

**Trinity W. M. S. Hold Meeting**

The Afternoon Auxiliary of the W.M.S. of Trinity Church, Charlottetown held their Thanksgiving service in the Social Hall on Oct. 7, at 3 p.m., with the President,

Mrs. L. W. Saunders in the chair. Mrs. A. F. MacLean conducted the worship service taking as her theme "Thankfulness." The meeting opened with hymn, "O Sing to the Lord of the Harvest." Scripture Lesson Ps. 34. Mrs. MacLean based her remarks on a poem by the Rev. J. W. A. Nicholson, "Thoughtful and Thank-

ful." The prayer of General Thanksgiving was followed by a beautifully rendered solo by Miss Wilson "Life's Lovely Things," accompanied by Mrs. Parker. Instead of the Study Book, Mr. Laner Mack showed a film on the work carried on in the Leper Colony in India. Mr. Mack told of the great advance in the treat-

ment of leprosy with new drugs and gave an interesting commentary on the film as it was being shown.

The treasurer reported the packets had arrived for the Mission Band, also the New Book Shelf. These are now available to the members. A nominating committee was appointed to bring in a slate of officers by December. Meeting closed with the Mizpah Benediction.

Donald of Ottawa, league publicity director.

**Kit Tip**

EVEN BEFORE the turn of the century, polar and other explorers found that boxes of light, non-rusting aluminum gave their precious first-aid equipment more protection from rough usage and rough weather.

Manufacturers took the tip. Today, especially in factories where industrial processes create humid or corrosive conditions, aluminum boxes are used to keep first-aid kits in good shape.

In fact, aluminum is now popular for boxes to hold everything from tools to trout flies. And for countless other containers that must stay clean, bright, free from rust. Aluminum Company of Canada, Ltd. (Alcan).

**Strange But True**

By F. H. MacArthur

Did you know that each frog mother lays about 5,000 eggs in a single season, that half of each egg is light yellow while the upper half is black? Too, it is interesting to note that the light yellow part is food stored in the egg for the young tadpoles, who live in the dark of the egg.

It is remarkable, too, that these creatures live in water when young and on land when grown up.

The midgits among frogs is the spring peepers. We all have heard their chorus ringing out from swamp and pond. Indeed, the songs of the peepers are a harbinger of spring.

There are about 150 birds which summer in the garden of the gulf but as a matter of fact very few persons ever see more than 15 or 20. Why? Because we are unfamiliar with their places of residence. Again, it takes keen eyes to see some birds, as well as considerable knowledge of how to walk through the meadows and woods in order not to disturb them. Another reason why we are not acquainted with more of our summer visitors is that bird life is most active between four and six in the morning and nowadays not many of us care to arise so early.

What's the difference between a leopard and a panther? None. These animals are found in both Africa and India. In the first mentioned place they go by the name of leopards, while in India they are usually called panthers. They are blood-thirsty animals destroying in one year over 10,000 cattle in Bengal alone. Where their numbers have shrunk to any extent the wild porkers have increased to such an extent that they are doing more damage than the leopards. Nature knows how to keep a proper balance but when man interferes with nature everything seems to go haywire.

One could play with a baby leopard as one would with an ordinary kitten. When grown up they are never to be trusted no matter how tame they appear to be.

In the Amazon River there is an eel that totes an electric battery strong enough to shock a man and kill its fish enemies.

**To Address Air Cadet Meeting**

OTTAWA, (CP)—J. Gustave LeDroit of Montreal, vice-president of the Air Cadet League of Canada, will address annual meetings of the league in the Maritimes, the league announced today.

He will leave Montreal Monday accompanied by Air Commodore Martin Costello, air officer commanding Maritime command, Halifax; Wing Cmdr. T. T. Scovill, air cadet liaison officer at RCAF headquarters; and Arthur Mac-
