for Painting and Drawing in all their different  
branches.

For terms, etc., apply at her Studio—resi-  
dence of Mr. Peebles, South Side of King  
Square.

## NEWS NOTES.

The number of emigrants so far arrived  
this season, and have taken up their abode  
in Canada, is placed at 42,000.

The steamship "Texas," which arrived  
at Quebec, brought out over 150 head of  
fancy stock cattle, principally for the Coch-  
rane rancho in the North-west.

Mr. Justice Caron has decided that  
Dominion Ministers can be summoned as  
witnesses in court, but not from outside  
the Province in which they are residing.

The marriage of the Bishop of Newfound-  
land to Miss Lily Archibald, daughter of  
Lieut. Governor Archibald, is announced to  
take place in St. Luke's Church, Halifax, on  
the 22nd inst.

A terrible disaster, attended by much  
loss of life, occurred at Texas on Thursday  
night last. Owing to a switch having been  
left open on the Intercolonial Great Northern  
railway a train ran into a gang of convicts,  
who were at work on the road, killing twenty-  
three outright, and injuring a large number.

The North Sydney, C. B. Herald reports  
that the scarcity of handy sized tonnage has  
had the effect of creating a boom in coal  
freights. \$2.75 per ton is now paid from out-  
ports to St. John, N. B. \$2.50 also is offered  
for some United States ports. We may look  
out for a still further advance as the season  
gets later. The potato trade of Prince Ed-  
ward Island has carried off many of our  
coasters.

The Inland Revenue Department have de-  
cided to reduce the outside staff, which now  
consists of sixty-eight, 22 inspectors and 46  
assistant inspectors, to 50, being 24 for On-  
tario, 13 for Quebec, 4 for New Brunswick, 5  
for Nova Scotia, 1 for British Columbia. It  
is stated that it is not intended to dismiss any  
one, but as vacancies occur by death, resigna-  
tion or superannuation, new appointments will  
not be made, but the vacancies filled by  
readjustment.

A correspondent in Zululand reports an  
interview with the warriors who killed the  
Prince Imperial. When they were asked  
why they did not remove the gold chain and  
medallion around his neck after death they  
replied: "Because he was brave. He  
fought like a young lion." A cross marks  
the spot where he fell, trees and shrubs are  
planted around, and, strange to say, the  
place is kept in good order by the same  
Zulus who slew the hapless Prince.

Reports from Kansas City says the Santa  
Fe trains are delayed by a snow storm.  
For nearly thirty-six hours it has been  
snowing hard in Western Kansas, Colorado  
and New Mexico. From Larkin west to  
Pueblo there are from six to eight inches of  
snow, while from Lajunta west there are  
from eighteen to twenty inches. The cuts  
are full and a strong wind is drifting it  
badly. This is the heaviest snow storm in  
New Mexico and Colorado that the Santa  
Fe Railroad ever encountered.

A tale of almost unqualified self-sacrifice  
comes from the Transvaal. Dr. Landon, of  
the Army Medical Department, was wounded  
at the Majuba Mountain on the day  
when Sir George Colley was killed. The  
bullet struck his spine, and paralyzed his  
lower limbs. Knowing he must  
die he called to the orderlies near  
him and caused himself to be propped up  
against a boulder. There, in the very  
presence of death, he with his own hand  
forced the morphia solution into the  
wounded arm of Corporal Farmer, and thus  
frightfully wounded and suffering most  
acutely, he died.

A man had a curious race for life near  
Meriden, Conn. He swallowed a large  
dose of morphia, intending suicide, but  
quickly changed his mind, and started for  
the nearest physicians, who was two miles  
away. He felt the dangerous drowsiness  
stealing over him, and ran with all his  
might. The exercise kept him awake, but  
his mouth became parched, his eyes filmy,  
and his strength less. He stopped to pray,  
but an instant of delay warned him that,  
unless he depended on miraculous help,  
there was no time to be lost on his knees.  
He at length stumbled into the doctor's  
office, and fell senseless on the floor, but  
was saved by energetic treatment.

The London Echo has the following  
paragraph:—Meetings of disaffected  
Scottish farmers continue to be held almost  
daily. The movement is evidently strong  
est in Aberdeenshire. The report of the  
committee who were deputed to apply to  
the landlords for a reduction of rent has  
been presented. Only eleven out of  
twenty-three proprietors condescended to  
give any reply, and those intimated that  
they preferred to deal with their tenants  
individually. At a meeting of five hundred  
farmers at which the report was presented,  
it was resolved to press for the introduction  
of a Land Bill next session. One of the  
speakers, amid the applause of the audience  
declared that the factors, or landlords'  
agents, were abominated both in the con-  
crete and in the abstract, as the greatest  
curse that Aberdeenshire farmers had ever  
been afflicted with.

It is worthy of note that while the deposits  
in the banks of the United States are increas-  
ing at a rapid rate, those of Great Britain are  
nearly stationary, and stand at a lower point  
than they did three years ago. A carefully  
compiled table in the London Economist  
gives the gross deposits in all the banks of  
the United Kingdom at from £550,000,000 to  
£569,000,000 in the autumn of 1-78. The  
fluctuations since have been between 500 and  
530 millions sterling, and the estimate for the  
autumn of 1881 is at £520,000,000 to £530-  
000,000. Comparing the growth of deposits  
in United States banks with these figures we  
find that in October, 1874, they amounted to  
\$693,000,000, and declined steadily in the  
October statement until 1877, when they  
were only 616 millions. Since then they have  
been growing rapidly. They were 652 mil-  
lions in 1878; 719 millions in 1879; 873 mil-  
lions in 1880; and this year they are reported  
at 1071 millions. If to this last named sum  
be added the 300 millions or more individual  
deposits in state banks, the sum will be  
rather more than half the banking deposits of  
Great Britain.

## The Markets.

### OATS.

The most recent advices from England  
report oats worth twenty shillings per quar-  
ter of three hundred and four pounds,  
delivered in the United Kingdom, or 20s.  
6d. to a direct French port. At these  
prices there is little inducement to ship  
oats from this Province, as prices here vary  
from 36 to 38 cents per bushel, according to  
quality.

### POTATOES.

Considerable arrivals of potatoes at all  
ports in the United States have weakened  
the market. Early Rose in Boston are  
quoted at 85 cents per bushel. Blues from  
60 to 65 cents. Buyers are holding off at  
these figures. Potatoes here vary from 34  
to 36 cents as to quality and place of ship-  
ment. At these prices dealers cannot see  
other than a loss, and transactions are few.

### FLOUR.

The flour market in Gault, Ont., on the  
10th, was inactive and weak, with offerings  
rather on the increase. In Montreal on the  
12th, the enquiry for flour had developed  
into a better feeling, and some in the  
trade hope the turn for the better will be  
permanent. The quotations are:  
Superior Extra..... \$6 00 @ \$6 07 1/2  
Extra Superfine..... 5 95 @ 6 00  
Fancy..... 0 00 @ 6 00  
Spring Extra..... 5 95 @ 6 00  
Superfine..... 5 60 @ 5 70  
Canada Strong Bakers..... 6 75 @ 7 00  
American Strong Bakers..... 7 75 @ 8 00  
Fine..... 5 00 @ 5 10

### FISH.

A Boston circular of the 13th says  
receipts of mackerel at that point for the  
week have been 5,073 bbls, including  
4,429 bbls from home, and 644 bbls from  
foreign ports. The fleet have nearly all  
arrived at outports, with light fares, and  
very few more Mackerel will be caught this  
season. Trade continues to fall off, but it  
is good for the season and stocks are well  
sold up. Sales of Shore and cargo lots out  
of pickle have been at \$9 to \$10 per bbl.  
Inspected cargoes sold at \$6 to \$6 50 for 3's.  
\$3 50 for 2's, and \$16 to \$18 for No. 1. In  
a jobbing way, inspected 3's are selling  
at \$7 50 to \$8, and 2's at \$9 to \$11  
per bbl, including plain and extra.  
P. E. Island have ruled quiet, with sales at  
\$3 for 3's and \$10 for 2's. Very choice lots  
are quoted 50c higher. Nova Scotia 3's  
command \$7 and \$7 50 per bbl. Codfish  
are in good demand and prices are a shade  
higher. Sales of large dry Bank for pack-  
ing at \$4 50 and \$4 75, and choice dry  
Shore at \$5 and \$5 50 per qtl.

### THE POULTRY TRADE.

We hear that a large number of contracts  
for dressed turkeys and chickens have  
been made in different parts of Ontario  
during the past few days for the American  
Thanksgiving markets, which commence in  
New York and Boston on November 21st,  
Sats. and Octs. per lb. having been paid in  
some instances for fine turkeys.—Gazette of  
19th.

### Drunkness and Divorces.

Of twenty-seven petitions for divorce  
brought by the woman of Portland, Me.,  
in one week, ten charged habitual drunk-  
ness on the part of the husband as the  
cause of the desire for separation. Port-  
land is the home of Neil Dow; the place  
where, according to the most vehement  
if not the most convincing testimony, the  
prohibitory law is a success, and where  
people no longer drink or are drunken.  
That more than a third of the hus-  
bands of Portland whose wives want  
to be rid of them should be able  
to get enough liquor to become  
habitual drunkards, shows that there is  
"a leak somewhere." Another curious  
fact is that crime is increasing in Maine.  
The Rev. Washington Gladden, of  
Springfield, Mass., in a review of Gov-  
ernor Dingley's statistics of crime, calls  
attention to the discrepancy between his  
opinion that drunkenness is decreasing  
and his figures, which show that other  
crime is rapidly increasing. "If his  
opinion and his table are both trust-  
worthy," says Mr. Gladden, "then the  
relation of drunkenness to other crime  
cannot be what it has always been be-  
lieved to be, the relation of a principal  
cause. Perhaps the common belief is  
erroneous."

### Snake Fascination.

Catherine C. Hopley suggests in Land and Water  
a new theory of the so-called fascination of  
birds by snakes. It is that the bird  
mistakes the snake's tongue, which the  
reptile keeps in constant motion, while  
it otherwise remains perfectly still, for a  
lively worm, and gazes at it with the  
expectation of making food of it. The  
idea was suggested by observations at the  
Zoological Gardens, where the birds  
were frequently seen watching the  
tongues of the snakes.

The business of the Irish Land Court still  
increases, and there are now 45,000 applica-  
tions before it for the reduction of rent.  
There is at present no general strike  
against the payment of rent, but it is said  
that in many cases tenants refuse to pay  
unless reductions are made. The quiet has  
been so general that the Government has  
relaxed some of the precautions before  
deemed necessary, but the fire is apparently  
yet smouldering and ready to break out.  
Serious agrarian outrages are reported in  
late despatches, and the mysterious "Cap-  
tain Moonlight" occasionally walks abroad.

THE HALIFAX SUGAR REFINERY.—The Sugar  
Refinery closed up on Monday till the first  
of the year to wait for the new raw sugar supply.  
In the interim some machinery for making  
improved cube sugar will be put up, the other  
machinery put in order, and the place gener-  
ally cleaned up.
