Lost

LOST - CHROME WHEEL DISC between Charlottetown and Summerside. Finder please notify L.A. Hynes, 221 Weymouth Street. Phone 314. Reward.

Says Mackenzie King Feared Uprising In 1944

TORONTO, Oct. 19 (CP) - Bruce Hutchison says that Prime Minister Mackenzie King convinced himself in 1944 that unless conscription were introduced Canada faced "a military uprising which might seize the civil power, a state of national anarchy, nothing less."

It was because of this threat—real or imagined—the writer says, that King was able to hold the bulk of his anti-conscription ministers in the cabinet while executing the about-face of conscription for overseas service 16,000 draftees of the home defence army.

The story is told in a condensed extract in Maclean's Magazine from Hutchison's biography of King, "The Incredible Canadian," to be published soon by Longmans, Green.

According to King's account, Hutchison relates, Defence Minister McNaughton telephoned the Prime Minister Nov. 22, 1944, with word that the military commanders of Canada no longer would accept the responsibility of directing the army unless conscription were applied immediately.

"He hung up the telephone knowing, he said, that he no longer faced a political crisis, or even a racial schism, but a disintegration of the army—a military uprising..."

What happened then, Hutchison says, was that King went with this secret, too terrible to be told to the cabinet, to Justice Minister St. Laurent only. Mr. St. Laurent, who had never pledged himself against conscription, was first incredulous but eventually consented to immediate conscription and was followed by the other anti-conscriptionist ministers except Air Minister Power.

Hutchison calls this question—whether there was in fact danger of a military push—"the most fascinating riddle in Canadian history."

"The believers so far have produced no concrete evidence to support King's conclusion. They have not named a single officer who was about to resign... but they argue, and powerfully, that the whole atmosphere of the army... was charged with eruption..."

"The disbelievers, or some of them, are ready to agree that King may have convinced himself of these dangers, since he could convince himself of anything at will, but they think it was an act of will in pursuance of a deep-laid strategy. King, in this view, had reached the end of his non-conscription policy."

"His problem, then, was to sell the opposite policy to French Canada... there was no use trying to persuade St. Laurent or Quebec to accept conscription on its merits... some much larger argument, some supreme emergency and nothing less could shake St. Laurent and the other Quebec leaders."

Lake Shore To Omit Dividend

KIRKLAND LAKE, Oct. 19 (CP)—Directors of Lake Shore Mines Limited said Wednesday the company will omit the regular 10-cent dividend due Nov. 1. This is the first time the company has missed a payment since its initial five-cent dividend in 1918.

G. F. Doggett, secretary, said the dividend was cancelled to conserve funds for development work.

The stock dropped about \$1 to \$7.90 a share today on the Toronto Exchange. About 8,000 shares traded.

Report New Pill Method Of Birth Control

WASHINGTON, Oct. 19 (AP)—Successful human use of pills as a method of birth control was reported recently by a Boston doctor.

The report on the new pills was made by Dr. Benjamin Sieve, who, while reporting preliminary success with them, declared further extensive studies must be made before the general use of this anti-fertility factor is warranted.

Dr. Sieve, in a report in the technical journal "Science," said 298 married couples had experienced complete lack of fertility during periods ranging from three to 30 months while taking the pills.

He emphasized that the anti-fertility action of the chemical prevails only while it is being taken. He said 220 of the women have had a baby or have become pregnant since terminating a period of control.

The chemical is called "phosphorylated hesperidin," and Dr. Sieve said it has previously been employed as a chemical to counteract haemorrhage.

It is believed to act as an anti-fertility factor, he added, by interfering with the action of a body chemical called "hyaluronidase" which in turn is believed to aid in the impregnation of the female egg by the male sperm.

Saying that the substance "promotes safe and controllable anti-fertility," Dr. Sieve said it "can be taken indefinitely without toxic (harmful) effects or permanent inhibition of fertility."

The pills are taken at breakfast, lunch and dinner in dosages regulated for particular persons—and are taken by both the husband and wife. The pills must be taken for 10 consecutive days before their action becomes effective, must be taken continuously thereafter to insure lack of fertility but "fertility can be restored merely by omitting the drug for a 48-hour period."

Catholic Comment. Rev. Francis J. Connell, a Redemptorist priest, and dean of the School of Sacred Theology at the Catholic University of America, when asked to comment on the report, said:

"Any use of such a substance

N. Y. Stocks In Robust Recovery After Decline

NEW YORK, Oct. 19 (AP)—The stock market last week ran into a thumping big decline and then staged a robust recovery.

The one-day recovery was not as great as the three days of decline, but it gave encouragement to bulls who still are hoping for a traditional pre-election rally.

The Associated Press average of 60 stocks lost \$1.40 on the week, heaviest loss since the week ended Sept. 12. Volume built up to nearly 6,000,000 shares in the four trading days last week after the recess Monday for Columbus Day.

The daily average came to 1,489,000 shares. The market was up slightly on balance, the previous week, but when it reopened Tuesday it was in a bearish mood and backed down moderately on less than average volume.

Wednesday brought the fireworks. The AP average dropped \$1.60, an amount equalled twice but not exceeded since May 18, 1951. Volume mounted to the highest level since mid-April.

The decline continued Thursday until the railroads suddenly turned and started up. Rails ended the day higher and the loss for the market as a whole was 60 cents in the AP average.

Friday the market right from the start rallied and continued to advance all day with a strong close. It was the best advance in 4 1/2 months.

Canadian issues closed the week higher. Up a full point were Canadian Pacific and Hiram Walker. Distillers Seagram added 5/8, Dome Mines advanced 3/4 and International Nickel was ahead 1/2. McIntyre slipped 1/2.

On the Curb, both Giant Yellowknife and Lake Shore were up 1/4 and Royalite Oil added 1/2.

Gives Talk On Energy Sources

WINNIPEG, Oct. 19 (CP)—An Edmonton scientist said Wednesday the cost of coal can be kept down only through vigorous application of research and development of energy sources for Canadian industry at the annual western meeting of the Canadian Institute of Mining and Metallurgy.

During the next 25 years Canada's energy requirements might increase threefold and western coal would be used to provide a large share of this.

The portion would depend on relative costs so the cost of coal must be kept down.

More than 90 per cent of Canada's estimated coal reserves were in Western Canada and at the present rate of mining were adequate for nearly 3,000 years.

Dr. John Convey of Ottawa, director of the Federal Mines Branch, said that from one pound of uranium about the same energy would be released as from 2,600,000 pounds of coal.

Despite recent advances, however, no way was known of extracting this energy from so small amount of fuel. Progress was reassuring.

with the direct intent of preventing conception would be a violation of the Divine Law as it affects birth control, according to Catholic interpretation of God's Law.

"This is because a substance taken orally with the direct intent to prevent birth in no way differs from any other means of unnatural contraception."

He said the Roman Catholic Church condemns only either complete sexual abstinence or the "rhythm method" of controlling birth—a method based upon a "natural" cycle of non-fertility in the female each month.

In the rhythm method, he said, "nothing is done by the individual to upset the laws of fertility—it is a natural means of preventing conception provided by the female organs themselves."

"But even the 'rhythm method' according to a recent pronouncement by His Holiness Pope Pius XII," he added, "can be used only when there are serious reasons for limiting birth."

U. S. STEEL

CLEVELAND, Oct. 19 (AP)—The government may have to increase consumer steel allotments for the first quarter of next year. Steel magazine says today. Some consumers will have used up their 1952 allotments by the end of this year.

The government first thought it would take the first two months of 1953 to finish deliveries on November and December orders which were backed up from the steel strike.

But now the automobile industry has announced that it will have received deliveries of all of its 1952 steel tickets by the end of the year. The tickets are authorizations the government gives consumers to buy steel under the Controlled Materials Plan.

Some auto makers are even considering borrowing against first-quarter allocations to keep production roaring through December.

Still unanswered, Steel says, is the question of whether all steel consumers will be able to get delivery on their 1952 allotments by the end of the year, or whether the auto industry's position "is a result of favoritism to it, the largest steel consumer."

Steel-making rose one point last week to 105.3 per cent of rated capacity production of 2,200,000 net tons for the seven-day period.
