade. Anthracite coal shows a reduction of 75 cents per ton.

A CURIOSITY.—The Chatham *World* says: Professor Smythe, (well-known in Charlottetown) has a piano curiosity. It was made in St. Petersburg and was brought to Miramichi by Capt. Harley sixty years ago. It has a solid mahogany case, inlaid with brass, and Prof. Smythe says it has several of the features which American makers have been patenting for the last few years. It has been used as a sideboard for some years, but is in perfect order.

A LIFE CONTRACT.—Irontown, O., contributes the following: William F. Moore and Bertha A. Van Duzen were married here last night, the courtship and marriage being somewhat of a romance. Miss Van Duzen was employed in a woollen mill at Wheelersburg, Ohio, and while knitting socks finished one pair very handsomely and enclosed her name and address in one of them, requesting the buyer to write her. Moore, who keeps a store near South Point, this county, bought the socks. He wrote the maiden. They exchanged photos, the result being that Miss Van Duzen has now entered into a life contract to knit fancy hose for Moore.

The Rifle.

THE annual competition of King's Co. Rifle Association was held on the Georgetown Rifle Range, on Wednesday, the 10th inst. A strong rear wind—so much dreaded by riflemen—made havoc with the scores. The President, John D. Bell, Esq., was to the front, and presented the Association with a handsome donation. In thanking the Association for the vote of thanks tendered him, he expressed his willingness to do all in his power to promote the welfare of the organization. Following are the prize winners:

First Match, 200 Yards. Highest Possible Score, 35.

	Pts.
Lieut. W C White	29
Lieut E Stewart	28
Sergt D A Stewart	27
Gunr P Ross	27

MARRIED

At the Rocklin House, on the 11th inst., by the Rev. John Read, Mr. Murdoch J. Stewart, of South Berwick, Me., to Miss Katie B. Nicholson, of Springton, P. E. I.

Telegraphic Odds and Ends.

ROME, July 10.—King Leopold of Belgium, mindful of the approach of the day for the assembling of Luzerne, Switzerland, in August, of the Catholic congress for the suppression of slavery in Africa, has proposed as the best means to conquer slavery the building of railroads throughout the new Congo.

LONDON, July 10.—A despatch from India says the river Indus overflowed its banks and the adjacent country is under ten feet of water. Forty persons were drowned at Larkhana.

SAN FRANCISCO, July 10.—Louise Caplin, once registrar of the city, committed suicide yesterday because of the discovery of a shortage of $2,000 in his accounts as police court clerk.

WINNIPEG, July 10.—There will be a pretty full yield of wheat in Manitoba and the territories this season, but other crops will be light. The harvest on the whole will largely exceed what was anticipated two weeks ago, when lack of rain threatened to minimize the yield to a considerable extent in Manitoba.

BOSTON, July 10.—Just as the pastor and deacons of the Baptist Church in Sudbury were ready to hand around communion wine and bread, on Sunday, the Church was struck by lightning and badly damaged. This is the second or third time that the church has suffered in that way. The bolt which struck Sunday hit the same spot that was struck 14 years ago. No one was injured.

TORONTO, July 10.—Crop reports from all sections of Ontario indicate that the prospects have greatly brightened since the last reports, and should the present warm weather continue the yield of wheat will be so large in favored sections as to bring the general yield above the average, notwithstanding the losses in low lying grounds. The barley and oats yield will be very large. Corn is backward and will be a poor crop. Potatoes in some sections are a total failure. The root crops are very uneven, depending largely on the nature of the soil. Fruit will not be up to the average.

HALIFAX, July 10.—Another victim of the Chezzetcook fire, by which the store and dwelling of John G. Byrd were destroyed, has died from the injuries she received. The little boy, previously burned, as particulars show, fell through a hole burned in the floor and caught on a beam. To this he clung piteously, calling "Mamma" until his hands were burned off, when, with a terrible shriek, he fell into the mass of fire below. His mother fainted, and his agonized father looked on unable to render his boy any assistance.

News Notes.

The English brewers' syndicate has purchased two of the largest breweries in Denver, Col.

The seamen at Liverpool have decided to continue the strike until their demands are granted.

The *St. James Gazette*, in order to avert further scandals, has paid the claim of Frederick Greenwood, its former editor, for breach of contract.

It having been asserted somewhere by someone that Principal Grant was the first native born moderator of the Presbyterian Church of Canada, a correspondent declares that this is a mistake, and that Dr. Maclaren, who was moderator in 1884, was born in Torbolton, Ont. Canada has produced scientists, litterateurs and scholars, and while welcoming ability from every part of the world, and every kind of ability, it is satisfactory to be reminded that we have begun to grow our own theologians.

If the New York *Tribune* is well informed that there is some temporary understanding between the British Empire and the United States to avert a collision in Behring Sea, this may lead to a settlement of this and indeeed of other questions. The *Tribune*, however, is going too fast when it assumes that the conservation of the seals on this open sea can be provided for finally by a convention between the British Empire and the United States. The high seas are common to all the world, and any restrictions imposed by the two powers on their respective people, for the protection of the seals from extermination, would not affect other maritime nations. A few sealers flying, say the Chinese or Japanese flag, might work their will on the seals, while British or United States vessels would be debarred. Nothing but a general agreement of all the maritime powers can prevent a free use of the high seas allowable under the law of nations.

Instances of the value of a firm and impartial administration of the law can be furnished im many countrtes. In India, the London *Times* relates, a dispute took place which well illustrates this point. "A few days ago a Hindoo was converted to Islam. Great rejoicings took place, in presence of the Hindoos, and a procession escorted the convert through the streets. He was on horseback, and wore garlands of flowers. This procession hurt the Hindoos, who rose up by hundreds, armed with sticks and clubs, and are said to have beaten the Mahomedans. The latter are now preparing to attack the Hindoos, while the police authorities are endeavoring to persuade them to refrain from creating further disturbances. Religious and race jealousies between Mahomedans and Hindoos show no signs of abatement with time, and were it not for the cold, stern impartiality of the British authority in India these rival communities would very soon involve the whole country in civil war. On the faintest relaxation of supreme executive control the task of maintaining in due subordination these terrible rival animosities would rapidly become impossible." Even in our country a government which rises above sectional disputes and calmly enforces the law as it is found, does not escape the attacks of demagogues, and the dupes of demagogues.

LETTERS TO THE EDITOR.

A Justification Needed.

SIR,—Allow me, through your columns, to enquire of the City Council and Chief of the Fire Department in reference to the following:—

In 1885 the City Council and Chief of Fire Department sent an order to Messrs. Merryweather, of London, for boiler tubes for the Merryweather Steam Fire Engine. Messrs. Merryweather refused to fill the order, and referred the matter to Messrs. T. & S., of Liverpool, with whom they had previously done business for this city. They declined at first to become responsible for the amount; but, after some correspondence with Messrs. M., assumed it, and the tubing was forwarded and received by the city. When the city remitted draft to Messrs. T. & S., they for some reason witheld twenty-two shillings and sevenpence, and although Messrs. T. & S. have several times requested payment, it has not been made. As a resident, this matter was recently brought to my notice by Messrs. T. & S., who also showed me the correspondence between themselves and Messrs. Merryweather, and who very justly spoke in anything but a kindly manner of the way they had been treated after obliging our city as they had done, and for which they had not received nor charged any remuneration. I wish to know how the City Council justifies itself in this matter.

CIVITAS.

Closing the Pumps.

SIR,—There appeared a letter in THE EXAMINER of the 10th inst., over the signature of "Sanitas," advocating the closing of all the pumps in the city, on the ground that the water was unfit for use. Sir, it is a well known fact that all the pumps have not got bad water. Heartz' pump and Quirk's pump and a few others have good water, and cannot be closed. If you try to close Heartz's pump it would lead to something serious. Notice all the horses and cows that water there daily, besides the continual run for house use. Ask the people who reside in that part of the city if they will consent to have it closed, and you will find them indignant. They are quite satisfied with the quality of the water, so much so that there are but few men in that place who have taken water from the waterworks; and I believe that is the cause of all the trouble. To try to force the people to take the water from the city waterworks before they have made any provision for a supply for the poor! Are the poor to be trodden down and left without water? Who could have thought that any tyrant or body of tyrants would attempt to show themselves so soon?—before they had completed their great reservoir or made it tight. Beside this, there is a number of poor that cannot take water, cannot pay for it, and a number of houses which are not fit to put the water into. What are you going to do with them? Starve them out? Those that have got the water in their houses dare not give one pail of water to a neighbor under the penalty of twenty dollars fine. My advice to those people attempted to be trodden down is too watch for those tyrants next election, and see if there are any of them among the retiring Councilors, and send them home and put men in their places that will deal kindly to the poor—no matter who they are, whether City Councillors or Water Commissioners—deal with them as their merits deserve. Men that would trample upon your liberties and take the water from you under false pretences, saying that the water is poisoned and fit to breed fevers, watch for them and do for them as they deserve!

Yours truly,

FAIR PLAY.

Charlottetown, July 12, 1889.

Late Irish News.

PARTY PLANS—WHAT DAVITT TELLS—BURKE TO BE EXTRADITED.

LONDON, July 10.—Parnell authorizes the announcement that the Irish party will immediately form a tenants' defence league for protection against the landlord syndicate. William O'Brien yesterday announced that a few days would see the formation of a league uniting the Irish throughout the world for a final struggle against the landlords.

LONDON, July 10.—Michael Davitt appeared before the Parnell commission again to-day. He complained that somebody who desired to injure the Irish in the eyes of the British public had placed two bogus dynamite machines within the precincts of the court. Out of this the *Evening Post* made a sensational article, which said the incident indicated the danger the court incurred. Davitt, in an excited manner, asserted his belief that the affair was planned by LeCaron and Houston. Presiding Justice Hannen said he himself regarded the matter as a silly hoax.

WINNIPEG, Man., July 10.—Judgment was rendered to-day by Judge Bain, in the case of Martin Burke, who was ordered to be extradited for the murder of Dr. Cronin at Chicago. There was a thrilling scene in the court when Charles Carlson, standing in the witness box, pointing to Burke in the felon's dock, said: "There sits the man, Frank Williams, who rented the cottage from my father, in which the murder was committed. I fully identify him, as I know him perfectly." Burke turned all colors and showed much emotion.

CHICAGO, July 10.—At a special secret session of the executive committee of the Citizens' Association last night, it was decided to raise a large fund to aid in the prosecution of Cronin's murderers.

UNTIL the blood is cleansed of impurities, it is useless to attempt the cure of any disease. Rheumatism, which is traceable to an acid in the blood, has been cured, in numerous cases, by the use of Ayer's Sarsaparilla, external
