

LARGEST SHIP EVER IN S'SIDE

The largest ship that ever docked at the Summerside Railway Wharf is the "Saguenay" Norwegian registry, out of Montreal, commanded by Captain Suerre Wiland. The ship is 475 feet long and 62 feet wide and will load 8000 crates of potatoes for Venezuela, the first potatoes to be shipped from Summerside in crates. The potatoes are being shipped by Canada Packers.

Rev. Adams Will, Conduct Campaign

SUMMERSIDE — The Rev. Nathan Adams, evangelist, and Mr. Paul Mullen, musician, will conduct the fall evangelistic campaign at the Summerside Church of the Nazarene, October 25-26. Weekday services will be held at 7:30 p.m. nightly except Saturday. Sunday services will be conducted at 11:00 a.m. and 8:00 p.m. Rev. Adams is currently serving as pastor of the New Bedford, Massachusetts, First Church of the Nazarene. In addition to his pastoral and evangelistic work, he directs the radio program "The Victory Hour," which is also taught at Eastern Nazarene College. Mr. Paul Mullen, Weymouth, Nova Scotia, is no stranger to Prince Edward Island. He has served in numerous evangelistic services on previous visits. A versatile musician, he will be playing the piano, solovok, and accordion, as well as serving as soloist and song leader.

RETURN HOME — After spending the summer months at English where he was born and spent his childhood W. D. Sumner returned to his home at San Antonio, Texas. A lawyer by profession, he has lived in the United States for a number of years where he is regarded as one of the many successful Islanders abroad. Mr. Sumner has spent the summer at his birthplace for the last 20 consecutive years. During these periods he became identified not only in the promotion of baseball and other outdoor sports, but has taken an active part in numerous civic and charity causes.

PERSONALS

The Misses Ruth Johnstone and Adele MacLeod of Summerside were the week-end guests of the former's grandfather Mr. William E. Johnstone, Long River.

Mr. and Mrs. Wendell Stewart and children of Dartmouth, N.S., formerly of Summerside, were visiting Mr. and Mrs. Hugh J. Stewart, and Mr. and Mrs. J. C. Cook of Charlotteville.

Jail Breaker Gets 1-Year

SUMMERSIDE—Roger J. Gallant of Duvar was sentenced to one-year in Dorchester Penitentiary for escaping custody when he appeared before Magistrate R. S. Hinton, Q.C., in Police Court here yesterday morning. Gallant had earlier pleaded guilty to escaping from Queen's County Jail along with Eric Arsenault of Summerside, September 27th. Arsenault was sentenced to two-years in the penitentiary last week.

Gallant, in addition to the year sentence, must also serve four months of the five month sentence he was serving in the jail when he made the break. He will also face a charge of theft of a truck on September 30th, 1959.

A resident of Sydney, N.S., pleaded guilty to having care and control of a motor vehicle while intoxicated, he was sentenced to 14 days in jail.

A Summerside man pleaded guilty to a speeding charge and was fined \$15 without costs.

Stolen Safe Recovered

SUMMERSIDE — A 500-pound safe reportedly stolen from the store of J. P. Gaudet, Richmond, September 7th along with \$60 in cash was found on the Allen Road over the weekend by Norman Cameron of Summerside.

Mr. Cameron found the safe in a ditch on the side of the Allen Rd., about a quarter-mile from the Western Road.

The safe had been broken open. No money was contained in it and bookkeeping ledgers found inside appeared in good order.

Two men are currently on trial, charged with theft. Their case continues again October 20th.

ALBERTON

Mr. and Mrs. Carl Crockett, Summerside, were weekend guests of the letter's mother, Mrs. David Campbell, Alberton.

Clair Oliver, student at the University of New Brunswick, Fred Clark, Jr., student at St. Dunstan's, and Edward McAlhuff, student at St. Francis Xavier, spent the Thanksgiving recess at their homes in Alberton.

Mr. and Mrs. George Shields, Alberton, recently motored to Moncton.

At the close of morning worship in Alberton Presbyterian Church Sunday morning, the clerk of session, Mr. Fred Clark, made a presentation to Mr. D. A. Dunlop who will soon be leaving the community after serving this

AGRICULTURAL

(Continued from Page 3) lubrication, by a complete spring checkup, by avoiding overloading at high speeds, and by selecting the proper size of tractor for the job.

TURKEYS During the first eight months of 1958 there were 18.9 million pounds of turkey marketed, 20 per cent more than a year earlier up to the same time. This year's marketings to date are composed of 11.2 million pounds broiler weight turkeys, (with the dividing line at nine pounds). During the first half of this year about equal volumes of heavy and light turkeys were marketed. Since then the volume of heavy birds has begun to increase gradually. It is estimated that marketings this year for the Thanksgiving trade were greater than usual.

The hatch of turkey poult has exceeded last year's hatch every month this year by a sizable margin. By the end of July, eight million birds were hatched, more than were hatched in the whole of 1957, the record year so far. The proportion of heavy and broiler type turkey eggs placed in incubators during the first eight months this year is about 78 per cent and 22 per cent respectively.

This year more turkeys were marketed at broiler weight than in prior years, resulting in less poundage than the increased number of birds hatched would indicate. Early marketings throughout the year as well as heavy Thanksgiving marketings are expected to relieve the Christmas

Steel Contract Awarded For Hangar At S'Side Airbase

SUMMERSIDE—A contract for the supplying and erection of the structural steel for the cantilever hangar to be constructed at the RCAF Station Summerside, has been awarded to Robb Engineering Co., Ltd., of Amherst, N.S. Value of the contract, which represents a major part of the expansion program at the air base, is valued at near one and a half million dollars.

Erection is expected to start in the spring. During the winter months, the steel will be fabricated and delivered to the site. Nearly 350,000 cubic yards of earth has already been removed in readying the site for the new hangar.

Contracts have not yet been let for two smaller hangars also to be built. Ten ammunition buildings, are now in the process of construction.

Points to the advisability of proper feeding and management in disease prevention. However, parasites should not be tolerated. If they are not producing visible symptoms they are a constant threat and predispose the animal to other disease conditions.

CONTROL For control to be logical it is necessary to know something of the life history of the parasite. The adults in the intestine lay numerous eggs which pass out with the manure, contaminating the soil, feed utensils and pastures. These eggs or ova are swallowed by animals with their feed and hatch into larval worms which, before becoming established as adult worms in the intestine, migrate through the lungs and liver, causing extensive damage.

PREVENTION: TREATMENT A study of the life history of the worm make it easily understandable why sanitation is so necessary in the control of this parasite. Treatment alone, while it may destroy and remove most of the adult worms in the intestines, will not control the parasite.

One or two months before farrowing the sow should be treated for worms. The farrowing pen is cleaned and disinfected to remove all worms and larvae. A good disinfectant is made by dissolving one pound of lye in 30 gallons of boiling water. This is used while it is still hot. After farrowing, the sow and litter are moved on to clean ground, and every effort is made to keep the pigs from becoming exposed to ground and pasture contaminated with worm eggs from the manure of infected hogs.

Mayor Returns From Ottawa SUMMERSIDE—Mayor W. A. Currie returned here Monday evening following a four-day informal federal conference in Ottawa.

The Ottawa meeting was held at the invitation of the Federal Government so that the Prime Minister and cabinet members could get first hand information on the difficulties being experienced by municipalities across Canada.

Well fed, healthy swine sometimes carry worm infestation without showing any marked disturbances, a fact which again

points to the advisability of proper feeding and management in disease prevention. However, parasites should not be tolerated. If they are not producing visible symptoms they are a constant threat and predispose the animal to other disease conditions.

FLAVORS IN CREAM Certain feeds, when fed to the cows from 1/4 to 5 hours before milking cause a definite feed flavor in the milk. The flavor is usually more pronounced in the cream and butter than in the milk. Flavoring substances of feeds are carried by the blood to the udder and are then imparted to the milk.

The substances may gain entrance to the blood in several ways. One is by passage through the digestive tract to the blood. Another is by inhalation, thus passing through the lungs to the blood. A third is by passing through the skin of the animal and then absorbed by the blood.

Tests show that the flavor of the milk was seriously affected when the following feeds were fed one hour before milking; potatoes and carrots. Practically no flavor was caused by green corn, green oats and peas.

When the feeds that cause a pronounced flavor are fed in not too large a quantity immediately after milking, the milk at the succeeding milking will not have a pronounced feed flavor.

PARASITES OF SWINE Swine suffer from both the lung worm and intestinal round worm. The common intestinal round worm is the one most prevalent in Alberta, and is the cause of substantial annual loss. The adult worm living in the intestinal tract causes irritation and damage to the intestinal wall, resulting in enteritis and unthriftiness. They also render the animal more susceptible to diarrhoeic infections by the damage done to the mucous membranes of the intestinal wall. The immature worms migrate through the lungs, and may cause extensive damage, resulting in pneumonia or a cough in young pigs. The worms then mature in the intestines.

Well fed, healthy swine sometimes carry worm infestation without showing any marked disturbances, a fact which again

points to the advisability of proper feeding and management in disease prevention. However, parasites should not be tolerated. If they are not producing visible symptoms they are a constant threat and predispose the animal to other disease conditions.

Mayor Says Statements On Water Dept. Correct

SUMMERSIDE BUREAU OF THE GUARDIAN Pointing out that the Summerside Water and Sewage Department had not been charged with depreciation, and had not paid debenture or interest charges over the years, Mayor W. A. Currie last evening told the regular meeting of the Town Council that from an accounting standpoint his recent remarks to the Summerside Lions Club in regard to this department had been correct, and were further confirmed by figures in a letter to the press that had been written by the Department Chairman, Robert Dewar, criticising the Mayor for his statements about the department.

The Mayor said that his reference to a reorganization of accounting within the Water and Sewage Department, was not to be misinterpreted as a criticism of the department's administration by past or present committees, but rather was part of a general civic government policy of reorganization of accounting within all town departments, in keeping with necessary modern business practices, and which has been done, or is being done within other town departments.

At the conclusion of the Mayor's remarks, Councillor Dewar presented a lengthy annual review of several economic and production figures of the Summerside Water and Sewage Department for the past 28 years, and concluded with the observation that the department is in "pretty fair shape," and "a credit to the town."

Councillor Dr. H. E. Clark, chairman of the Electric Light Department Committee, contended that Councillor Dewar's

TAKES COURSE

It has been announced by Keith B. Jenkins, Prince Edward Island Branch Manager of The Maritime Life Assurance Company, that Donald B. Nicholson, above, Summerside representative, has recently returned from the Company's Head Office in Halifax where he attended a Refresher Training Course and Sales Clinic. Mr. Nicholson has, this year, also completed his first year of the three year Chartered Life Underwriter's Course, attaining marks of 90 and over in all subjects.

WELL DRILLING

ter to the press that had been written by the Department Chairman, Robert Dewar, criticising the Mayor for his statements about the department.

The Mayor said that his reference to a reorganization of accounting within the Water and Sewage Department, was not to be misinterpreted as a criticism of the department's administration by past or present committees, but rather was part of a general civic government policy of reorganization of accounting within all town departments, in keeping with necessary modern business practices, and which has been done, or is being done within other town departments.

At the conclusion of the Mayor's remarks, Councillor Dewar presented a lengthy annual review of several economic and production figures of the Summerside Water and Sewage Department for the past 28 years, and concluded with the observation that the department is in "pretty fair shape," and "a credit to the town."

Councillor Dr. H. E. Clark, chairman of the Electric Light Department Committee, contended that Councillor Dewar's

letter in the press had proved nothing, but had led them to delve into costs in regard to electrical services which are provided to the Water and Sewage Department, which he presented to the Council.

Councillor MacCausland announced that 66 per cent of the tax assessment has now been paid, and that the Appeal Board expected to complete sittings this week. The chairman will be asked to make a report to the council, together with suggestions that might be of assistance to the council in taxation matters.

The council unanimously approved an expenditure of approximately \$250 for paving of a 215x43 foot section in front of the Civic Stadium, as a measure to improve the parking situation and cleanliness within the Stadium.

A grant of \$200 was made to the Summerside Fire Department to help defray electric costs during carnival week; and the I.O.O.F. were given permission to hold tag days on Thursday and Friday, October 23 and 24th.

Councillor Clark announced that the long awaited rate report from electrical engineering services would be received by the town before next Monday, and all councillors would be invited to attend a meeting of the Electric Light Department committee to hear and study the report.

The Council also approved the laying of a new sidewalk and other cement work in front of St. Paul's Hall on First Street.
