GRAIN

WINNIPEG, March 11—(CP)—Sharp declines in rye prices featured coarse grains trading during Saturday's short session on Winnipeg Grain Exchange.

May rye dropped the full 10-cent limit and there were wide losses in July and October, the other two trading months. Increased offerings and thin support were responsible for the falls.

Prices were easier in other grains too, in sympathy with the trend at United States markets. Commercial demand was not aggressive.

There were limited purchases of oats by domestic shippers and some export demand for barley, to cover an estimated 100,000-bushel purchase by Belgium.

Trading, dull at the opening, became more active as the session developed.

Class two and I.W.A. wheat prices were down 1-8 cent in all grades.

Close:

Oats: May 1.02 5-8; July 92 1-8A; Oct 86 5-8.

Barley: May 1.57B; July 1.46 3-8B; Oct 1.32 5-8—3-4.

Rye: May 2.27 7-8An; July 2.11 1-4; Oct 1.82 1-2.

Flax: May 5.26 1-2B; July 5.03 1-4A; Oct 4.60N.

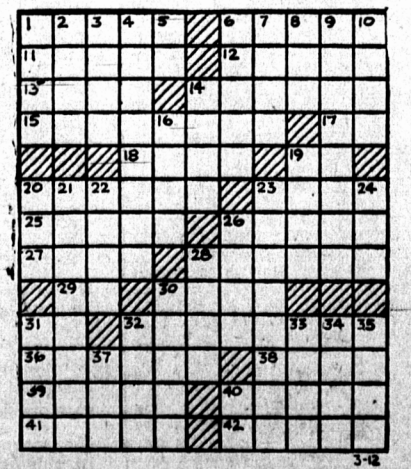
Saturday's Answer



DAILY CRYPTOQUOTE—Here's how to work it:

A X Y D L B A A X B
is L O N G F E L L O W

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

J L N F X N J C I E C G G L Y . E L Y H G D X F V M N C P H J X, O L P P C N F I W L G P H T X Z H K K M ' X N P C A X P D X T N H J X — F N I F X Y.

Saturday's Cryptoquote: HARD FATE OF MAN, ON WHOM THE HEAVENS BESTOW A DROP OF PLEASURE FOR A SEA OF WOE—JONES.

Business Spotlight

By FORBES RHUDE
(Canadian Press Business Editor)

Uranium—the material of atomic energy — may be magic stuff, but there is no magic way of finding it. It is found like any other mineral, by long and hard work.

This was emphasized yesterday by W. J. Bennett, president of Eldorado Mining and Refining (1944) Ltd., the government-owned company which at present is the only Canadian producer of uranium, and which stands ready to buy all Canadian production which develops. Speaking to the annual convention of the Prospectors and Developers Association, he said in part:

"I should be something less than honest were I to say that the work of the past three years has been entirely satisfactory, considered in terms of its contribution to the increase of the supply of uranium on this continent.

"I will, however, qualify this judgment — we have all been too optimistic as to the time that would be required to locate and develop new reserves. The experience with other minerals should have warned us that producing mines are not discovered very frequently, and they are rarely discovered without intensive and widespread exploration.

Mr. Bennett cited the case of Eldorado's property at Beaverlodge, Sask., which he forecast will be a producer at least equal to and probably in excess of Eldorado's property at Great Bear Lake, N. W. T.

"The surface showings on the Ace property were in no sense phenomenal . . . every step in the surface exploration and underground development had to be planned carefully. Decisions were not arrived at by sudden inspiration, but were hammered out on the anvil of experience and sound mining practice."

Mr. Bennett announced to the convention that an additional $1.25 a pound will be paid as a special development allowance for the first three years of production or any part of that time. This is in addition to the present price which, in effect, totals as high as $6 a pound. Payments are for the concentrate known as U308 from which uranium is later extracted.
