

Ice Water.—Doctors Disagree.

A celebrated physician says "All ice-water drinking is bad" also that "a severe blow upon the body just over the solar plexus," which in good United States language means an important portion of the nervous system located just back of the stomach, "will cause almost instant death," and he further says "the sudden shock caused by a deluge of ice-water into the stomach has exactly the same effect upon the solar plexus as the blow, and may cause sudden death by its action upon it and through that on the heart."
