

U.S. Senate Urges Probe of Cigarette

WASHINGTON (AP) — Senator William G. Magnuson, chairman of the Senate commerce committee, has urged the U.S. Federal Trade Commission to conduct a major research program that certain filter cigarettes have more tar and nicotine than the same makers' non-filter cigarettes.

The Washington Democrat said he has been told by health scientists that the scientific evidence strongly suggests that the lower tar and nicotine content of cigarette smoke, the less harmful are the effects.

There is also no question in his mind, nor in the minds of scientists at the public health service, that the basic reason smokers switch to filter cigarettes is their concern over the health hazards of smoking and the hope and expectation that filters will furnish some measure of protection.

Magnuson, in a statement, referred to a report made public by Dr. George E. Moore, director of New York's state cancer research centre at Buffalo.

NAMES BRANDS

Moore's report, Magnuson said, singled out Pall Mall and Chesterfields. He reported his tests showed Pall Mall filters yielded 33.3 milligrams of tar, Pall Mall non-filters, 32.7; Chesterfield filters, 27.6 milligrams, Pall Chesterfields 27.0 milligrams, Magnuson said.

Magnuson introduced legislation that requires cigarette packages and advertisements to state tar and nicotine contents.

Magnuson said unless cigarette manufacturers disclose tar and nicotine contents, "I intend to urge the Federal Trade Commission to determine whether these companies are engaged in misleading practices in violation of the Federal Trade Commission Act."

N.S. Reveals Price For Deuterium

HALIFAX (CP) — Premier Scott of Nova Scotia has announced that the province has paid \$830,000 in cash and will pay a further \$2,150,000 for all outstanding shares of Deuterium of Canada Ltd., which is building a heavy water plant at Glace Bay, N.S.

The premier said in a statement that the contract between the province, Deuterium Corp. and Dr. G. Spevack was completed Friday.

The province now holds directly or through Industrial Estates Ltd., the provincial government's industrial promotion agency, all outstanding shares of Deuterium of Canada.

The province has also been granted by the New York-based firm of Deuterium Corp. the exclusive rights for use in Nova Scotia of its patented and further improved G.S. process for production of heavy water.

The statement said that a further \$150,000 is due to be paid Deuterium Corp. Feb. 1, 1967, and thereafter \$23,000 is due each quarter.

The statement says acquisition of the rights to the process for manufacturing heavy water developed by Mr. Spevack and Deuterium Corp. puts Nova Scotia in an excellent position to participate in future heavy water expansion in Canada.

The statement says negotiations now are under way between the province and Canadian General Electric Co. to settle terms under which CGE will be permitted to use the Spevack process. Agreement is expected to be reached within two weeks and CGE is expected to make a substantial payment to the province.

CPR Earnings Up For July

MONTREAL (CP) — Net earnings of the Canadian Pacific Railway for the month of July amounted to \$3,584,375, an increase of \$307,104 over the \$3,277,271 earned in July of 1965.

Total railway revenues were \$45,512,106 against \$44,653,017 in July of 1965.

January to July earnings were \$30,266,323 inclusive, compared with \$22,535,679 in the same period last year.

Figures include federal allowances related to the recommendations of the MacPherson royal commission and under the Freight Rates Reduction Act.

48 ARRESTED

NEW DELHI (AP) — Police arrested 48 goldsmiths demonstrating in front of Parliament Monday, bringing to 1,993 the number seized in week-long demonstrations. The goldsmiths claim a government rule limiting the quantity of gold that can be used in ornaments has thrown thousands of people out of work.
